Welcome

Welcome to Gibbs Farms first ever spring sale! We are extremely excited about this offering. We feel that continuing to grow and adapt to our customers' needs is essential for us to correctly serve you.

In this offering, you will find the same genetics in our fall sale. We are currently running over 800 head of registered cattle, and we developed 240 bulls (which is the top 60% of our herd.) We selected these bulls back in June specifically for this sale due to age. Anything after a September 25 birth date was thrown into a different development group and developed for this exciting sale. Another thing we did is develop them a little slower to insure longevity for our customers. These bulls were fed a higher roughage diet and about 2 pounds less a day. We believe you will love the way they look on sale day and enjoy the benefits of an older bull ready to go!

Another thing we are excited about is offering fall bred heifers. We have had requests for a long time now, but didn't do so because we did not want cow calf pairs in our fall sale for the simple fact of stress on the animals, and us hauling month old calves. These fall bred heifers are straight from the top of our keeper pen. With this being the first sale, you can bet we are selling some good ones to help draw attention. All females will be confirmed bred before sale day with an expected calving date. Buy these girls with confidence and just at grass time too!

We hope you can come join us sale day. Please feel free to come by and view them anytime and do not hesitate to call with any questions!

Thanks,
The Gibbs Farms Crew

- 63 years in the cattle business, Celebrating our first spring sale -

Since 1961

Spring Sale

Gibbs

**New Sale
Same Quality**

BULLS

- We made the decision last Summer to dedicate a set of bulls for customers to purchase at an auction format. The bulls are never before marketed and were ear marked for this very sale last June. We made most of the selections based on age and any bull born after 9/25 were placed in in our spring bull sale. The bulls were sorted in a development group and grew at a moderate level of gain. Finally, we wanted to give our spring breeders a chance at 18-month-old bulls to turn out in the Spring. We could not be more satisfied with how the bulls look and would rival the quality of bulls in our fall sale.

FEMALES

- We have always wanted to market early fall bred females who calved in our normal breeding season. However, with our fall sale placement managing a sizeable number of pairs is just not possible from a health and transportation standpoint. These Bred Heifers come from the heart of our replacement pen and will no doubt be the quality to move any operation in the right direction. March 2nd will mark the first-time buyers will have the opportunity to purchase this type of volume of Fall Bred heifers from Gibbs Farms.

General Sale Information

SALE DAY CONTACTS

Sale cattle viewed on five big screens. Sale cattle will be displayed in the grass lots at our sale facility same as always. No cattle will come through the sale arena.

INTERNET LIVE VIEWING & BIDDING

Sale broadcast live online with DV Auction. See page 7 for more information.

UPDATES

Please visit our website to view the sale cattle video catalog, sale order and all additional sale information... WWW.GIBBSFARMS.NET

DELIVERY OPTIONS

Please see page 4 for delivery options.

ACCOMMODATIONS

Numerous hotel options are within a short drive to the farm. We recommend staying in Oxford, AL, Bremen, GA, or Carrollton, GA.

SEMEN INTEREST

Gibbs Farms will retain a semen interest in the bulls as follows:

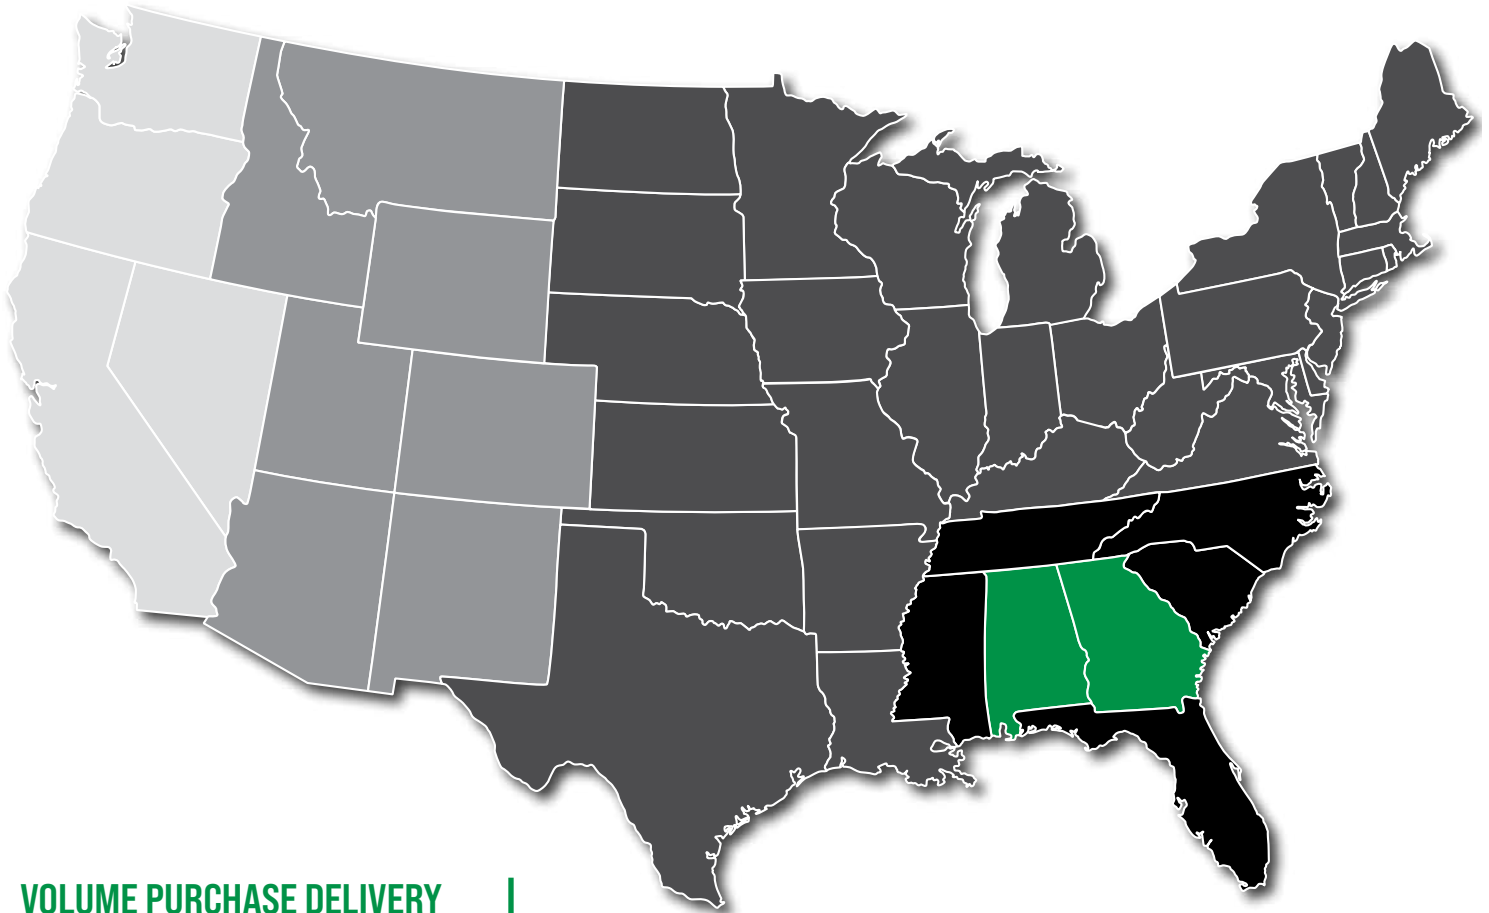

- For bulls selling for less than \$20,000, Gibbs Farms will retain 50% semen interest.
- For bulls selling for \$20,000-\$39,999, Gibbs Farms will retain 33% semen interest.
- For bulls selling for \$40,000 or more, Gibbs Farms will retain 25% semen interest.

TERMS AND CONDITIONS

Please see page 18 for terms and conditions.

From Our Pasture to yours

VOLUME PURCHASE DELIVERY DISCOUNTS

Based on the total purchase of an individual buyer where all animals are delivered to one location. Only animals selling for a minimum of \$1,500 each qualify for Volume Purchase Delivery Discounts. On volume purchases selling under \$1,500 each we will guarantee delivery as economical as possible

Purchase 2 animals	20% discount on delivery
Purchase 3 animals	30% discount on delivery
Purchase 4 animals	40% discount on delivery
Purchase 5 animals	50% discount on delivery
Purchase 6 animals	60% discount on delivery
Purchase 7 animals	70% discount on delivery
Purchase 8 animals	80% discount on delivery
Purchase 9 animals	90% discount on delivery
Purchase 10+ animals	Complete free delivery

DELIVERY OPTIONS

Gibbs Farms will be happy to arrange delivery of your sale purchase for the following guaranteed delivery fees. In order for us to guarantee delivery fees you must make arrangements to receive your purchased animals when Gibbs Farm has a delivery truck coming through or into your area. For delivery direct to your farm, you must have a safe place to unload a 24' to 30' gooseneck trailer. If you do not have an ideal facility please make arrangements to pick up your animals at your convenience.

Alabama/Georgia	\$100/animal
Florida, Mississippi, Tennessee, South Carolina, North Carolina	\$200/animal
All other central and eastern time zone locations in the continental US	\$300/animal
All mountain time zone locations	\$400/animal
All pacific time zone locations	\$500/animal

- \$ 100 / head
- \$ 200 / head
- \$ 300 / head
- \$ 400 / head

PHENOTYPE or NUMBERS?

Too often we get asked the question, “What’s most important, phenotype or numbers?” We feel like it is an important question and one that is much debated within the industry and often divides the industry. It is also a question that needs to be tackled in a few parts.

We feel as phenotype should be the base and starting point of any animal. Cattle should simply be built to last with structural integrity, correctness, and be overall sound. If a bull or heifer can grow really good or has great carcass quality, but cannot stay sound for many years to come then they will cost you money! Many do not realize that the number one expense to a producer is replacing females in the herd. Another way phenotype is important to us is simply that we like to look at the cattle and be happy with what we see. It sounds simple minded, but it brings us joy to ride into the pasture and have “good lookin” cows running around, and we know our customers feel the same. Also, I have a little boy coming up, and I hope he will want to drag one in the show ring in a few years and have some success and learn a few lessons.

Where do we stand on “numbered cattle?” To answer that correctly, we first must understand what EPDs do. “EPD” stands for expected progeny difference. They compare individual animals to other animals in different ages and environments. They are extremely important in the fact that they give you the opportunity to seek the best cattle for what you need. Individual data such as weights and carcass scans are put into contemporary groups, and go into these EPDs, and move the animal where it is compared to where it was projected on from the pedigree. The actual EPD allows you to compare animals from your neighbor’s bull or even other breeders. EPDs are will not change if the pounds are fake and are just fed on. The actual growth epds will reflect where the animal will grow in your environment. I have seen a few breeders bosting huge 1000-pound weaning weights, and we have used their bulls and never seen 1000-pound weaning weights. Do you know why?? It isn’t because they or we are doing something wrong, it is because our environments are not the same. EPDs are what keeps breeders honest. EPDs are the only tool we have to compare different herds in different environments. EPDs measure important traits that we all need to pay attention to if we truly want to be successful.

So, what’s our answer?

Both! Phenotype and numbers are important. If anybody tells you different, then they are deceiving you. The older I get, the more I see greed and marketing come into this business. Find you a breeder you trust and a program that fits what you believe in, and go with it! We hope its us! A simple analogy to remember... If your bull looks like crap, but has really pretty numbers then it’s still crap... If your bull has crappy numbers, doesn’t grow, or give you the carcass you need to hit the premiums, then you just have pretty crap... The only way to be truly successful is to have everything, and that’s what we strive to produce.

A Note From The *Sale Manager*

Welcome to the Inaugural Gibbs Farms Spring Sale. We are eagerly anticipating March 2 and for your evaluation of an outstanding set of age advantage bulls and fall bred females. The Gibbs made the decision last spring in order to better serve their customer base, we needed to have two marketing events a year. Buyers should expect the same quality and high reputation genetics the program was built upon.

The cattle market shows an immense amount of promise in coming months and years. The dwindling supply of the US cowherd and the slower build back of the cowherd is highlighting that fruitful times in the cow calf business is here to stay. However, the market shows quality still reins supreme when it comes from price differentiation in cattle. Quality genetics and strong health programs simply will return more dollars back to a producer. The Gibbs offering of genetics will no doubt allow buyers a chance to add the genetics which are demanded by the cattle feeding and packing segments of our industry.

If you have not had the opportunity to see the Gibbs offering in the past or the Fall sale did not fit your window for seedstock needs we encourage you to make the trip to see the genetics for yourself. The bulls come from a herd representing one of the very best 800 head seedstock operations who are performance based in our great country. Likewise, the cattle go through rigorous performance testing and genomics along with phenotypical selection before they are ear marked for a sale. The female offering highlights a unique opportunity for buyers to purchase some of the very best Simangus & Simmental Females from a herd who runs on fescue in the Southeast. If you are looking to grow by numbers or looking for an elite breeding piece the females will fit your needs.

We hope you can join us on the first Saturday in March for this great event. Buyers will not find better people than the Gibbs family to do business with. If we can be any assistance to you, please do not hesitate in reaching out.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward

for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and the they have great EPDs to match!

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

GIBBS 2610K Sells as Lot 1.

· We could not have picked a better bull to be our lot 1. For years, Mountaineer has been the staple herdsire here, and we haven't had a son that we felt could replace him until now. 1 has about as much eye appeal as any bull we have ever produced. We feel as if this bull is as balanced as you can make one. Heifer safe with added frame, length, and eye appeal. This herdsire is ready to go to work and we are extremely excited about his future.

Gibbs Farms Bull Development

Gibbs Farms Bulls are grazed on pastures containing KY-31 Fescue and volunteer summer grasses like common Bermuda, crabgrass, and clover very similar to the environment most of them will encounter when they go to work of the environment most southeastern cattlemen operate in. They remain in the large pasture environment from the time they are weaned right up until sale time, never spending anytime in a dry lot environment.

Yes, we supplement the bulls on a high roughage, properly balanced bull developer ration consisting of soyhull pellets, peanut by products pellets, cotton by products, ground hay, a special mineral package and enough extruded cottonseed meal to balance their protein needs. We never use high starch cereal grains in our breeding cattle developer rations.

Placing our breeding stock in settings which will replicate most commercial environments operate in, results in bulls who will absolutely meet your needs. We want customers to be able to recognize their bulls in coming months after the sale.

Sale Terms and Conditions

Herd Health... Every sale animal and the entire Gibbs Farms breeding herd is properly vaccinated and boosted annually for 7-Way Clostridium, IBR-BVD-BRSV-PI3, Hamophilus Somnus, Pasturella, Leptospirosis, and Vibriosis. All heifers are calthood vaccinated for Brucellosis and every calf born on the farm each year is tested for BVD-PI. All sale animals have been tested negative for John's Disease and the cow herd is being tested annually. All animals on the farm are treated at least twice annually with a parasitic pour-on and at least once annually with Safe-Guard drench. All bulls have successfully passed a complete breeding soundness exam.

Guarantee on the Sale Females... Every open heifer selling is guaranteed to be open at the time of the sale and guaranteed to be a satisfactory breeder provided they are managed for proper and acceptable nutritional and physical health. In the event a heifer proves to be a non-breeder, the customer must contact Gibbs Farms on or before May 15, 2021 to make a claim. A veterinarian's statement will be required and Gibbs Farms reserves the right to have the heifer returned if deemed necessary. The customer will be given a full credit (minus salvage value of the original heifer) to be used in a future Gibbs Farms Sale. Every bred female is guaranteed to be bred on sale day as stated in the sale catalog or as updated from the auctioneer at the time of the sale. In the even any bred female is found to not be bred represented when sold, the customer needs to contact Gibbs Farms immediately and no later than May 15, 2021. The customer will be given a satisfactory credit on a future Gibbs Farms Sale. Remember: All potential claims must be made to Doug Gibbs or Bradley Gibbs at Gibbs Farms on or before May 15, 2021.

Genetic Conditions... The knowledge and testing technology for all types of genetic conditions is almost changing daily. What we knew to be policy yesterday may be obsolete today. Our policy at Gibbs Farms is to fully follow and abide by any and all testing and reporting policy pertaining to genetic conditions as recommended by the American Simmental Association. We further state that our personal policy is to not market any animals known to be carriers or suspected of being carriers of any genetic conditions classified by the ASA as lethal and/or high occurrence. On any animals known to be carriers of other non-lethal genetic conditions that the ASA recommends testing, we will test and provide results on any animals marketed. For full disclosure and explanation of all genetic conditions monitored by the ASA, please refer to the TraitTrac shown on their individual pedigree on the ASA website.

Retained Semen Interest... Gibbs Farms retains 1/3 semen revenue interest on each bull selling. On every bull, you are purchasing full possession, full salvage value, full decision making, and 2/3rds semen interest. The Gibbs Farms semen interest only comes into play when semen is marketed on the bull.

Guarantee on the Sale Bulls... Every Bull selling is guaranteed to be sound on sale day to the best of our knowledge and has successfully passed a complete breeding soundness exam performed within 60 days of sale time.

Full Purchase Value Extended Warranty on Sale Bulls... Every bull selling carries a 100% guarantee extended warranty for one breeding season, provided the bull is managed for proper and acceptable nutritional and physical health, not to exceed six months beyond sale day. In the event customer has any problem with a bull should immediately contact Gibbs Farms to report a claim. A veterinarian's statement of the problem will be required and Gibbs Farms reserves the right to have the bull returned if necessary. A replacement bull of mutually agreed upon quality will be provided if Gibbs Farms has one available with delivery expense not to exceed Gibbs Farms Delivery amounts on regular sale day animals. If a satisfactory replacement bull is not available, the customer will receive be given full sale credit (minus salvage value) to be used at future Gibbs Farms Sale. Gibbs will not be responsible for any settlement amount exceeding the purchase price of the bull.

Remember: All Potential Claims must be made to Doug or Bradley at Gibbs Farms prior to May 15, 2021.

NO ONE CAN GUARANTEE EVERY ANIMAL WILL PERFORM PERFECTLY, BUT AT GIBBS FARMS WE GUARANTEE WE WILL MAKE THINGS RIGHT IF THEY DO NOT!

GIBBS 2612K Sells as Lot 34.

A powerful and stout made purebred. Lot 34 is an outcross pedigree and exhibits an exceptional amount of growth and carcass traits.

LBRS GENESIS G69 Sire of Lots 34, 35.

FRAME SCORE

What is the RIGHT ANSWER?

Everyone seems to have a strong opinion one way or the other in what the optimal frame size of a bull should be. First, any seedstock producer would agree frame scores is the most difficult and inaccurate data we collect annually. Cattle not standing perfectly in the chute among other challenges will greatly compromise the accuracy of frame size. Make no mistake, we value growth as much as anyone but in our eye's growth traits are measured by the scale not by height. Likewise, the correlation between frame size and growth is not as highly correlated as one might suspect.

Ultimately, research shows cattle who fall in the middle in regards to mature frame size are the most productive in terms of weaning off the highest percentage of calf versus their body weight. We are not attempting to sway customers one way or the other we have bulls in the offering who fall in a wide array of frame size. However, placing a high selection pressure on frame size as it relates to growth might not be the best answers for customers.

• Sells open and ready to flush.

• Not everyday you have the chance at purchasing the dam of the industry leading Simmental bull in Gibbs Essential. 7153E displays remarkable phenotype, she has a beautiful feminine look with extra length and incredible structure. What sets her apart is she transmits incredible phenotype with extra power. Each of his progeny ranks amongst the best of the breed for growth and studies with strong maternal and carcass traits. She has a strong record for flushing and will serve as a cornerstone donor for any program. We are excited to see what this beautiful baldy donor does in the future!

GGP

GGP What Does It Mean?

GGP stands for Neogen Geneseek Genomic Profiler which is a DNA genomic enhancement of Expected Progeny Differences (EPDs). GGP predictions verify performance, maternal, and carcass traits to increase accuracy and genetic prediction of the individual. Animals with GGP in the ASA/IGS Multi-Breed Genetic Evaluation have EPD accuracy equal to 15-35 progeny records for calving ease and performance EPDs and 6-8 progeny records for carcass EPDs. This advanced technology tool provides genetic prediction on yearling animals equal to years of progeny data.

ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES

EXPECTED PROGENY DIFFERENCES (EPDS): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org.

Listed below are the units in which ASA EPDs are expressed:

- ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario.
- BACK FAT (BF): Inches of carcass backfat at 475 days.
- BIRTH WEIGHT (BW): Pounds of birth weight.
- CALVING EASE (CE): Percent of unassisted births when used on heifers.
- CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.
- DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).
- MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.
- MILK (MLK): Pounds of weaning weight due to milk.
- MARBLING (MARB): Carcass marbling score at 475 days.
- MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.
- RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.
- TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario.
- WEANING WEIGHT (WW): Pounds of weaning weight.
- YEARLING WEIGHT (YW): Pounds of yearling weight.
- YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

For more detailed information about EPDs and \$indexes, visit: www.simmental.org

EFFECT OF SIRE BREED ON SALE PRICE OF BEEF STEER CALVES

Superior Livestock Auction, Summer 2020^c

SimAngus™-sired steer calves sold through Superior Livestock Auction in summer 2020 earned **more at sale time** than all other calves.^{ab}

It's no wonder the percentage of **SimAngus™** calves marketed through the industry's largest video auction has grown **eightfold** since 2010.

Want low-risk, high-potential calves with earning potential?

STAND STRONG SIMMENTAL

406-587-4531 • simmental.org

^a For lots of 50 head or more. ^b Kansas State University, December 2020, Superior Livestock Auction data analysis of 3,280 lots, 394,900 head of beef calves marketed during summer 2020. (P<.0001)
^c Lots that qualified for breed-related programs were excluded from the model due to potential confounding effects with sire breed analysis and, for many, few lots in the data.
^{d, e, f} Means without a common superscript differ (P<.05). Lots of calves in breed-identified groups were sired by bulls from the respective breeds and out of dams with no Brahman influence.
