TERMS & CONDITIONS

Terms of the sale are cash and all cattle become property of the buyer at the time of sale. All animals will be sold in accordance with the Suggested Sale Terms and Conditions of the American Simmental Association unless other terms are stated in this catalog. All announcements made sale day take precedence over printed material in this catalog or other printed material associated with this sale. All cattle will be registered with the American Simmental Association and those papers will be transferred after the sale. Please note all EPDs will change between the time this catalog is printed and the day of the sale. All EPDs in the catalog will be current as of the day they are printed. Owners, their agents or any of the sale staff will not be held responsible for any personal injury, loss or accident while attending this sale.

LIVESTOCK INSURANCE

We cannot guarantee against injury, frost bite, disease, mismanagement, or death. Therefore, we recommend you insure your purchase. If you would like the full protection of mortality insurance, please contact Jared Mohnen with Dakota Ag Insurance at 605-999-4475.

SEMEN AND INTEREST

Selling full possession and 100% semen interest on all bulls unless otherwise noted in the sale book or announced prior to the sale. Cow Camp will retain the right to collect and/or use owner's semen on all bulls selling, for in herd use only.

BREEDING GUARANTEE

All bulls selling are guaranteed for fertility for the first breeding season. In the event a bull is deemed unsatisfactory the bull may be returned for a replacement bull of equal value or credit in the amount of the purchase price. All bulls selling have passed a complete BSE but should always be semen checked prior to turnout to ensure they are in proper breeding condition. Please contact Kent or Nolan about any issues prior to culling the animal. A signed veterinary statement may be required.

TRUCKING / FEEDING OPTIONS

- \$50 off bulls only picked up the day of the sale.
- Free delivery 300 miles to central locations on bull purchases of \$10,000 or more. Delivery past 300 miles will be prorated depending on the load. We guarantee delivery of bulls beyond 300 miles within the continental U.S. not to exceed \$400 per head. Bulls that do not qualify for free delivery can still be delivered at a reasonable cost depending on load and location.
- Delivery will begin immediately following the sale. If you cannot take delivery of your bulls, you may pick them up at the ranch at your convenience. All bulls and females kept past May 1 will be charged \$5 per head per day until picked up.

Note: Trucking of the females will be the responsibility of the buyer. We ask that you try and find alternative trucking for them and that they be picked up no later than the week following the sale.

VOLUME DISCOUNTS

- 3 bulls = 3% off
- 4 bulls = 4% off
- 5 bulls or more = 5% off

CUSTOMER SATISFACTION GUARANTEE

We have done our best to represent the sale offering as they are, however our Customer Satisfaction Guarantee protects you against getting cattle that are not what you thought they were. If you have a problem with an animal, it's our problem. We are the only ones who can fix it, so please contact us and give us a chance to help.

Welcome

Welcome to the 2nd Annual Cow Camp Turn-Out sale. We are excited to once again offer you an outstanding set of age advantaged bulls. Also included, a select set of spring born embryo transfer calves with elite genetics from the heart of our herd. Both sets of bulls have been managed as their own contemporary groups since weaning, specifically to be marketed in this sale with new sire groups that include KBHR Gunsmoke and TJ War Paint. As usual, all bulls have been parent tested and will sell with genomic enhanced EPD's. The bulls will be semen tested, ready to turn out and guaranteed for fertility for their first breeding season.

We will also be offering 80 head of Simmental and SimAngus fall bred heifers selected directly from our replacement heifer pen. These heifers sell with the service of some of the top Simmental and SimAngus bulls in the country, including our January high seller, CCR Primal 8036K. We are extremely excited for his first calf crop due this fall at Cow Camp and will offer several heifers with his service. Most of the females will sell AI bred and the balance will sell pasture exposed to AI sires as well. Those pasture sires include Bridle Bit Blackout, JC Quiet Man and IR/JLN Boomer.

We invite you to join us on April 27th, but if you can't make it, the sale will be broadcast online through Superior Livestock. We welcome all to stop by and view the cattle anytime ahead of the sale. As always, videos will be available online so be sure and visit www.cowcampbeef.com for sale updates and info.

Sincerely,
Cow Camp Ranch
The Brunner Family

Gary Schubert, Tracy Brunner, Kent Brunner, Tucker Day, Mark Brunner, Brody Bryant, Nolan Brunner, Lance Day, Kolton Aubuchon, Byron Noeth, Trent Turner, Travis Kitzmiller, Noah Brunner, Bryant Brunner, Tanner Brunner, Amanda Britton

Thank you to our great Cow Camp Crew.

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

VIEWING THE AUCTION ONLINE

The auction will be broadcast online at Bid.SuperiorLivestock.com and the pre-recorded videos will also be hosted there prior to and on sale day. You do not need an account or login just to watch the auction.

ONLINE BIDDING

Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before you will need to create an account if you wish to bid (there is no registration required just to watch the auction). Once you have created an account, request a buyer number and you will then be able to bid online with the largest and most trusted cattle marketing entity in North America. Superior's new platform allows you to see both the live stream of the auction AND the pre-recorded videos on one screen at the same time!

TURN IN BIDS OVER THE PHONE

This is Superior's suggested bidding method for anybody who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number and upon doing so you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on.

FOR HELP WITH REGISTRATION OR ANY PART OF THE BIDDING PROCESS PLEASE CALL SUPERIOR AT (800) 422-2117.

COW CAMP FEEDER CATTLE MARKETING OPTIONS

Cow Camp Inc, established in 1989, is our family-owned commercial cattle feeding operation. We have purchased and fed cattle from our bull customers for over 30 years now, and we will always continue to be active buyers of Cow Camp Genetics. There are several different feeding and marketing options as well as feed lot placement options. If you have any interest in selling or retaining interest in your calves through Cow Camp Feed Yard, please contact Tracy Brunner at (785) 965-2228.

Likewise, we have a strong relationship with Superior Livestock. If a customer has load lot capabilities, we would have an interest in assisting you with marketing your calves. We have numerous loads of calves with the Cow Camp and Allied logo marketed annually on Superior. We view it as an extremely effective avenue to market your calves with the largest buyer base across the U.S. If you have any interest in marketing calves do not hesitate contacting us.

From the Sale Manager

What a great opportunity to acquire profit driven genetics from a truly progressive seedstock operation on April 27th in Lost Springs, KS. Cow Camp has worked hard in providing customers two opportunities to source age advantage bulls while offering a wonderful set of replacement females who would be great additions to any operation.

When you source your bulls from Cow Camp you are no doubt purchasing from a high reputation program who offers genetic advancement on multiple forefronts. The program is built upon a strong maternal traits with cow longevity, fleshing ability, and udder quality at the forefront of the Brunner's mind. Likewise, adding value to customers feeder cattle is also placed at equal importance. Adequate growth and strong carcass predictors are represented in this stacked offering of bulls. Ultimately, if you are wanting your cows to last longer and your feeder cattle to create more demand on marketing day the CCR prefix will no doubt help.

As always, the bulls have been through rigorous performance testing alongside genomic information taken on every animal in the offering. The bulls were ear marked for this very sale post weaning and were developed for customer success in mind. We constantly hear rave reviews about Cow Camp bulls setting the standard for bull longevity and fertility. No outlandish bull warranty program is needed at Cow Camp as customers rarely experiences problems and if on the rare occasion you do make no mistake the Brunners will stand behind their product. Likewise, the fall bred females represents a great opportunity to acquire some of the very best performance-based females in the business. The females represent some true cutting-edge genetics and we are excited to see the impact they will make on their operation.

We hope you can join us on sale day or catch the sale on Superior Livestock. As always if we can be any assistance, please do not hesitate in reaching out to us.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

About the Bulls

DOCILITY RATING

All Bull lots will also have a Docility Rating. This is our own evaluation of the bulls and not based on their EPD. Both measurements should be considered when making a buying decision. The bulls are ranked 1-3. Anything worse than a 3 (4-6) has been culled from the herd. The definitions are as follows:

- 1 - Docile (Gentle and easily handled)
- 2 - Restless (Quieter than average, but can be stubborn)
- 3 - Nervous (Manageable, but may require a different level of management and respect when handling)

CALVING EASE STAR

All Bull lots have a Calving Ease Rating. This is a star rating system to help you select bulls based on how we believe they will calve. Always remember that the cow contributes 50% of the genetics and this should be taken into consideration when making your final mating decisions. The definitions are as follows:

- **** Can be used on virgin heifers with confidence
- *** Potential heifer bull, should be used on young cows first
- ** Acceptable calving ease, but should not be used on heifers
- * Terminal sire, should be used on mature cows only.

ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES

EXPECTED PROGENY DIFFERENCES (EPDS): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org.

Listed below are the units in which ASA EPDs are expressed:

ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

BACK FAT (BF): Inches of carcass backfat at 475 days.

BIRTH WEIGHT (BW): Pounds of birth weight.

CALVING EASE (CE): Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.

STAYABILITY (STAY): Percent of daughters remaining in the cow herd at 6 years of age.

DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).

MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.

MILK (MLK): Pounds of weaning weight due to milk.

MARBLING (MARB): Carcass marbling score at 475 days.

MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.

TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)

WEANING WEIGHT (WW): Pounds of weaning weight.

YEARLING WEIGHT (YW): Pounds of yearling weight.

YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

USING API AND TI: First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed.

For more detailed information about EPDs and \$ indexes, visit: www.simmental.org Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids - our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

A DIFFERENT APPROACH TO BULL DEVELOPMENT - GROWN SLOW TO INCREASE LONGEVITY FOR YOU

The shift in our operation to develop 18-month-old bulls has allowed us to become more creative in our bull development program, in order to deliver a better product to commercial cattlemen.

All our bulls within the sale offering come in a fall born 18-month-old package. Pre weaning our development process looks similar to how every commercial cattleman runs their cattle. We look for cost effective feedstuffs and maintain the calves at a level or nutrition which will show their genetic potential. Our fall born calves come into weaning pens in April in May and are left there for a few weeks to monitor health and we begin making culling decisions for our bull sale.

Post weaning is where our bull development is vastly different versus most. After weaning and monitoring them for a few weeks for health the bulls are then returned to forage for the summer months. They graze a variety of native forages the Flint Hills has to offer along with Triticale. When summer ends the bulls will weigh near 1,000 pounds for their yearling weight. After Labor Day the bulls return to headquarters, and we begin feeding them a more traditional bull development ration ahead of our bull sale.

Our goal has always been to sell bulls that hold up well but feel this type of development is another step to ensure longevity and added breeding ability in the bulls that you purchase here. We think you'll find the bulls sound on their feet and legs, athletic and ready to endure that first breeding season that typically is the hardest on them.

REDUCE RISK WITH AGE ADVANTAGED BULLS

There are several important and logical reasons why commercial customers should consider purchasing bulls with a few more months of age and development on their side. Some of the benefits are obvious, but some others we don't always consider.

- Older bulls have the ability to service more females in a shorter period of time than yearling bulls. Age advantaged, 18-20 month old bulls should be capable of safely settling at least 5-10 more females in their first breeding season with minimal risk over a 45 day breeding period due to greater fitness, superior average semen production and maturity.
- Over-fat bulls are an issue in this industry. A high quality, slower paced development program is possible when producing older bulls for sale. Age advantaged bulls can simply be developed more slowly and still reach target weights and marketable condition with ease. Too often bulls developed to be sold as yearlings are subjected to extra push nutritionally in order to make those same thresholds. When done improperly, the results can be reduced longevity and lifetime service because of damage to feet, soft skeletal tissues and in extreme cases even internal organs associated with excess or faulty nutrition and exaggerated growth rate.
- Certainly, older bulls lose less weight and strength during their first breeding seasons. With that in mind the risk of your bull taking a week off or quitting the process of breeding cows completely is reduced. This is especially true in the more challenging breeding environments of the southern US.
- More of the guess work is taken out when purchasing older bulls. Strengths and flaws can both be more evident to buyers with an extra 6 months of development. For example, by that age foot and leg or disposition issues will be more evident and a higher percentage of potential problem bulls should have been identified and removed from the offering.
- Sorting older bulls does not give license to buy poorer genetics just because they have more age. It is important to make sure the age advantaged bulls you are evaluating are not just the leftovers after the more valuable bulls were not marketed as yearlings and low genetic value bulls should never be an option, regardless of age.

Many producers will always favor purchasing high value, younger bulls because of the potential of an extra season of use later in life and often sellers prefer the simplicity and lower cost of producing them. Correctly developed older bulls however, simply have a greater probability of breeding success in the first season than when they were younger. Give them a try for reduced risk.

Fall Bred Heifers

When we decided to add a second sale for our customer base in 2023, we also wanted to find an avenue to market some of our registered fall bred heifers. We have been in expansion mode the last several years and this is an opportunity for buyers to source registered fall bred heifers at an auction. The females represent some of finest genetics and come from are very own replacement pen.

The heifers are genetically backed by some of the most proven and prolific genetics in the beef business. If you are in search for a couple to elevate your registered program or are looking at heifers in volume, we feel this strong offering of females will suit your needs.
