March
18

ALL TERRAIN

BULL AND FEMALE SALE

Walsh, Colorado

BRIDLE BIT SIMMENTALS SALE FACILITY || 1:00 PM (MT)

WELCOME TO THE SALE

BRIDLE BIT *Simmentals*

On behalf of our crew and sale partners, we would like to welcome everyone to our annual All Terrain Bull and Female sale. The year has flown by and it seems like yesterday this offering was hitting the ground as baby calves.

Economic relevant data still drives our program. We feel the more data we can collect the better opportunity our customers have to succeed. The bottom line to success for all of us is BEEF. How can we produce the best beef with the least input? Bridle Bit has been able to produce top quality beef with last year's cattle grading 51% prime. See page 15 for the harvest summary. We are continuing to be one of the very few programs collecting intake and feed efficiency data. We feel it is beginning to give our program an advantage.

It takes an army to offer bulls for sale at auction. We want to give a special thank you to the people at Allied Genetic Resources for your commitment to our program, the Simmental breed and the beef industry. This would not be possible without you all.

Finally, a special thank you to our previous and future customers. Your interest in our program means more than you will ever know. Please feel free to give us call if you have any questions or would like to stop by and evaluate the bulls.

Sincerely,

Chad Cook

Denver International Airport (DIA)
Garden City Regional Airport
Springfield Municipal Airport
There are also two airstrips in Walsh, CO. Please call to make arrangements.

ANNOUNCEMENTS

Announcements made sale day take precedence over printed material in the catalog or other printed material associated with the sale.

LIABILITY

Owners, their agents, sales management, or any of the sale staff will not be held responsible for any personal injury, loss or accident while attending this sale.

CONDITIONS OF SALE

All animals will be sold in accordance with suggested guidelines of the American Simmental Association. Unless other conditions are stated in this book.

REGISTRATION AND UPDATED EPDS

All cattle will be registered in the American Simmental Association. All EPDS are the most current BOLT at the time of printing conducted by IGS and the American Simmental Association. Please note that EPDS may change from the time the sale catalog is printed until registration papers are transferred.

LIVESTOCK INSURANCE

Livestock mortality insurance will be available sale day. If bulls are left at the ranch we strongly suggest you insure your purchase. The bulls become your property when they are sold. In order to guarantee bulls valued at \$10,000 or more, we ask that you purchase insurance on your investment. If God forbid something happens and the new owner must use the insurance policy we will pay the new owner the cost of their premium at that time. Bridle Bit is happy to assist with questions. New owners can use their own insurance, or Jeff Thomas 406-581-8859 • jeffthomas138@gmail.com

TRUCKING / FEEDING OPTIONS

OPTION 1: A \$50 discount per bull will be given if taken home the day of the sale.

OPTION 2: Free delivery on \$10,000 purchase of bull(s) up to 500 miles.

OPTION 3: All bulls can be kept free of charge up until April 10, 2024. After that date, buyers will be charged \$3.50 per day/per bull.

BREEDING GUARANTEE

We stand behind all of our bulls and want you to be satisfied, so let us know as soon as possible if there are any problems. Scrotal measurements are actual (not adjusted) as reported by Dr. Birdsong at the time of fertility exam, and will be listed on the supplement sheet on sale day. All of our bulls have passed a fertility soundness exam unless indicated on the sale block. All bulls are guaranteed breeding sound.

FEED PROGRAM

Bulls were fed a high roughage ration after weaning while undergoing feed conversion testing. The ration consisted of corn silage, sorghum hay, alfalfa hay, cracked corn and dried distillers with a target of 3.0 ADG. Nutritionist Hans Hoeltzel, Hubbard Feeds 913-426-2055

RETAINED SEMEN INTEREST

The buyer will receive full possession, full salvage value and 100% semen interest on all bulls sold unless otherwise noted or announced from the block. If a bull is collected, Far Out Cattle Ranch, Megan Wait and Bridle Bit Simmentals reserve the opportunity to a one time 30 unit package each for in herd use only.

HERD HEALTH

Birth: Bovine Ecolizer +C20
Branding: Inforce 3, ViraShield 6, Ultrabac7/Somubac
Weaning: Virashield 6, Ultrabac7/Somubac, Dectomax
Pre-sale: Clean Up pour-on, Heifers - Bovi-Shield Gold FP5 VL5, ViraShield 6+PL5

All bulls selling are virgin bulls. All lots are AM, CA and NH free by pedigree. All lots are BVD free, and all bulls have passed a TRICH test.

Herd Vet: Southeast Colorado Vet Clinic, 719-523-6828

ABOUT THE SPEAKER - TRENT SHARON
Business and Risk Management
Consultant

Trent was raised on his family's farm and ranching operation in southeastern Colorado where he grew a deep appreciation for hard work and developed a love for the cattle industry. His passion for agriculture led him to Northeastern Junior College in Sterling, Colorado and then to Colorado State University where he received a bachelor's degree in animal science. After graduation, Trent and his wife Lindy moved to Throckmorton, Texas to manage the development division of the R.A. Brown Ranch. After five years in Texas, Trent moved back home to southeastern Colorado. Shortly after returning home, Trent and Lindy started Sharon's Cattle Service which is comprised of a small backgrounding operation that specializes in starting light, high-risk calves that will graze on wheat and grass as well as a small order buying business out of La Junta, Colorado. Trent and his family have been blessed with opportunities to grow their operation by running a cow calf herd as well as turning out summer grazing cattle throughout southern Colorado. The operation would not be able to thrive without the dedicated work of the entire family. Trent and Lindy are blessed with 5 boys that keep them hopping as they are all very competitive in the rodeo arena as well as on the wrestling mat. Waitley, Traven, Stockton, Cayhill, and McCallen all work very hard in the family business and are also developing a love for the cattle industry. Trent has more passion for the cattle industry now than ever before and through his years of managing cattle for others as well as his own operation, he understands the hardships and risks that are involved with the industry. He is excited to be able to use his real-world experience and knowledge of the industry to come along side other cattlemen to set goals and manage risk with the intention of being the best stewards of God's land and livestock.

**BRIDLE BIT SALE
FACILITY
28065 CR 45
WALSH, CO 81090**

We are hosting a dinner and program.

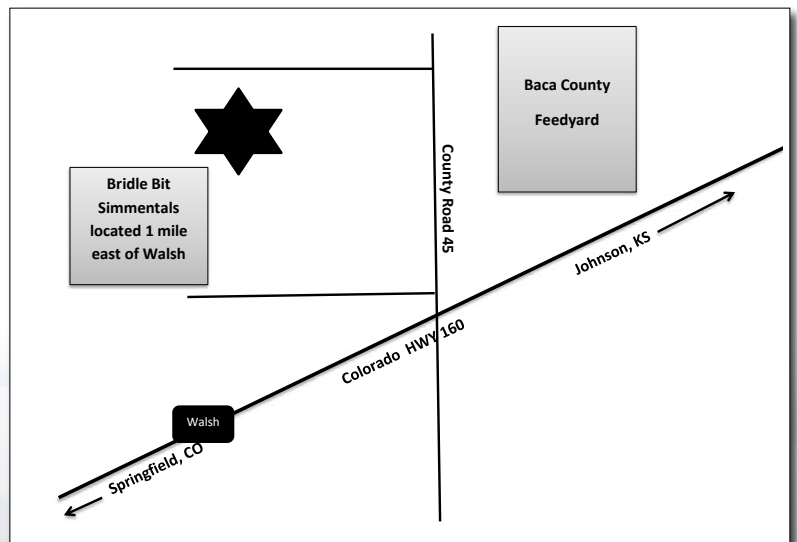

Featured speaker: *Trent Sharon, Compass Ag Solutions*

5:30 PM DINNER

6:00 PM PROGRAM

*For those unable to attend, we will broadcast the program on FaceBook live.
Please RSVP to 719-529-0564.*

There will be a drawing for a \$300 sale credit for those in attendance and a \$150 sale credit for those who join us on FaceBook live.

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

FROM THE SALE MANAGER

Welcome to the 2024 All Terrain Bull Sale we are looking forward to seeing you March 18th in Walsh, CO. The Cook & Brisendine families along with Megan Wait once again has assembled a strong group of Sim bulls along with a fancy set of replacement females for your appraisal. The cattle out of these respected programs are no doubt making a positive impact in numerous commercial programs and the All-Terrain sired feeder cattle are demanded by cattle feeders.

When a customer buys from the All Terrain bull sale you absolutely get it all. Rigorous performance testing, a magnitude of genomic information, and the RightChoice genetic evaluations. What sets the program apart for many is the feed intake and efficiency information every bull has collected. The decision was made several years ago in order to better serve their customers in the more arid environments feed intake data was a necessity. The use of feed intake data has allowed the program to make huge leaps in improvement and Eclipse sired cattle are some of the most efficient cattle in the industry. Along with strong selection of genetic testing the programs place a huge importance on the phenotypical selection of the cowman traits. Striking type can be found from cover to cover, and if you have not had a chance to go through the Cook family's cowherd you are missing out. Wonderful udder quality, sensible mature cow size and fantastic docility can be found in every female.

The opportunity to acquire more than superior genetics presents itself for customers on March 18. The programs all have a customer comes first approach and along with a strong bull warranty and affordable deliveries. A growing number of feeder cattle is being marketed on Superior Livestock who carry the All Terrain sired designation. If you are looking for avenues to maximize the value of your feeder cattle make sure to visit with the crew, they would like nothing more than to collaborate with you.

We hope you can join us March 18 for the bull sale. If you are looking for great food, cattle and hospitality the event will not disappoint. As always if we can be any assistance, please do not hesitate in reaching out to us for service.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

The sons of Eclipse come light, many being suitable for heifers, and absolutely explode thereafter for growth. He is the highest proof Simangus bulls in the database for feed intake and RFI. If you are wanting efficient cattle to build a herd around the Eclipse sons will make excellent choices. The Eclipse sons will offer genetic diversity to many popular pedigrees in the business, and at 8 years of age he remains a heavy use sire in the beef business.

Galileo is one of the best true big spread bulls who is high accuracy in the ASA database. The bulls will no doubt be calving ease-oriented sires who will provide ample growth and top tier profit indexes. The bulls are not only outliers on paper as they are easy to admire for their type and kind as well.

MORE *with less*

SELECTING FOR EFFICIENCY AND REDUCED COST

The stakeholders of the US beef business have selected for output traits over the past 50+ years and have been extremely successful in this effort. The quantity of beef produced, both per animal and per acre has grown to a level unmatched in the world as a result of genetic and management improvements. However, as we reach output trait thresholds that are increasingly difficult to top without unwanted consequences, we are compelled to more intensively consider opportunities that focus on the cost or input side of the profit equation. Research over 20 years ago demonstrated that a 10% improvement in gain results in an 18% improvement in profit, whereas a 10% improvement in efficiency resulted in a 43% improvement in profit.

If you're in the cattle business today, you understand that the cost of feed and pasture is probably not going to get "cheap" again, and certainly recognize the impact these input costs have on your bottom-line. Fortunately, technology for measuring individual animal intake and efficiency has advanced and is considerably more affordable and simpler to use than just a few years ago.

Improving feed efficiency, much like other traits, is relatively straightforward. Research indicates feed efficiency is a moderately heritable trait, and thus, selecting genetics that are more efficient will pass on to the next generation. The key is finding seedstock partners, like Bridle Bit and the Cook Family, that are embracing this opportunity to identify efficient genetics, and ultimately have those genetics generate value for their customers and the industry.

Selecting for efficiency doesn't mean you have to give up growth, carcass merit, or maternal values. The goal is to find the cattle that continue to excel in performance, but simply are able to do so with a lower feed or forage requirement.

Feed Conversion Ratio (FCR)

This is a very easy to understand efficiency measurement that tells you how much feed (lbs of dry matter) were required for a pound of gain. Cattle that excel in FCR tend to also excel for growth traits, and can lower your cost of gain significantly. As a note, selection for cattle solely based on FCR, can indirectly increase growth, but also mature cow size.

Residual Feed Intake (RFI)

RFI is a bit trickier to understand, but is very useful as an efficiency measurement. RFI is the difference between an animal's actual intake and its expected intake based on the animal's gain, body weight and composition. Essentially, RFI evaluates how much feed should be required for an animal of a given size and level of performance. Cattle that eat "less" than expected will have a negative RFI, which is desirable.

RFI is more closely linked with biological efficiency, and is independent of growth and mature size. For ranches that select low RFI genetics, resulting replacement females will require less feed to maintain, and long term can potentially increase stocking rate. Ranches that also retain ownership of calves will likely want to couple this selection with growth and performance traits to ensure feedyard performance meets expectations.

“ With today's input costs, identifying cattle that can do more with less is critical. The commitment the Bridle Bit team has made to focus their program on efficient, economically relevant genetics, without a doubt, positions them to help their customers remain profitable in the years to come. ”

- Ted Cunningham, C-Lock, Inc.

A former high seller out of our program and a bull who is receiving high use across the industry. Many of the sons receive the ACE logo pointing to the fact they will be heifer safe. The bulls are sensible in terms of frame size and are much easier fleshing compared to their grandsire Big Timber. Likewise, the sons combine great calving ease with top tier growth and strong maternal traits.

About the Red Rock Sons *The American Simmental Association has received cases of a genetic defect reported from the membership called Hydrops. Hydrops is a maternal defect discovered in the sire of Bridle Bit Red Rock G9124. At this time we encourage buyers to use Red Rock sons as terminal sires only. The ASA is working hard with the University of Nebraska to develop a DNA test for these animals. Please give Chad a call if you have any questions 719-324-0564.*

One of the most popular red Simmental heifer bulls in the industry who was a sale topper in our 2020 production sale. The Red Rocks are making incredible bulls and great replacement females. His combination of calving ease and marbling is a rare find in a red package.
