Elite Simmental and
SimAngus™ Genetics

STARBUCK, MINNESOTA

NOVEMBER 30, 2024

1:00 PM (CT)

Home of Bred for Balance

Jim Wulf Family

selling every red female on the ranch (except one lump jaw cow that we put an embryo in) we are also selling every mature cow from the AI herd. Last spring I had the pleasure of sorting through the cowherd to decide who is worthy of AI and who needs to become a recip, and as many of you know, culling is maybe one of the most satisfying tasks of a cattleman. Not because of the cows that you let go or in this case, make recips out of, the true joy in culling is seeing the results of what you are left with in a particular group, and I am here to tell you, the group of AI cows we were left with was such a joy to drive through and breed on! The hoof and udder quality, maternal ability and genetic improvement these females offer is second to none.

We have built this herd around breeding principles that have stood the test of time with the main philosophy being "Bred for Balance". To me, Bred for Balance is not taking any one thing to an extreme but diligently moving every trait forward, whether it be a quantifiable trait represented as an EPD or a phenotypic trait selected through diligent genetic selection and culling. We also understand that the beef industry requires a multitude of different types of cattle, based on everyone's operational goals and scenarios. The process of creating maternal and terminal lines is already becoming more and more evident not only within our breeding program but also in the industry. My goal moving forward is to take that concept to the next level by producing cattle that fit into those boxes even more distinctly. For someone that buys his replacement females and ships his whole calf crop to the feedyard, a bull that maximizes growth and carcass traits through breed leading TI is paramount. For others who focus on raising and selling quality replacements, STAYABILITY and overall genetic balance are key. With today's genomic technologies provide thought the American Simmental Association, Allied Genetic Resources and Top Genomics, there has never been a more exciting time to be in the seedstock business with opportunities all around us to improve the efficiency and profitability of raising BEEF, the best protein source in the world.

Often, the word "Dispersal" is equated to going out of business so I would like to take this opportunity to reassure you this is not the case. Our annual Bred for Balance sale is planned once again for the second Friday in February, which lands on the 14th in 2025. We look forward to working with you to make genetic selections that are right for your operation in the coming months and for years to come.

Travis Wulf and the entire Jim Wulf Family

COST SHARE DELIVERY OPTIONS

- To help with the often-complicated process of moving registered cattle around the United States, we are offering the option to cost share a ride for your purchases.
- If you so choose, by adding the set delivery fee to your invoice at check out, we will then take on all responsibility of lining up and paying for your cattle to be delivered.
- You are more than welcome to haul the animals yourself or line up your own trucking arrangements with no additional costs from us. At that point, the buyer is responsible for lining up and paying for delivery.
- Please see the map on page 3 for the set rates by state as well as the volume discounts that are available!

HERD HEALTH

We engage in an aggressive Johnes testing protocol with all cows on this sale testing negative through a blood serum sample collected in August. Our cow herd is on a yearly prebreeding vaccination program of Vision 7 Somnus with Spur and Bovishield Gold FP5 L5. All sale cattle were dewormed prior to the sale with Safe Guard feed through pellets. Ultrasound preg check occurred in August by Dr. Jason Anderson to have an accurate estimated due date and know if they are bred AI or by the bull. Dr. Aaron Rokey checked them once again in November to confirm they maintained a healthy, viable pregnancy. Health papers will be available for shipment within the United States and Canada upon completion of any required testing.

GENETIC DEFECTS

All animals selling are free of Arthrogyrosis Multiplex (AM), Developmental Duplication (DD), Neuropathic Hydrocephalus (NH) and Contractural Arachnodactyl (CA) unless otherwise noted in the footnotes.

View videos, register to bid and watch the sale live online.

Welcome to the Clear Springs Cattle Company Mature Cowherd & Red Dispersal! What an incredible line up of females the Wulf family has assembled for your appraisal on November 30.

Detail oriented with the pursuit of genetic advancement has been the driving factors that has built the Wulf herd as one of the premier programs across the country. Countless herd sires have been sourced out of the CLRS herd through the Bred for Balance Bull Sale making an immense impact on not only the Simmental breed but the beef business as a whole. The extra effort, consistency of making the right choices, and being early adopters of technology has been the cornerstone pieces of the Wulf program. One will be hard pressed to find an offering with this type of genetic horsepower in this volume of numbers.

Buyers have the chance of purchasing the very front end of the mature cows and every red female on Clear Springs Cattle Company place. Nothing is being held back from buyers making this a once in a lifetime opportunity. Study the offering closely and one will come up with same conclusion. The females in the sale have simply been producers! Numerous siblings and dams of the most impactful genetics in the business can be found from cover to cover in this great offering of cattle.

We hope you can make arrangements to join us on November 30 in Starbuck, MN. The depth of quality of this great event is truly unmatched. If you can not join us sale day be sure to view the sale at online at our friends DV Auction. As always, if you have any questions about the sale please do not hesitate in reaching out to us.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

- When it came time to choose who to lead off this book with, 978 was an easy choice! All along I have said one reason to have this sale now is so we can offer to the public these full sisters to Guardian in the prime of their life. Goodwill has done her job here at Clear Springs being the dam of last year's lot 1 bull who sold to Schooley Cattle in IA as a premier purebred heifer bull. The mating of 231A on 978 has worked very well producing our up-and-coming donor Kordova 248K as a natural calf with many more full sibs to come after flushing her that way again. Her elite genomic values combined with her productive structure, awesome hoof, and tight udder make 978 one of the most elite Purebred females in the Simmental breed, ready to take your program to a new level.

Bred to HA AMPLITUDE 9J (3875162). Estimated calving date 3/4/2025.

- Ever since these first two females were calves, I have gone back and forth on which one is better. That question is still not answered! Both have done an outstanding job for us with 967 passing on a little more punch and power. Her flush to Essential worked well producing a son who went to work for Chris Logan and Steve Williams in Alabama. She has both a Black Hawk and an Eagle daughter back in the herd and her 2023 bull was a sale highlight by Original. Grandious has all the pieces to be a bull raising machine, topped off by her 115 average weaning weight ratio on her first 4 calves!

CLRS 967L || SON OF LOT 2.

CLRS 937K || SON OF LOT 2.

G MODEL COWS

- There are many highlights to this truly special female sale, one of those being it may be the largest offering of mature Beacon daughters ever! If you haven't heard, the Beacon cows do a tremendous job, and Gypsum fits that mold well. Her first calf, 112, is a Firesteel daughter that raised a whale of a Kodiak bull this year. Then came a couple really attractive Affirmed sons, one went to Jake Bryce and the other unfortunately was injured. Her Haggard daughter from this year is a true stand out in the replacement heifers. 981 is real easy fleshing, maintains a BCS of 6 or 7 through out the year while still boosting an average WW ratio of 107 on 4 calves.

CLRS GLORIOUS 902G || SELLS AS LOT 4.

- 902 is great at producing bulls for Nebraska and Colorado, lol. Her first son by Rainfall went to Craig Uden, next was a Homeland to John Raftopoulos, then an Original to Tyler Pieper. This year she finally gave us a heifer, an Original that will for sure be staying in the herd! With a positive average ratio for WW (104), YW (106), IMF (106), and REA (109), her cow card is stacking up to be a great one. Bred to the up-and-coming outcross sire Summit, I really think this mating will work well on her.

CLRS 902L || SON OF LOT 4.

- Built with a ton of power and muscle shape, this is what a Purebred Simmental female should look like! All while maintaining added marbling and calving ease. Garia is another Beacon daughter with an outstanding cow card, average ratios of 93 for BW, 101 for WW, 102 for YW, 102 for IMF and 103 for REA, all with a 364 day calving interval. Consistently producing calves that GE well no matter what she is bred to, with her first daughter being an outstanding Flat Iron cow that is back in the herd.

- Beacon makes great purebreds but maybe even better are his halfblood daughters! 944 goes back to an Angus cow we bought from Wulf Cattle in the very beginning of our time here in Starbuck. That 11-year-old Angus cow finally went to town this year but still had the most perfect udder you have ever seen. Gracie has followed suit, maintaining a great udder and continues to stick AI. Her beautiful structure and type are proven by her 50K daughter that made it into the Fab 5 and was shown around Minnesota by the Kutney family.

CLRS GRACIE 944G || SELLS AS LOT 6.

CLRS 249K || DAUGHTER OF LOT 6.

IT'S A GREAT TIME TO BE IN THE CATTLE BUSINESS!.....
 But isn't it always! It is an honor to share these cows and their story with you. Raising cattle needs to be a business that can provide a living for your family, but it is so much more than that! It's a wonderful lifestyle for raising a family and driving through cows on grass on a summer evening is hard to beat.

Bred to KBHR KEYNOTE K229 (4104347). Estimated calving date 2/10/2025.

- Diplomat makes beautifully constructed, fault free females that take feet and udder quality to a new level. 941 holds true to her sire's stereotypes and has a rare level of marbling to go with it. Her mating to Keynote should work well as his first calf crop is showing a lot of consistency with a clean and muscular look.

- 936 is the epitome of an ideal beef cow. Moderate in her size with the milk, mothering ability, and feet and udder quality to be a problem free, long-lasting female that produces calves with added carcass merit. Bred to power bulls like Original, Gehenna will get the job done and be a profitable addition to any operation.

CLRS GEHENNA 936G || SELLS AS LOT 9.

- This is the dam of Jay Leno, a Guardian son who absolutely rocked his performance test. Her next two heifer calves have done the same earning her an average IMF ratio of 148 on 3 calves!!!! 957 may be one of the most elite proven carcass females in the breed yet maintains a near perfect udder and is coming with her fifth AI calf in a row this year. Her second calf, an Essential daughter is back in the herd and did an outstanding job with her first calf as well.

- It is no secret that Dividend makes some of the most attractive, sound uddered females the Simmental breed has ever seen! Add in the CE and STAY provided but the 304 cow on the bottom side of her pedigree and you get a maternal masterpiece. 906 is ultra fertile, easy fleshing and an overall problem free female.

HISTORY OF CLEAR SPRINGS CATTLE COMPANY

Jim and Twyla Wulf married in 1986 and had three sons, Justin, Travis and Brady. Until the fall of 2011, Jim worked with 3 of his brothers on the operation the late Leonard Wulf began in 1949. Here they raised registered Limousin cattle, farmed row crops and had an extensive cattle feeding operation. On Memorial Day of 2011, Jim and Twyla took a holiday drive to see Mark and Mary Kay Fredrickson as they had heard they were looking to sell their ranch near Starbuck, MN. Through countless hours of prayer, Jim and Twyla were led to take a leap of faith and venture out on their own. Travis joined them when he got home from building grain bins in Missouri that summer and Brady followed a few years later after college and work experience at CR Koehl and Sons. As Jim had been the cowherd manager at Wulf Limousin for many years, it was clear that he wanted to raise cattle with exceptional maternal value in his new operation. Simmental and SimAngus came to mind, and immediately after, Mr. Tom Hook. Jim grew up showing cattle with Tom at the MN State Fair and had the utmost respect for his integrity and industry knowledge. Today, thanks to a long list of mentors, neighbors and friends, Clear Springs has built one of the premier Simmental herds in the United States.

- Wow, what an opportunity here. Homeland's full sister that absolutely crushes her genomic predictions with an elite level of maternal and carcass quality. Her first natural calf is Inspired, and his calves are developing into one of the top sire groups here at Clear Springs. We flushed her to Essential with a ton of success, producing a \$20,000 son going to Stavicks, who unfortunately injured his testicles. We kept Kobra back for ourselves and love what he is doing as far as structural integrity and CE to YW spread. Gibbs' in Alabama bought some of the embryos and are flushing a Hanoi X Essential daughter, and her calf by Kangaroo this year is sure to be a sale highlight. 0110 is a unique breeding piece who can be bred to the biggest, most powerful bulls in the breed to create true genomic outliers and the Limitless calf she is carrying has as much potential as any!

H MODEL COWS

- Another full sister to Homeland, 0111 possesses all the good things about the 231A x 317 mating, exceptional balance front to back with superb hoof quality and an extremely attractive head and neck. Her first calf was a Firesteel daughter that was featured in the 2023 Bred for Balance sale as a bred heifer and went to Chuck Buus in SD. Her Gunsmoke bull last year and Essential bull this year are both solid, well built, attractive calves. The potency of her dam has been tremendous, not only in our herd but the entire Simmental breed.

- Beautiful Baldy Simmental female, that might be all I need to say about Hesi! She is a full sister to the extremely popular Fab 5 member residing at Iron Creek Cattle Company in IA. Flushed as a virgin heifer to Guardian, 4 sons went across the country to some outstanding cattlemen. I know I am letting her go before realizing her full potential but am confident her new owner will, no matter how she is mated. The calf she is carrying by Original has a high probability of being another perfect baldy, as passed down by her great grandmother the infamous 49Y, who is still working in the McDonald and Gerloff herds in MO. The dams in this pedigree have all had long and productive careers with hoof and udder quality to boot and are some of the very best from my mentor Mr. Tom Hook.

Bred to CLRS KING JAMES 616K (4031931). Estimated calving date 2/1/2025.

- In her young carrier, 096 has quickly become one of the most prolific bull makers here at Clear Springs! Her first calf, a Genetic Force sold to long time bull customer Diamond Peak. Then last year her Triple Crown son was a highlight lot going to Travis Standley in MT. Now in 2024, she raised a phenotypic rock star sired by King James that will be very popular come February. Some cows just have the IT factor, and Hebrew is obviously one of them! Her outcross pedigree, balanced EPDs, hetero black status, and superb feet, udder and structure make her a big-time candidate to improve either the black or red Simmental population.

CLRS 096L || SON OF LOT 20.

CLRS 096K || SON OF LOT 20.

H MODEL COWS

- This powerful 231A daughter in poised to make high TI cattle with a tremendous look. Her Guardian bull last year sold for \$10,000 to Kelly Froelich in ND. 060 is long made and flexible with an excellent disposition. Her added capacity has lent itself well to her fertility as she continues to move herself earlier in the calving season every year with a 359 day calving interval. If you are looking for bull makers, the 231A daughters sure fit the bill, they all have enough milk to raise a solid calf, and those calves usually go on to explode even further after weaning.

- Another 231A daughter that has raised an outstanding Guardian son working for Blake Huntley in MT. Guardian/Beacon on 231A has been an excellent combination for us and many other breeders across the county and her Keynote heifer from this year is showing that Keynote will follow suit and work well on them too. 015's granddam was one of our original cows from Steve Eichacker and lasted well into her teens maintaining sound feet and a great udder. The added performance in Hop Scotch makes her a great candidate for those breeders looking to produce performance bulls.

- This incredibly balanced full sister to Herdbook has been a favorite of mine since she was a young heifer. Her structural design is impeccable and that follows through to her overall physical balance as well. Her dam, a member of the infamous Top Grade x 87X flush, consistently makes sound uddered, great footed, fertile females that still have the frame and growth to be profitable cows in a seedstock scenario. Hummus has 2 embryo Beacon daughters back in the herd and both did a phenomenal job with their first calf raising a pair of Kodiak daughters that are stellar for both phenotype and genotype. 0129 may just be the quintessential cow to describe what Bred for Balance means!

Bred to SCHOOLEY LAZARUS 430L (4256894). Estimated calving date 2/18/2025.

- Harmonica is an easy fleshing Beacon daughter whose first calf weaned off at 697 and sold to Ervin Mueller here in MN. Now as a 4 year old she only weighs 1275 herself and maintains a 100 WW ratio. Add that on top of her dominating carcass value and her mating to our pick from last years bull sale season, Schooley Lazarus 430L, who we think is the perfect mating for a highly maternal, low birth weight female like 006.

The planned matings in this sale represents an average \$API of 175 and \$TI of 98!

Genetic progress in a balanced and attractive package!

- With another direct daughter of Always Xcellent, I will finish my story. 87X was a female we purchased from Tom under the unfortunate circumstance that she aborted from an infection. One way to capture her genetic value was to flush her. Tom helped us mate her to Top Grade for her first flush and now, anything with Guardian, Homeland, Herdbook, the great WS Ms Sugar C4 and countless others in their pedigree all trace back to that impactful mating.

Bred to HA AMPLITUDE 9J (3875162). Estimated calving date 3/12/2025.

- Big frame, stout made Frontline daughter that has great CE to YW spread. 0121 is a beautiful cow with a clean head and neck, extra center body and attractive structure. We think a lot of the Amplitude bull and this is exactly the type of cow I think he will great on.

Bred to CLRS JAY LENO 957J (3874303). Estimated calving date 4/6/2025.

- Here is another opportunity to own a direct daughter of Sarita 4S, who we purchased from Tom for her exemplification of "Bred for Balance" back in 2013 when he had this same type of sale. She is a stout made, muscular female that knocks it out of the park with her calves each year with a 108 average ratio for YW on her first two calves.

CLRS HARPER 0302H || SELLS AS LOT 46.

Looking forward to a relaxing weekend away? Check out our rental house on Air BnB or VRBO. Located in the beautiful Glacial Hills, this home that sleeps 23 and is a short distance from Glacial Lakes State Park, Lake Minnewaska and the quaint little town of Starbuck with multiple dining and entertainment options. Oh, and did I mention, the house sits right here on our ranch, and we would be happy to show you around if you come to stay with us.

J MODEL COWS

- Juno is a member of the Firesteel x 316 flush that produced 5 females that are back in our herd as well as CLRS Jericho 336J who works for Eichacker Simmentals in SD. She is a beautiful female with a perfect udder, incredible structural correctness and elegant head and neck. The hoof quality in the 316 cow family is second to none with Firesteel adding his great marbling ability and phenotypic excellence. We flushed 1115 to LCDR Anthem and have 3 outstanding bulls to offer in February along with her Guardian natural calf who is a standout as well.

CLRS JINGLE BELLS 1103J || SELLS AS LOT 48.

- This young Beacon daughter out of the beautiful lot 83 female has a ton of potential with her added volume, muscle expression and correctness. Her first calf, a Cochise heifer, was a highlight as an open in the 2024 Bred for Balance sale selling to Jay Covington in TN. This year's Homeland heifer calf has turned out nice as well. Her mating to Lazarus bodes well for adding growth and frame to this maternally made female.

- Eclipse is one of the greatest sires the breed has seen for downright sleep all night calving ease who still has plenty of growth. His daughters pass that along well and have tremendous maternal calving ease too. 167 has done a whale of a job with her first two calves, adding massive volume and flexibility to both her Guardian heifer last year and Judgment bull this year.

- Kassandra is a beautiful Purebred female with her tremendous topline, clean head and neck and added muscle expression. Her dam stems from a flush of females by the ultra-maternal Austin bull back on the legendary 4S cow. We have had many cows from that flush and they are some of the most fault free females we have had.

Every female in this sale has Genomic Enhanced EPDs, is known for Color and Polled status and is free of all lethal genetic defects there are currently tests for. Buying at Clear Springs means you know exactly what you are getting! Cows that the homework is done on and are ready to go home and work for you.

- If you are looking for power cows that will knock it out of the park raising bulls, look no further! Kiera is a big frame, stout featured female with a truly outstanding disposition. Her full sister raised a Keynote bull calf this year that I am confident will be a sale feature in February and right now is on my short list of bulls to use back in our herd.

- Lady Luck was an obvious choice to lead off the red division. An own daughter of the \$75,000 CLRS Genome 979G donor female and out of the ever-popular Rockin H Captivate bull, 3158 is soft in her design with excellent feet and legs under her. Her EPDs are a dream as well capturing the marbling from her dam side and power from her sire. Red females like this don't become available all that often so be sure not to miss this opportunity to own one that you can build a herd around!

Bred to KBHR CHARGER K102 (4104220). Estimated calving date 1/20/2025.

CLRS LEMON DROP 320L || SELLS AS LOT 61.

- I was excited when Lemon Drop came out of her hetero black dam as a red, but now that means I must sell her. She is an eye-catching female with power, added frame and an extremely balanced, no-holes EPD profile. Backed by the 200 cow family that litters this catalog and has proven to be one of the most productive lines here at Clear Springs.

RED BRED HEIFERS

- We purchased this female as an embryo out of the structurally dominate Red Velvet female from Kellers. The buy has proven to be well worth it as this female's full brother was the top selling red bull in last year's Bred for Balance sale at \$10,000 going to long time red enthusiast Judy Loonan of IA. She is stout in her features yet carries excellent CE and carcass genetics.

CLRS LYNELLE 3314L || SELLS AS LOT 62.

CLRS LENORA 324L || SELLS AS LOT 63.

- This class of 4 red bred heifers may be the coolest set of red females we have ever bred on. I would love to have a judging team practice on them and see how many ways they place it as all four are great heifers in their own way. Lenora brings impeccable softness and flexibility to the table and has added volume through the center portion of her body.

- Boy oh boy, if you haven't heard that the Xpectation females may be the most maternal red Simmentals cows of our generation, you may have been living under a rock. 915 is so deep bodied, bold ribbed and muscular yet still feminine in her make up. Her son by Direct Impact sold to Jordan Schlenker in ND and her powerful Jefferson heifer in this sale is as well built as any. Her added marbling is backed up by an average IMF ratio of 113 on her first three calves.

- Here is a full sister to lot 64. Same great maternal genetics with a bit more size and frame. Felicity has been great at throwing females with her extremely sound made ES Statement daughter back in the herd and two other heifer calves selling to Health Klien in KS and Samuel Danielson in MN. Her Honor Guard in this sale is an absolute peach of a heifer as well. Note that 826 is missing one teat but it has not affected her production at all.

CLRS FELICITY 826F || SELLS AS LOT 65.

CLRS 2161K || DAUGHTER OF LOT 65.

RED COWS

- One of the most prolific cow records as far as progeny sold, not only among the reds but throughout the sale. Her first calf is an Imperial daughter that sold as a bred cow to Curt and Susan Russell of CO, then my neighbor Jason Lee pried her Delegate bull out of my hands just after weaning because he loved him that much. Then Diana Christopherson from WI fell in love with her All American daughter and took her home and last years calf, a Captivate bull, went to Travis Standley in MT. This year she raised our only red male calf of the year, and he already sold to Dusty Buckman in ND. Needless to say, her calves are easy to sell!!

- One of the more powerful red females in the offering with excellent muscle expression. Being a direct daughter of All Aboard, I understand the risk involved with the unsolved mystery of Hydrops. That said, she is here to sell and at a certain price she will be well worth buying!

- The OG! For the older generations in the crowd, ask your kids or grandkids what that is, they might know ?? Zinnia is the very first Simmental female ever born to our family and carries a special place in our hearts. Not only has she been producing for all these years, but she also has some pretty amazing cows that call her "mom". Lot 108, the mother of Dividend and lot 68, the extremely productive Prime Time to name a few.

Sells open.

- Starting off the open heifers, we have ourselves a truly unique breeding piece in Majestic! Sired by the genomic and performance outlier Jay Leno and back to the maternally great lot 67, her EPDs speak for themselves. She is a calm, easy fleshing heifer that is balanced in her make up with added muscle expression and volume.

Bred to CLRS JAY LENO 9571 (3874303). Estimated calving date 4/11/2025.

- Here is a tank of a brood cow from the legendary Hook's Crystal 1C, the dam of the current #1 bull in the breed, Eagle. She is also a full sister to Hook's Gabriella 30G, who sold to Schooley Cattle Co and produced the exciting new sire Judgment. Flourish has massive rib volume with a flexible structure and raised the calving ease and maternal specialist CLRS Hero 8086H owned by All Beef, Kellers and Gateway. Angus bulls Hometown and Comstock have worked on her as well. With her excellent hoof quality, teat size and fleshing ability, she should have many more years of production left in her.

CLRS 8086H || SON OF LOT 81.

CLRS 8086L || SON OF LOT 81.

F MODEL COWS

- Fairy Tale has added tremendous phenotype to every one of her calves. She is the dam of the popular Homeland heifer from the 2023 Fab 5 that went to Michael Hayman in GA. Her Eagle bull the year before was a standout as well as her Herdbook heifer last year and another Homeland heifer this year. She has raised them all to an average WW ratio of 106 on a 365 day calving interval and is bred up early again to Homeland!

- Ellis Island was the first Beacon female born her at Clear Springs and has made a name for herself as one of the very best! Her \$20,000 Hometown daughter Jemima is a top donor for All Beef and Trails End Cattle, and her Hometown bulls the next two years sold for an average of \$13,750. Her balanced EPD profile along with her soft made, sound structured design make her a unique Purebred female that needs to be propagated more! 715 carries the fleshing ability and hoof quality all the way through from her granddam for Steve Eichacker who lasted to the age of 15.

CLRS JEMIMA 144J || DAUGHTER OF LOT 92.

CLRS 715K || SON OF LOT 92.

E MODEL COWS

- Jet Black, the phenotypic superstar owned by Levi Elliot of ND, this is his mother. It took us around 15 seconds to get her picture, a testament to her beautiful, feminine structure, head and neck. An own daughter of the legend himself, Shear Force, Embria embodies the phenomenal hoof, udder and maternal strength that Simmental provides to the industry. I love the King James mating on her for it's complementarity. She could be mated to a dense made, power Angus bull for a striking halfblood as well.

- This broody Conquest daughter embodies how a great cow should look. Perfect udder, swooping rib cage, clean fronted and feminine in her head. When she was a calf, she got left out on a Wildlife and it took about a week to find her in the cattails. When we finally did, she was not doing well with maggots all down her topline. Thankfully she made a full recovering and then some.

CLRS 387L || DAUGHTER OF LOT 94.

- Big time performance in this Rubicon daughter with out sacrificing maternal value. She has so much rib shape and volume and is flexible in her joints. We purchased the entire 2017 heifer crop from KMJ when they dispersed which has proven to be a great investment.

- A unique, 3/8 SM female with the red gene and a tremendous look! Her added marbling is proven by her 111 average IMF ratio on her calves. She is missing one teat due to mastitis; we have learned the best way to treat for those is not fight it and just cut it off. Our neighbor Peder, the best dairyman in the nation can attest that a cow with three quarters sees almost no drop in milk production. This cow's calves have been extremely marketable as well as she passes on her great look, marbling and added performance every time.

- Desi, the beautiful baldy Bounty daughter that has been mentioned multiple times in this catalog already as the dam of the popular lot 19 female and half sister to lot 102. She also raised Hook's Ginger 87G, the Fab 5 member that sold to Iron Creek Cattle Co in IA a few years back. With nice small teats and a perfect hoof, this heavy muscled, maternally dominant female adds a tremendous look and structure to all her calves. Bred to the big time spread bull, Leopold, she could easily pay for herself with the calf she is carrying.

HOOK'S DESI 80D || SELLS AS LOT 104.

CLRS 87G || DAUGHTER OF LOT 104.

- Broadway has quietly gained a reputation for making extremely productive and profitable seedstock cows. Diana has all the frame and power in the world to make big, stout, rugged herd sires. Her hooves are in perfect condition and her udder is nice and tight for her age. She raised a TJ Darkhorse son that sold to Maplecrest Farms in OH and her Comstock heifer this year is an absolute doll.

- Most of the cows in this sale are members of the elite AI group that we are dispersing. There are a few females that I put an embryo in but did not stick and were bred by the clean up bull. Still, to make the sale, they needed to have a sound utter and good feet with plenty of productive life left in them.

HOOK'S CINDER 24C || SELLS AS LOT 107.

PROVEN PRODUCERS

- Here is the dam of the phenotype superstar CLRS Dividend 405D! Her unique pedigree and tremendous production record make her a favorite cow around here. After she raised Dividend and E Trade, a Beacon son who sold to Wulf Cattle, she went on to give us a long string of heifer calves. Her Heisman and Genesis daughters are easy to find for their added volume and ideal structure. The longevity and docility in this cow family is unparalleled and most people, when they see Bonnia, cannot believe she is a ten-year-old cow!

- Annaka is in a very elite group of cows as she is coming with her 11th AI sired calf in a row and all her previous calves, except one due to injury, have been marketed or retained as breeding stock. She boosts an average WW ratio of 111 on 10 calves all while maintaining a perfect hoof. Her dam, 6U, is also the mother of Hook's Crystal 1C, the dam of Eagle. She has sons and daughters working in herds across this country and her mating to Keynote produced a tremendous heifer calf this year that is right at the top of our replacement pen.

- Zurich is a testament to the maternal greatness that Tom bred into his herd, and we continue to strive for here at Clear Springs! Coming with her 13th AI sired calf with an average WW ratio of 110, 18Z has entered the realm of elite status. She still has nearly perfect udder and feet, with massive volume and structural integrity. Study her makeup as she explains a lot about what a highly productive, long lasting beef cow should look like. Her bull calves sell well year in and year out and her daughters make cows that follow in her suit. We maybe should have flushed this female as cows like this don't come around every day!

HOOK'S 21G || SON OF LOT 110.
