GARNET SCHLENKER

WELCOME fellow beef producers to our 26th annual production sale! Though this is our 26th sale, the combined experience at Wilkinson Farms Simmentals spans 102 total years doing what we love... breeding Simmental cattle.

We have lived through all the progressions our breed has endured. Granted, Simmentals have always had a reputation for easy going, highly maternal cows with longevity, however, they had some stigmas it's taken years to outgrow...from being known as a breed who's bulls were thought to be "cow killers", cows with chapped, white udders, having to aid stubborn calves who wouldn't get up or find a teat, horns, grays/rat-tails, and then who can forget cancer eye? Yes, we have come a long way as a breed. Today you may walk into a pen of Simmental bulls around the country and find an assortment of solid red or black bulls who check all your boxes: soundness, calving ease, siring eager newborns, power, maternal, stayability, docility, carcass, eye appeal.

At Wilkinson Farms Simmentals we have not only been part of the change but we have committed to leading the charge in promoting balanced and breed defining genetics that stand up to the demands of the cow/calf producer, the feedlot and the grid (or as I like to say it: Cattle that perform "From the get-go to the grill"). Our unwavering commitment to provide the most efficient, economical and profitable seedstock with a high emphasis on purebred outcross genetics has never been more evident as it is in this year's offering.

Our quest to better every corner of the beef industry through genetic improvement has led us to offer another promising group of breeding pieces geared up for the ultimate test of making your next crop of calves. Choose from a wide selection of the aforementioned new outcross, up-and-coming sire groups, as well as tried and true sired options where, by way of either route, I'm confident you'll find a number of lots that fit into your program.

Our hearts have always been in Simmentals and for the people who share our love for the beef industry. We appreciate each and every one of you for your continued support and for your shared pursuit of feeding the world with perhaps the highest quality, natural product known to man...in beef.

And in closing, we are so blessed...all of us. Blessed to live in this country able to do what we love. Blessed to know so many good people in this business. And blessed to have a savior in Jesus. We know that success is not inherited or stumbled upon. It takes perseverance and diligence. Yet, we also recognize that God is the giver and taker, that everything begins and ends with Him. So we give God thanks for all our blessings and allowances by Him.

Have a blessed and safe year.

IN CASE OF STORMY WEATHER

Visit our Wilkinson Farms Simmentals Facebook page, listen to KSJB 600 am radio or call the Sale Day Phone Numbers listed on this page.

ANNOUNCEMENTS

- Please register for a bidding number prior to the sale!
- Announcements made sale day and from the auction block, during the sale, take precedence over printed material associated with this sale.
- Wilkinson Farms Simmentals semen retention rights for every bull sold through the Breeding for the Future production sale or off the ranch each year can be found in detail on page 2.
- All cattle sell under the terms and conditions of the American Simmental Association.
- Any cattle going to CANADA will be delivered to the nearest ND/CAN border crossing facility. All costs for testing and export are the responsibility of the buyer.

SALE DISCOUNT

Farm visits are encouraged, at your convenience. Come view our sale offering at the Ranch and get a \$150 discount off of a sale day purchase, BULLS ONLY. We hope to see many of you at the ranch!

LODGING

Comfort Inn	701-252-7125
811 20th St. SW, Jamestown, ND	
Hampton Inn	701-952-6500
2400 85h Ave SW, Jamestown, ND 58401	
Quality Inn	701-252-3611
507 25th St. SW, Jamestown, ND	

LIABILITY

Any person attending the sale does so at his/her own risk. Neither the sale management, owners, sale facility owners nor any person connected with this sale, assumes any liability, legal or otherwise.

COMPLIMENTARY SALE DAY MEALS

Warm breakfast items, fresh donuts and refreshments will be available after 9:15 AM, for those coming early to view the cattle. A hearty Noon Meal is served from 11:30 AM - 1:00 PM.

BREEDING FOR THE FUTURE ADVANTAGE

- Feed bulls until April 1st or when we start delivering bulls. After April 1, 2024 we will charge \$3/day per animal.
- Test all bulls and guarantee their soundness at delivery.
- BULL DELIVERY: We deliver bulls, free of charge, up to a 200-mile radius of our ranch. Often, we make trips beyond that radius. We will do our best to accommodate each purchase for the most economical delivery and will help to coordinate long-distance transportation. Any buyer who wants us to keep their bull(s), beyond our delivery date, is responsible for pick up and delivery, at the buyer's expense.
- FEMALE DELIVERY: We will help to coordinate deliveries. Bred females need to be removed within 2 weeks after the sale.
- We ultrasound all bulls and all replacement females.
- Wilkinson Farms now has data for their entire herd with 25 years of ultrasound history.
- All sale animals will have genomic-enhanced EPDs and Right Choice evaluations.

LIVESTOCK INSURANCE

Animal injuries or death are the responsibility of the new owners. We highly recommend that you insure your livestock on sale day. Contact information is listed below.

ABOUT THE CATTLE

VACCINATION SCHEDULE

Open Heifers and Bulls: Poured with Ivomec -Bovishield Gold 1 Shot -Ultra Bac 7 with Somnus -Inforce

At weaning: Boosted with Bovishield 5 -Ultra Bac 7 with Somnus -Poured with CleanUp -Given Dectomax Injectable -Bulls received magnets

Open Heifers: Jan '24 -Bovishield FP5 -Spirovac VL5 -Received magnets -Poured with Clean Up -Given Dectomax Injectable-Checked for breeding soundness -Bangs vaccinated

Bred Females and Cows: Jan '24 -Confirmed bred -Poured with CleanUp -Scour Bos 9 -Virashield VL5 -Received magnets as yearlings

RETENTION

Wilkinson Farms Simmentals retains the right to two flushes (20 freezable egg minimum) on the Open Heifer in this offering.

SEMEN INTEREST

WILKINSON FARMS SIMMENTALS SEMEN RETENTION RIGHTS FOR EVERY BULL SOLD THROUGH THE BREEDING FOR THE FUTURE PRODUCTION SALE OR OFF THE RANCH EACH YEAR ARE AS FOLLOWS:

- 1/2 (one half) semen interest on any bull sold for up to \$25,000.
- 1/3 (one third) semen interest on any bull sold from \$25,001 to \$40,000.
- 1/4 (one quarter) semen interest on any bull sold for over \$40,000.
- If semen sales are made on a Wilkinson Farms Simmentals raised/owned bull, the new bull partner/buyer will receive royalties for sold semen on the applicable bull once expenses are recovered. Such expenses may result from, but are not exclusive to: semen collection(s), housing, trucking, travel expenses, storage fees, etc.
- Wilkinson Farms Simmentals reserves the right to charge sales fees for semen sold which would be reflected on royalty payments of any applicable bull where semen has been collected and sold.
- The action of purchasing a bull from Wilkinson Farms Simmentals by auction, or off the ranch, indicates the buyer assumes the terms of this pre-sale agreement.
- Negotiation of any pre-sale proposals or adjustments to the terms listed previously will close one hour prior to the scheduled sale time.

WILKINSON FARMS SIMMENTALS FAMILY HIGHLIGHTS

Shout out to the amazing crew that helped us wean calves this past fall. Many hands made the work lighter and we're thankful to have so many.

Terry attended the ASA's annual Fall Focus meeting held in Denver, CO in August, 2023. While there, he was able to visit the Michalak family and make some special memories with his grandkids.

Mike & Amber (Schlenker) Michalak welcomed their fourth baby in December, 2023. Azure Joseph is well loved by his proud older siblings...Myles, Mercedes & Alyse Michalak

Terry was able to glean valuable information during the Allied Genetic Resources' annual fall event in Montana.

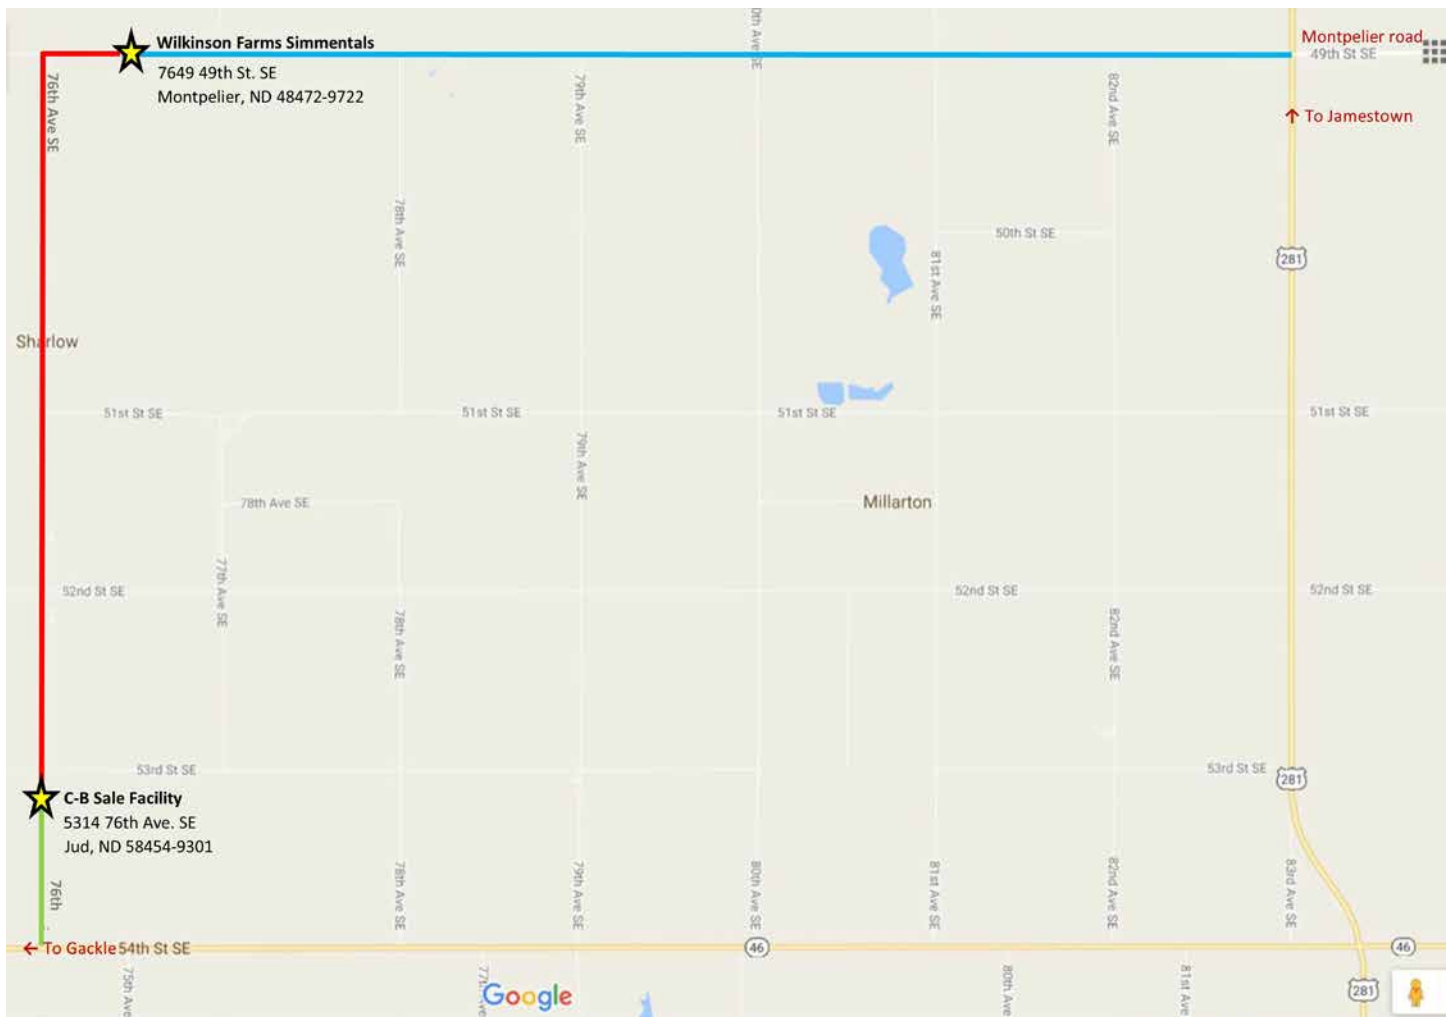

After devoting many years to raising her family, Cathy embarked on an adventure to attend massage therapy school this past year. She's already helping and serving many people with her plethora of new skills. We are so proud of her. Cathy and Mical's fiancé, Sohe, graduated in December, 2023 from the Elite Massage Academy in Fargo, ND.

“Family is not an important thing. It's EVERYTHING.” - Micheal J. Fox

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

COMMENTS FROM A 20-YEAR CUSTOMER OF WILKINSON FARMS SIMMENTALS

Warren Zenker, his wife, Linda and son, Brooks live near Gackle, ND. Warren is a 4th generation farmer/rancher. His family started in the early 1900's with a cow/calf operation, which they still run. The Zenkers built a feedlot in 1990 which Brooks manages now. Warren served on the ND Stockmen's Association Board for 14 years, including two years as President. In 2022, he was appointed by the Governor to the State Board of Animal Health, as the commercial cattlemen representative.

WARREN ZENKER

Warren: I've been buying bulls from Wilkinson Farms Simmentals for 20 years. In 2021 & 2022 we sent calves to KS to feed out. 60% of the cattle, out of your Simmental bulls, made Prime. When you sell on a grid base, it was those bulls that generated about an extra \$200/head because of their grade. The Simmental genetics were the highest sire group that I took carcass data from in the years that we did it. I can have the growth to where I can take those cattle & we can feed them to be 1450 – 1470 lbs and they aren't over fleshed...they aren't too fat. You can take those [calves] & they grade well. Those are all positives on the Simmental side of things.

When we go to sales, we look at your EPDs. What are you striving for? Growth, maternal, carcass, or all 3? Use the EPDs to your benefit and know what they mean. Use this to make your bull selection to improve your herd. A lot of times the EPDs are overlooked.

I've chosen for some carcass. The more that you do it, the more you select for EPDs. As you keep daughters from those sires that you buy under strong EPDs, (carcass merit, maternal or whatever) that will carry over to the next generation. Use the tools that are given to make your operation more successful.

I have seen, first hand, the value in your bulls because you have done 25 years of carcass data on all bulls and females. I can be assured that I can put cattle on a grid and be confident that they are going to grade well because of the research and data you've provided. I feel confident and know that I won't get hurt by the performance of those cattle. That's a real advantage, a real tribute & a pat on the back to your operation.

BREEDING FOR THE FUTURE BULLS

Perhaps his name should've been "Jack of All Trades" because we have yet to find a limit to his genetic capabilities. He has consistently proven to lower BW while promoting top end WW. In the feedlot his calves appear to be taking to feed like their sire who led his test group for ADG. And all the eye appeal and structural soundness you could ask for packaged in a 6 frame score. Dispositions couldn't be better with most of his calves nearing pet status. He should be solid on carcass and maternal as well. We look forward to continue using WS Enhancement in the years to come as he leads Sim genetics into the future.

-Aaron

66L Sells as Lot 11.

WS SWEET KATCH K4 Full sister to Lot 11. Maternal sister to Lots 12, 13.

BREEDING FOR THE FUTURE BULLS

Fireproof was our pick of the Firesteel sons in 2021. This phenotypically flawless bull sires attractive, high carcass calves with impeccable feet and dispositions while bringing some new blood in from the Angus side of things. He poses an untypically high Stay number for a SimAngus bred bull. His first daughters calve this spring. I expect their maternal should be solid and udder quality a strength.

A NOTE FROM THE SALE MANAGER

Welcome to the 2024 Wilkinson Farms Simmentals sale. We are extremely excited about the bulls and females being offered. This program is known for producing some of the top genetics in the Simmental breed. Through the years some of the breeds greatest AI sires and donor dams have sold through this sale. We feel that this year's offer has the potential to produce the next breed leading Herd Sire and donor female. The Schlenker family has been committed to producing cattle that keep moving the industry in a positive direction. They are students of the breed and are always striving to make the next generation better. Through the use of new genomic technology as well as good old fashioned breeding philosophy this set of bulls and females might be the best ever produced in this program, only time will tell.

We have experienced some great times in the cattle industry with record high prices being paid for all classes of cattle. We have also experienced high input cost and weather challenges this past year in many parts of the country. With all this being said it proves why it is important to select your genetics from programs that have produced breed leading genetics for decades. They have survived the ups and downs we experience in the business, and this helps ensure your next genetic purchase has the potential to keep your cowherd equipped to take advantage of the good times and weather the bad. As always, if you have questions about the offering or need assistance on sale day please reach out to any one of us on the Allied team.

Sincerely,
 Marty Ropp, Corey Wilkins and Jared Murnin

- The stud of the red bulls
- Dam is a maternal sister to WS Miss Sugar C4
- 9 EPDs in the top 15% of the breed
- Don't miss out on adding Miss Sugar's maternal pedigree into your red herd

Claw and Angle Scoring

Claw Shape

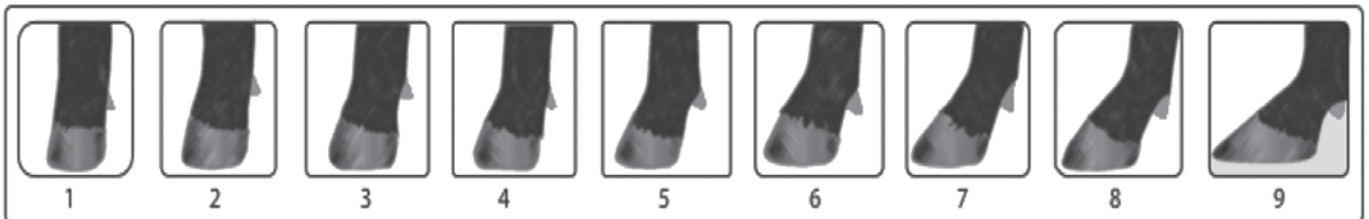

Open Divergent (OD)

desirable

Scissor claws (SC)

Reference: Shape (primarily curl) and evenness of the claw set.

Foot Angle

Steep feet angle (SA)

desirable

Shallow feet angle (SA)

Reference: Strength of pastern, depth of heel and length of foot.

The 38 Special has been a solid addition to our red outcross breeding options. Many of his calves weaned off in the top of their pastures. He adds eye appeal and athleticism while stamping his calves with a cherry red color. With as good as the bulls are I believe his highest value will be found in his daughters given the attractive nature of his dam, her soundness and picture perfect udder. For those of us who take pride in our cow herds, I expect he'll be a game changer when it comes to influencing your replacement pens for decades to come whether you're in it for the long run or looking to pass it on to the next generation.

WS KILLING TIME E38 Dam of 38 Special.

- Unique, outcross breeding to most reds.
- No Imperial, no Direct Impact, no Electra, no Full Figures, no Sugar, no Beacon breeding in his pedigree.
- Among the highest API/TI combination of all Captivate sons.
- He has been a 1 in Doc before and after picture day. He didn't like being alone in the photo pen however where he did not act like a 1, on a less than ideal, windy, picture day resulting in us unable to get a pic of this really good bull.

-Aaron

Sells open.

Donor Prospect. We are very excited to introduce WS Leap Forward to our female offering this year. I believe her genetic potential could be off the charts. She displays beautiful, feminine phenotype as she freely covers her track while carrying a strong bone under her cherry red coat. Her super personality runs in the cow family being as easy to work with as you could ask for. And check out her limit-defying metrics. Genomics took her already impressive projected EPDs to the next level, driving her past both parents on 7 different traits and from a BW to YW spread standpoint, she has separated herself from all other red, PB, females in the breed who possess an API in the top 1%. She is the definition of balance and beyond. She may be the portal to the future of red Simmentals. -Aaron

ASA Quick Reference to EPDs, Indexes and \$Values

EXPECTED PROGENY DIFFERENCES (EPDS): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org.

Listed below are the units in which ASA EPDs are expressed:

ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario.

BACK FAT (BF): Inches of carcass backfat at 475 days.

BIRTH WEIGHT (BW): Pounds of birth weight.

CALVING EASE (CE): Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.

DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).

MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.

MILK (MLK): Pounds of weaning weight due to milk.

MARBLING (MARB): Carcass marbling score at 475 days.

MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.

TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario.

WEANING WEIGHT (WW): Pounds of weaning weight.

YEARLING WEIGHT (YW): Pounds of yearling weight.

YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.
