A Note on Bull Development

Welcome to Cunningham Livestock! We're excited to host the New Day Genetics Bull sale and have the opportunity to develop this exceptional set of bulls.

Our development strategy with these bulls has been pretty simple. Make sure they have plenty of forage to graze, the right level of a balanced supplement to ensure proper growth and development, and plenty of room for exercise and conditioning. Essentially, our goal has been to develop them so that they can go right to work breeding cows for you, for many seasons.

Our pastures are dominated by fescue and we rely on rotational grazing and strip grazing extensively to get the most production and utilization from our forage resource. This winter, the bulls were strip grazed on stockpiled fescue behind a single poly wire until late February. They're dead broke to electric fence, and know how to graze.

I would welcome an opportunity to show you the bulls before the sale or visit anytime about their development.

Thanks and see you at the Sale!

The Cunninghams - Ted, Ashlee, Ray, John, and Paige

Welcome to the sale...

SALE LOCATION

Cunningham Livestock
1407 County Road 6380
Salem, MO 65560

We urge you to be very careful with the address, as many GPS directions are not correct. GPS coordinates 37.560546, -91.59553

Directions from Salem, MO:

NOTE: If coming from the north, we recommend using Hwy 72 from Rolla to Salem.

From the intersection of Hwy 32 and Hwy 19, take Hwy 19 south 4.6 miles to Hwy K. Turn Right on Hwy K and continue 3 miles to County Road 6380. Look for signs. Turn Right on County Road 6380, go 1.4 miles to farm entrance.

1:00 PM New Day Spring Bull Sale Begins

TERMS AND CONDITIONS

All animals will be sold in accordance with suggested guidelines of the American Simmental Association and the American Angus Association.

ANNOUNCEMENTS

Announcements made sale day take precedence over printed material in the catalog or other printed material associated with the sale.

LIABILITY

Owners, their agents, sale management, or any of the sales staff will not be held responsible for any policy.

SALE MANAGEMENT

Marty Ropp 406-581-7835
Corey Wilkins 256-590-2487
Jared Murnin 406-321-1542

www.alliedgeneticresources.com

REGISTRATION & UPDATED EPDs

All cattle will be registered with the American Simmental Association. Please note EPDs may change from the time the sale book is printed until the registration papers are transferred. EPDs printed in the catalog were pulled from IGS on September 12, 2023.

LIVESTOCK INSURANCE

Livestock mortality insurance can be arranged between buyer and an agent. Ask New Day staff or sale partners if you need help obtaining insurance and someone will be happy to assist you.

VOLUME DISCOUNTS

3% discount on purchase of 3 bulls
4% discount on purchase of 4 bulls
5% discount on purchase of 5 bulls
6% discount on purchase of 6 bulls
7% discount on purchase of 7 bulls
8% discount on purchase of 8 bulls
9% discount on purchase of 9 bulls
10% discount on purchase of 10 or more bulls

SEMEN INTEREST

New Day Genetics sellers are retaining one-third semen interest in all bulls sold unless otherwise noted. The buyer will receive full possession, full salvage value and two-thirds semen interest. The retained interest is a royalty interest that only comes into play if the bull is marketed through major semen companies.

NEW DAY BULL GUARANTEE

Unless otherwise noted, all bulls have passed a breeding soundness exam prior to the sale. **For all bulls selling for over \$2,500 dollars bulls will sell with a two season 90-day guarantee.** After the completion of the first 90-day breeding season, the warranty will be prorated by 50% of the purchase price. For example, if a \$3,000 dollar bull gets injured before the second breeding season the purchaser will receive a \$1,500 dollar sale credit.

Our standard guarantee for the bulls includes fertility for the first two breeding seasons and sight unseen purchase satisfaction. All other situations that are beyond our control (i.e., Injury, Death, Lameness, etc.) will be handled with integrity on a case-by-case basis. We understand the investment you make in your bulls can be significant; we will make every effort to take care of you if something goes awry. Please contact Corey or Ted with issues. **All warranties are issued as sale credit.**

BID LIVE ONLINE

Sale will be broadcast live online through DV Auction. For more information, see page xxx of this sale book or visit www.dvauction.com

Welcome...

We hope this finds you and your family well and hope you have received some moisture over the last couple of weeks. We cannot be more excited about our fall sale October 21 in Salem, MO. The sale will feature 125 of our very best age advantage, fescue adapted, feed efficiency tested SimAngus and Simmental bulls alongside 45 New Day sired Spring Bred Heifers. For past customers we are grateful for your past support and entrusting New Day to be your genetic provider. If you have been on the fence on purchasing a New Day bull, we highly encourage to take time and make the trip to Salem and view the bulls for yourself.

Our commitment has never been stronger in delivering genetics to producers in the heart of fescue country who will not only hold up but rather excel in their environment. We first believe in order to best meet our customer demands we deliver an age advantage product (18-month-old) who has been developed on fescue. Likewise, in order to better control costs at a ranch level we take feed intake data in order to highlight the bulls who are more efficient. Finally, we are on the cutting edge for genomic data. Not only, is every bull in the sale have a high-density genomic screening, but we take it a step further utilizing the RightChoice program. We encourage you to get familiar with the logos (G+, ACE, ATM) the program was built to simplify your bull purchasing decisions.

Once again, we thank you for entrusting the New Day branded bulls to be a part of your breeding program. If we can help you in any way, please do not hesitate in reaching out to one of our team members.

Sincerely,
The New Day Team

DELIVERY POLICY

New Day is committed to customer service and offers free delivery within 150 miles of our sale facility. New Day will also give a \$50 dollar sale credit for those bulls hauled home the day of the sale.

150 MILES FREE - 300 MILES \$100 PER HEAD - 400 MILES \$200 PER HEAD

FREE DELIVERY WITHIN 150 MILES - \$50 CREDIT FOR BULLS PICKED UP ON SALE DAY

SELECTING FOR EFFICIENCY AND REDUCED COST

The stakeholders of the US beef business have selected for output traits over the past 50+ years and have been extremely successful in this effort. The quantity of beef produced, both per animal and per acre has grown to a level unmatched in the world as a result of genetic and management improvements. However, as we reach output trait thresholds that are increasingly difficult to top without unwanted consequences, we are compelled to more intensively consider opportunities that focus on the cost or input side of the profit equation. Research over 20 years ago demonstrated that a 10% improvement in gain results in an 18% improvement in profit, whereas a 10% improvement in efficiency resulted in a 43% improvement in profit.

If you're in the cattle business today, you understand that the cost of feed and pasture is probably not going to get "cheap" again, and certainly recognize the impact these input costs have on your bottom-line. Fortunately, technology for measuring individual animal intake and efficiency has advanced and is considerably more affordable and simpler to use than just a few years ago.

Improving feed efficiency, much like other traits, is relatively straightforward. Research indicates feed efficiency is a moderately heritable trait, and thus, selecting genetics that are more efficient will pass on to the next generation. The key is finding seedstock partners, like New Day Genetics, that are embracing this opportunity to identify efficient genetics, and ultimately have those genetics generate value for their customers and the industry.

Selecting for efficiency doesn't mean you have to give up growth, carcass merit, or maternal values. The goal is to find the cattle that continue to excel in performance, but simply are able to do so with a lower feed or forage requirement.

Feed Conversion Ratio (FCR)

This is a very easy to understand efficiency measurement that tells you how much feed (lbs of dry matter) were required for a pound of gain. Cattle that excel in FCR tend to also excel for growth traits, and can lower your cost of gain significantly. As a note, selection for cattle solely based on FCR, can indirectly increase growth, but also mature cow size. In this catalog, FCR is shown as a ratio of the contemporary test group. This means a bull that ratios 100 is average, a bull with a 110 converted feed 10% more efficiently than his peers, and a bull that has a 90 converted 10% less efficiently.

Residual Feed Intake (RFI)

RFI is a bit trickier to understand, but is very useful as an efficiency measurement. RFI is the difference between an animal's actual intake and its expected intake based on the animal's gain, body weight and composition. Essentially, RFI evaluates how much feed should be required for an animal of a given size and level of performance. Cattle that eat "less" than expected will have a negative RFI, which is desirable. RFI is more closely linked with biological efficiency, and is independent of growth and mature size. For ranches that select low RFI genetics, resulting replacement females will require less feed to maintain, and long term can potentially increase stocking rate. Ranches that also retain ownership of calves will likely want to couple this selection with growth and performance traits to ensure feedyard performance meets expectations.

Greater Genomic ASSURANCE

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and the they have great EPDs to match!

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

REDUCE RISK WITH AGE ADVANTAGED BULLS

There are several important and logical reasons why commercial customers should consider purchasing bulls with a few more months of age and development on their side. Some of the benefits are obvious, but some others we don't always consider.

- Older bulls have the ability to service more females in a shorter period of time than yearling bulls. Age advantaged, 18-20 month old bulls should be capable of safely settling at least 5-10 more females in their first breeding season with minimal risk over a 45 day breeding period due to greater fitness, superior average semen production and maturity.
- Over-fat bulls are an issue in this industry. A high quality, slower paced development program is possible when producing older bulls for sale. Age advantaged bulls can simply be developed more slowly and still reach target weights and marketable condition with ease. Too often bulls developed to be sold as yearlings are subjected to extra push nutritionally in order to make those same thresholds. When done improperly, the results can be reduced longevity and lifetime service because of damage to feet, soft skeletal tissues and in extreme cases even internal organs associated with excess or faulty nutrition and exaggerated growth rate.
- Certainly, older bulls lose less weight and strength during their first breeding seasons. With that in mind the risk of your bull taking a week off or quitting the process of breeding cows completely is reduced. This is especially true in the more challenging breeding environments of the southern US.
- More of the guess work is taken out when purchasing older bulls. Strengths and flaws can both be more evident to buyers with an extra 6 months of development. For example, by that age foot and leg or disposition issues will be more evident and a higher percentage of potential problem bulls should have been identified and removed from the offering.
- Sorting older bulls does not give license to buy poorer genetics just because they have more age. It is important to make sure the age advantaged bulls you are evaluating are not just the leftovers after the more valuable bulls were not marketed as yearlings and low genetic value bulls should never be an option, regardless of age.

Many producers will always favor purchasing high value, younger bulls because of the potential of an extra season of use later in life and often sellers prefer the simplicity and lower cost of producing them. Correctly developed older bulls however, simply have a greater probability of breeding success in the first season than when they were younger. Give them a try for reduced risk.

DOCILITY RATING

All bull lots have a Docility Rating. This is our own evaluation of the bulls and not based on their EPDs. Both measurements should be considered when making a buying decision. The bulls are ranked 1-3. Anything worse than a 3 (4-6) has been culled. The definitions are as follows:

- 1 Docile - Gentle and easily handled
- 2 Restless - Quieter than average, but can be stubborn
- 3 Nervous - Manageable, but may require a different level of management and respect when handling

NEW DAY DEVELOPMENT PROCESS

We believe our development process is one that allows for the bulls to properly develop and tests the bulls to the challenges Missouri cattlemen deal with day in and day out. All of the bulls in this sale arrived at Cunningham Livestock late spring/early summer 2022. The bulls are then commingled in large groups based on weight and frame. After commingling the bulls are then developed in large pasture settings with fescue or stock piled fescue as the primary forage. The bulls are supplemented with minimal harvested feedstuffs and if the bulls are not performing up to par are culled. We are confident our age advantage, forage developed bulls will hold up in large pasture settings in the fescue belt.

Lot 123

FRIGA SPRING BRED HEIFER CONSIGNMENT

28 Black & BWF home raised heifers all sired by multiple generations of New Day Genetics. 19 Confirmed AI to Gibbs Home Run ASA 3104722 and 9 confirmed to 5GF HR 8063 ASA 3447004, a calving ease Home Run son. All heifers have been pelvic measured and tract scored. Heifers will be sold in groups on 3 to 5 based on type and calving dates. Heifers begin calving 2/15 look for more information on sale day.

GIBBS HOMERUN

Lot 124

STRADER LIVESTOCK HEIFER CONSIGNMENT

10 Black & BWF home raised heifers sired by multiple generations of New Day breeding. Heifers were bred to the calving ease specialist New Day JC704J (ASA 3870465) a direct son of the ever poplar TJ Flat Iron. Heifers will begin calving 2/15 and end 3/8 look for more information on sale day.

TJ FLAT IRON

Lot 125

5G FARMS HEIFER CONSIGNMENT

3 Black Registered Simangus Heifers from 5G Farms near West Plains, MO. The heifers come from the heart of 5G registered herd and will feature siblings of their bull consignment in this very sale. Heifers are AI bred to Gibbs Home Run ASA 3104722 or Gold Standard and are due to March 8th.

Lot 126

CUNNINGHAM LIVESTOCK HEIFER CONSIGNMENT

5 Black home raised heifers sired by multiple generations of New Day breeding. Heifers will begin calving 2/15 and were developed following Show ME heifer development protocols.

New Day Semen - Contact Allied today for fall or spring breeding season orders.

Anthem is an Eagle son who reads with as much genetic value as any higher percentage bull in the ASA database. He would be a wonderful heifer bull prospect who has top tier calving ease and is ACE verified. However, he is more than just a heifer bull as he has an unbelievable spread from BW to YW all while being backed by one of the most prolific donors in the breed KBHR Matron of Honor. If you are in search of a proven fescue adapted heifer bull look no further.
