# Welcome to the Sale

Welcome Fellow Cattleman & Cattlewomen to the 12th Annual Cattleman to Cattleman High Altitude Bull Sale.

What a great year 2023 was in the cattle business with record high prices for calves and more demand for our product than ever before, American Beef is where it's at. 2024 is starting off just where 2023 left off with great prices for cattle. You, the cow-calf producer, are finally getting paid a premium for your product. And very well deserved, as we look ahead the cattle numbers are still dropping in the US. If I had to give some advice. Fight, claw, dig in deep, and make this cow market work for your operation and for hell sakes get your kids involved in agriculture. We are seeing too many farms not passing down through the generations. If we are to stay independent as a country, we must never lose the ability to feed our country. In 2023 we were able to market and sell many loads of cattle through Superior livestock while using our Allied marketing logo for top dollar. 2024 will be better, SimAngus cattle are in demand. We want to thank our sale managers at Allied Genetics. Jared, Corey and Marty have been very helpful pivoting our sale and helping us better serve our customers as we navigate the cow calf market. Also, thanks to Tate Gurney for being such a great rep for our customers selling on Superior Livestock.

This year's bull crop represents 20+ years of breeding, selecting, and creating commercial cattleman, a bull that will work in the western arid high desert ranges of the west. With over 20 years of PAP testing feel confident that we are doing the homework for you, when it comes to High Altitude Cattle. Our cattle run just like yours we have large winter BLM permits, and then move to spring allotments for breeding, then on to high valleys of Idaho where we summer our herd.

We have 110+ Pap tested bulls this year, SimAngus, Simmental, and Angus. The bulls pap tested very well this year, we cull very hard every year only selling our top 65% of our bull calf crop. The bulls must perform in our conditions.

As always with our bulls we stand behind them 100%. Buy with confidence that these bulls will push down the scales with there calves and give you those great maternal made female replacements that we all want. Remember, we are the only ones that can make it right if there's a problem, we can't fix it if we don't know about it. We are your partners in the cattle business.

We wish for record high prices, and plenty of grass and water in 2024.

Best Regards,  
*Mike, Eric and Kevin Lyman families*

## INTERNET BIDDING

Sale will be broadcast live on Cattle USA and DVAuction.

**For Cattle USA:** [www.cattleusa.com](http://www.cattleusa.com)

*Click on Producers Livestock, Salina, UT*

*All internet and phone bidders must be registered with Producers Livestock prior to bidding!*

**For DVAuction:** [www.DVAuction.com](http://www.DVAuction.com). See the page 35 for more information.

## SCHEDULE OF EVENTS

**February 24, 2024**

10:00 am

Preview the Bulls

1:00 pm

Sale Begins

*Join us for a complimentary lunch prior to sale.*

## VIEWING THE BULLS PRIOR TO THE SALE

Please visit us to view the bulls before the sale at Lyman Livestock Farm, 8500 S. State Road 198, Spanish Fork, UT 84660.

## SALE TERMS AND CONDITIONS

Cattle will be sold under the terms and conditions of the American Simmental Association and American Angus Association.

## BREEDING GUARANTEE

Bulls will be semen and Tric tested and are guaranteed breeders.

## LIVESTOCK INSURANCE

We cannot guarantee the bulls will not be injured while at our facility post sale, we highly recommend you purchase livestock insurance. We will have it available sale day.

## SPECIAL THANKS

Arrowhead Veterinary for doing our breeding and soundness exams, Producers Livestock Auction for hosting our sale and San Rafael Vet Clinic for PAP testing the bulls.

## CATTLEMEN TO CATTLEMEN GUARANTEE

Cattlemen to Cattlemen guarantees the breeding animal for six months after the sale date as a satisfactory breeder. This guarantee does not cover illness, injury, neglect, or death. All animals become the responsibility of the buyer once it leaves the ring. The seller has the right to replace the animal with one of equal value or refund credit minus the salvage value at a future sale. All returned bulls will need a vet's detailed written diagnosis of cause to be a non-breeder.

## LIABILITY

Neither Lyman Livestock, sale management, seller or Producers Livestock Auction is responsible for sale day accidents. Announcements made on sale day will take precedence over printed material in the sale catalog.

## FEEDING AND DELIVERY

Lyman Livestock will keep your bull and deliver him to your ranch free of charge. However, we can not be responsible for injuries that occur after the sale. We will start delivering the bulls on April 5, 2024.

## PAP TESTING

PAP scores are provided to indicate differences between bulls and how they may work at high elevations. PAP tested above 6,300 feet. See page 2 for more information.

## ABOUT THE BULLS

All bulls were weaned on September 5, 2023. Bulls without a BW listed calved out unassisted on the open desert range. Lyman Livestock will be retaining 25% semen interest in all bulls sold. Buyer owns 100% possession and salvage value. If semen collection is done, it will be at our expense and the buyer's convenience.

# More on PAP Testing

## Details for PAP Testing and Scoring of Cattle PAP Tested at 6,300'

PAP Score mmHg	Evaluation
30-35	Excellent and Highly Reliable Score
36-40	Excellent for animals older than 12 months. For a younger animals the score is fairly reliable, but testing is suggested.
42	Reliable score in all animals older than 12 months. It is recommended that younger cattle score less than 42 depending on test altitude.
43-46	Acceptable score for animals older than 12 months. Younger animals should be retested.
47-49	Acceptable score for animals older than 16 months that have been at high elevations for an extended period. These animals should be considered at some risk. Testing altitude and animal's location should be considered.
>50	Animals in this range are considered at high risk for themselves and their offspring. Many animals scoring in this range have died of high-altitude disease.

\*\*\*Note These figures are based on cattle 12 months of age and older and tested at or above 6,300 ft. If an animal does not meet these criteria, adjustments must be noted.

### Accuracy of measuring PAP to predict pulmonary hypertension at various altitudes.

Elevation	Accuracy
< 5,000 ft.	NOT VALID
5,000 - 7,000 ft.	75%
7,000 - 8,000 ft.	80%
8,000 ft.	85%

Animals must be exposed to the altitude above 5,000 ft for a minimum of 4-6 weeks.

# LYMAN LIVESTOCK

Lyman Livestock is a fifth generation ranching operation based out of Central Utah. The ranch is run by three brothers Eric, Kevin, Mike, along with their parents, Keith and Glenda, and our kids. Everyone pitches in with the work, our kids are taught to work at a young age and are very capable of all ranching activities. Our wives are our unsung troopers, from meals delivered, to feeding when no one is around, to clerical work, and bull sale info.

While our ranch is nearing 100 plus years in the cattle industry, it has been a meticulous amount of dedication that our parents Keith and Glenda have put into expanding the ranch to what it is today. Our father has never believed in money, he has always believed in dirt and has worked his hole life to put this ranch together along with his boys. In 1998, we began raising Simmental genetics and have never stopped trying to improve our customers and our own cow herds. Sim influenced genetics flat pay you more money. It been proven what heterosis does in a cowherd. As we push forward in this new cattle age, we will continue to keep our customers wants and needs at the for front of our seedstock operation.

25 years in the seedstock industry raising and selling bulls, the life lessons these cattle have taught us are priceless. We annually offer 100 yearling pap tested bulls in Lyman Livestock's Cattlemen to Cattlemen bull sale the last Saturday in February at Producer's livestock sale barn in Salina Ut. Where we offer the best in SimAngus, Simmental and Angus genetics for our customers cowherds.

The ranch consists of three main properties where we use a three area rotation for the cows. The summer ranch is located between Montpelier Idaho & Cokeville Wyoming. We typically summer 450 pair there from late May to early November.

From there the cows are loaded on trucks and either took to late fall pasture or hauled to Monticello, UT, where we winter from December till April. We winter out in large 1,000 acre plus high, 6,500 ft, desert pastures where cows calve unassisted and are supplemented very little if any hay.

As we move from winter to spring the cows are hauled from Monticello to Yuba reservoir area in central Utah. We put the cows on lush green spring grasses to help get the bred back in April and May.

A few things to know about our cattle herd. We have been PAP testing for close to 20 years. We believe in high altitude genetics and search and use only bulls that can produce suitable pap scores on their offspring. We run our registered stock like a commercial operation no pampering the cows are wintered in tough conditions and must breed back with minimal supplemented feed. We operate around 500-600 head of momma cows. 300 registered Simmentals, 80 registered Angus, 40 registered Gelbvieh, and around 180 commercial SimAngus influenced cattle.

**HOOK'S GALILEO 210G**

Galileo calves have been topping sales all across the U.S. His combination of calving ease and growth with an outcross pedigree made him a good selection for us. Then look at the bulls he produced in this sale. They have the look, calving ease and performance we were hoping for.

### ASR AMERICAN PROUD H0301

American Proud was our purchase in 2021 from Altenburg Super Baldy Ranch. He has gone on to be a heavily used AI sire because of his combination of calving ease and growth with strong carcass traits. His progeny at Lyman Livestock have excelled in our environment and the best thing about him might be his daughters.

LYMANS AM PROUD L65 Sells as Lot 18.

### TFS OUTLAW 9790G

Outlaw was our purchase from Trinity Farms. He was a standout in his age group and he has been a standout breeding bull for us. His calves have excellent growth, fleshing ability and phenotype. He has been a very consistent producer and his daughters are making great cows.

LYMANS OUTLAW L105 Sells as Lot 25.

# A Note from the Sale Manager

Welcome to the 2024 Lyman Livestock 12th Annual Bull Sale. This is our second year working with the Lyman family and it has been a pleasure. The Lyman's work very hard at producing the best product they can for their commercial customers. Their commitment to improving the genetics of their herd to make bulls that fit their customers' environment is second to none. Every mating and Herd Bull purchase keeps in mind how the progeny is going to work in their western environment. This is something you don't always see in a seedstock producer. Many are focused on using the most popular AI sires with the biggest set of EPDs they can get without thinking about how their progeny are going to fit in their customers environment. The Lyman's make every breeding decision with you, the customer, in mind. It is people with this kind of philosophy that Allied Genetic Resources works with.

Some examples of their commitment to making cattle that work in their customers environment is PAP testing. Lyman Livestock has been committed to producing cattle that thrive at high elevations. They have been PAP testing for over a decade now and they have developed a herd that thrives at high elevations. Just look at the PAP scores on this set of bulls, very few are not suitable for high elevations. The Lyman's also make their cows work on the range just like their commercial customers. You do not see the feed truck pulling away from a big silage pile to feed the cows most of the year like a lot of seedstock operations. The mature cow herd is out wintering and calving in the desert in southern Utah as we speak. If the cows can't make it on their own and raise a calf they do not live here. These examples are what make this program so unique compared to traditional seedstock producers. These cattle flat work in our Western environment and if they can work here, they can work where feed is more abundant as well.

If you have any questions about the offering or need assistance on sale day, please reach out any of us on the Allied team. We will be glad to assist you.

Sincerely,  
 Marty Ropp, Corey Wilkins and Jared Murnin

Accomplishment has been one of the heaviest used bulls in the Angus breed and for good reason. He sires calving ease with explosive early growth and then his sons and daughters mature to be moderate frame package. His daughters are making excellent cows that are easy fleshing and very fertile. He is one of the best bulls in the breed for making cattle that work in our arid western environment.

**CIRCLE L GUS**

Gus has been a go to sire for making high performing, easy fleshing cattle that PAP test well. He has been one of our go to Angus AI sire for these reasons. His lead off son in the Angus section might be one of the best bulls we have raised to date.

# ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES

**EXPECTED PROGENY DIFFERENCES (EPDS):** EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit [www.simmental.org](http://www.simmental.org).

Listed below are the units in which ASA EPDs are expressed:

**ALL-PURPOSE INDEX (API):** Dollars per cow exposed under an all-purpose-sire scenario.

**BACK FAT (BF):** Inches of carcass backfat at 475 days.

**BIRTH WEIGHT (BW):** Pounds of birth weight.

**CALVING EASE (CE):** Percent of unassisted births when used on heifers.

**CARCASS WEIGHT (CW):** Pounds of carcass weight at 475 days.

**DOCILITY (DOC):** Percent of offspring receiving a disposition score of 1 (docile).

**MATERNAL CALVING EASE (MCE):** Percent of unassisted births in first-calving daughters.

**MILK (MLK):** Pounds of weaning weight due to milk.

**MARBLING (MARB):** Carcass marbling score at 475 days.

**MATERNAL WEANING WEIGHT (MWW):** Pounds of weaning weight due to milk and growth.

**RIBEYE AREA (REA):** Square inches of carcass ribeye at 475 days.

**TERMINAL INDEX (TI):** Dollars per cow exposed under a terminal-sire scenario.

**WEANING WEIGHT (WW):** Pounds of weaning weight.

**YEARLING WEIGHT (YW):** Pounds of yearling weight.

**YIELD GRADE (YG):** Carcass yield grade score at 475 days.

**\$ INDEXES:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

**ALL-PURPOSE INDEX (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**TERMINAL INDEX (TI):** Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

For more detailed information about EPDs and \$ indexes, visit: [www.simmental.org](http://www.simmental.org)

## THANK YOU!!!

We value and appreciate your friendship plus your support in our breeding program. Always feel free to call and visit, or ask any questions you might have.
