BRED FEMALE SALE

# Great Lakes Beef Connection

FALL EDITION

11.23.2024

5075 Clarabella Road, Clare, Michigan 48617 • 1:00 pm • JC Simmentals Sale Facility

## SCHEDULE OF EVENTS

Friday, November 22

Females Available for viewing

Saturday, November 23

8:00 AM Females available for viewing

12:00 PM Complimentary Lunch

1:00PM Sale Begins

## AUCTIONEER

Col. Jimmy Lambert 231.920.8263

## SALE DAY PHONES

John Miller 989.429.2834

Marty Ropp 406.581.7835

Steve Oman 989.429.3600

Corey Wilkins 256.590.2487

Brian Harris 517.749.4117

Andy Salinas 231.245.6750

## TRUCKING

The GLBC will make every effort possible for low cost trucking. Load out will be available immediately following the sale. We ask if females have to remain at GLBC please make plans of pick up within 10 days of purchase.

## ANNOUNCEMENTS & SUPPLEMENTAL INFORMATION

All announcements made on the sale block will take precedence over printed material. Sale Orders and Penning Charts will be given to prospective buyers.

## HOTEL ACCOMMODATIONS

Doherty Hotel 989.386.3441

## REGISTRATION & UPDATED EPDS

All cattle will be registered with the American Simmental Association. Please note EPDS may change from the time the sale book is printed until the registration papers are transferred. EPDS printed in the catalog were pulled from IGS on October 22, 2024.

## HERD HEALTH

Every animal in J/C Simmentals breeding herd is properly vaccinated and boosted annually for IBR, BVD, BRSV, PI3, 7-Way Clostridium, Pasteurella, Haemophilus Somnus. All Females are vaccinated for Brucellosis and every calf born on the farm each year is tested for BVD-PI.

**Our cow herd is tested annually for Johne's Disease and Leukosis.**

All animals on our farm are treated annually with Long Range and with Safe-Guard or Valbazen drench.

## Volume Discounts

# Great Lakes Beef Connection

Welcome to our Fifth Annual Female Sale.

We want to thank each of you for taking the time to learn about our operation and take a deeper look at the cattle we have to offer at this sale. We work hard to provide our customers with cutting edge genetics that excel in all segments of the beef industry. To us, that means breeding for growth, fertility, calving ease, maternal, and carcass traits. These traits should come in a functional package, with good feet, udders, and disposition, without giving up style and eye appeal. We truly believe through focused selection; we can have it all.

All females selling are a product of Right Mate, with genomic enhanced EPDs. Physically all females are evaluated critically for disposition, feet and leg structure, udder quality, fleshing ability and eye appeal. We guarantee the females will work in any environment and will offer longevity and productivity for years to come.

The future in the cattle business looks very positive! With low beef cow numbers and demand for high quality beef, we have seen record prices in 2024. The Sale format will be set up as a video sale and all females will sell individually by lot. Please feel free to come by and view the females any time prior to the sale. THANK YOU for your past purchases and your friendship, feel free to contact John or any other numbers listed in the catalog. We appreciate your interest in our program and hope to see you at the ranch on November 23.

Blessings,  
John, Andy, Brian, Steve and our families

## REDHILL COUNTRYMAN 81J

*Reference Sire* We are selling the entire sire group of our Redhill Countryman daughters to feature the 2024 Great Lakes Beef Connection Female Sale. The daughters are absolutely beautiful in their phenotype. Easy Fleshing, sensible size, and power is the staple of the Countryman daughters. Genetically they offer a balance of genetic excellence across the board. Countryman was our pick of the Redhill Farm sale offering in 2022 and was the high selling bull in their sale. We wanted to add some 231A genetics and not worry about the big birth weight gene. We have also decided not to market semen so that J/C Simmentals and Redhill had the only calves for the first two years.

Sire of Lots 1-11.

386L Sells as Lot 1.

## HOOK'S EAGLE 6E *Reference Sire*

A bull that needs no introduction in the beef business is Eagle. The cattle are moderate, dense, and easy fleshing. Eagle is a rare find reducing the mature frame size of cattle while increasing the weight of the offspring is a hard thing to do. The wet females we have in our herd are some of our favorites and we are certain this large sire group will add value!

Sire of Lots 19-23.

**ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES**

EXPECTED PROGENY DIFFERENCES (EPDS): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit [www.simmental.org](http://www.simmental.org).

Listed below are the units in which ASA EPDs are expressed:

- ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario.
- BACK FAT (BF): Inches of carcass backfat at 475 days.
- BIRTH WEIGHT (BW): Pounds of birth weight.
- CALVING EASE (CE): Percent of unassisted births when used on heifers.
- CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.
- DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).
- MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.
- MILK (MLK): Pounds of weaning weight due to milk.
- MARBLING (MARB): Carcass marbling score at 475 days.
- MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.
- RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.
- TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario.
- WEANING WEIGHT (WW): Pounds of weaning weight.
- YEARLING WEIGHT (YW): Pounds of yearling weight.
- YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

For more detailed information about EPDs and \$indexes, visit: [www.simmental.org](http://www.simmental.org)

PE to REDHILL BURLEY (3953952). Confirmed safe to calve and due 2/26.

HOOK'S BEACON 56B Son of Lot 70.

## Proven Donor

Here is a great opportunity in purchasing one of the highest producing donor females in the Simmental business in Hook's 41Z. Along with producing one of the most used sires this decade in Hook's Beacon, 41Z has been producing highly marketable offspring who come in both a red and black package. The cattle come with an abundance of power, length and genetic potency. 41Z has become a reliable producer for embryos over the last years and her natural Galant son in 2024 was one of our high selling bulls. We feel this great producing female still has years of production left and we are excited to see what she will do for your program.

D29 Sells as Lot 71.

Here is a pair of Zeus daughters we partnered with All Beef with to create some really different purebred genetics in our program. We have been really pleased with the results and look for their progeny to headline our 2025 Great Lakes Beef Connection Bull Sale. Physically the females check all the boxes being bold bodied, great footed, and wonderful for udder quality. If you are looking to mass produce some really fresh pedigrees here is your chance.
