The Darby Line Family

Welcome to the 35th Annual Triangle J Ranch Bull Sale! A big thank you to all our past customers that have been loyal to our program. It is an honor to serve so many commercial cattlemen and watch your success selling quality genetics. Sim/Angus genetics are doing it all--everything you could ask for starting with manageable birth weights and finishing with high quality carcasses, and not overlooking anything in between.

The offering has something for everyone, from high quality growth bulls to heifer bulls. Our bulls have growth and power, without sacrificing phenotype and EPDs. Choose from numerous half-brothers and flushmate brothers to build consistency in your calf crop. We want new customers to feel confident buying bulls that have years of accurate information behind them. Accurate information leads to true EPDs and more profitable feeder calves.

We are again offering the largest number of bulls to date, but most importantly we are here to improve quality. Our largest selection of embryo calves ever will be available. Unique sire groups and pedigrees have been added to the gene pool to produce some of the most unique herd sires to date.

A huge thank you to all our employees that spend countless hours gathering data needed to provide you the most accurate information. Feel free to study the videos available on DVAuction and stop by anytime to look at the offering. Most importantly, I hope you will give me a call ahead of the sale. The most important thing to me is to go over the offering with everyone to ensure we get you the bulls that will be the best for your herd.

Thank you to all our past customers and we can't wait to make new friends the last Sunday in January.

Sincerely,
Darby Line
308-627-5085

Welcome to the 2025 Triangle J Bull Sale. What an incredible offering of 300 elite SimAngus and Simmental bulls the Line family will have for your appraisal on January 26.

As we begin the new year, one can only be optimistic about our country and the future of the cattle business. Strong prices are predicted throughout the year and cattle futures are predicted to remain strong into 2026. All classes of cattle are pushing price points never seen before and the historic run of cattle prices looks to last far longer than the 2014 and 2015 price spike. Prosperous times for cow calf producers are highly welcomed, and we hope they remain that way for years to come.

The Triangle J program was built on the simplicity of producing the very best profit-oriented SimAngus and Simmental bulls for commercial producers. Over the years the program has seen a tremendous amount of success in producing some of the very best genetics in the beef business. The TJ prefix has an influence on numerous herds in the seedstock business and has become very common throughout numerous sire directories. Producing the best is always the goal for the Line family, but the goals of serving the commercial cowman has always remained at the forefront of their breeding principles. The Triangle J program has been ramping up their customer service and has become more involved in marketing customer feeder cattle and TJ influenced bred heifers. From customer service and genetic standpoint, you will find no better operation than Triangle J Ranch.

As always producers will find a large selection of highly proven sire groups along with a great selection of cutting-edge sires. The robust embryo program continues to be a staple of the TJ program and propagates the best cow families of the operation. Accurate data and a magnitude of genomic testing has been conducted on every bull in the offering. Going through the large quantity of bulls one can only get excited about the quality and uniformity of this incredible sale.

We hope you can join us January 26 in Miller, NE. As always if you need any assistance, please do not hesitate to reaching out.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

REGISTRATION AND TRANSFER

Registration certificates will be transferred to buyers upon request at the seller's expense. When making settlement, buyers must give complete written name and address information for making transfers.

SEMEN INTEREST

Retaining 1/2 semen interest on bulls selling for less than \$20,000. Retaining 1/3 semen interest for bulls that sell for more than \$20,000.

HOSPITALITY

Please join us for a complimentary lunch on sale day.

ABSENTEE BIDS

Anyone wishing to bid who cannot attend the sale may place phone or mail bids by contacting any of the Line family, sale management, or sale staff.

TERMS AND CONDITIONS

Terms of the sale are cash. Every animal will be sold to the highest bidder. Announced changes on sale day take precedence over printed material in this sale book.

All cattle are the buyer's property as soon as sold and will be cared for a reasonable length of time at the buyer's risk. Any person attending the sale does so at their own risk. Neither the sale management, owners, nor any person connected with this sale, assumes any liability, legal or otherwise. All animals listed in the sale book as homozygous black or homozygous polled are done so to the best of our knowledge. We are not liable for any inaccuracies.

SALE ACCOMMODATIONS

For assistance with your travel or motel arrangements, please contact Darby or Annette Line, 308-457-2505.

Kearney, NE - Holiday Inn - Interstate 80
308-237-5971 or 1-800-228-2828

Lexington, NE - Comfort Inn - Interstate 80
308-324-3747

There are several major hotels along I-80 in Kearney.

TRUCKING

All bulls will be kept free of charge until March 20, 2025. At this time, all bulls will be delivered to in state customers, and bordering state customers at no charge. We will make every effort to assist our out of state customers with trucking arrangements. Please see page 2 for more information about delivery.

HEALTH

All cattle have health papers and are ready for interstate shipment. Overton Veterinary Services 308-324-7202.

DELIVERY OPTIONS.

- Free Delivery
- \$ 200 / head
- \$ 300 / head
- \$ 400 / head

All bulls will be kept free of charge until March 20, 2024. At this time, all bulls will be delivered to in state customers and bordering state customers at no charge. We will make every effort to assist our out of state customers with trucking arrangements.

VOLUME PURCHASES.

Purchases of 5 or more head qualify for free delivery.

BULL WARRANTY.

Every bull carries a 100% guarantee for one breeding season (not to exceed 90 days) provided the bull is managed properly and is in acceptable nutritional health. In the event a customer has an issue during the bull's first breeding season please contact us immediately. For bulls that sell for over \$10,000 dollars insurance is highly recommended and can be split between the buyer and seller. Please contact us with any questions.

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward

for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and the they have great EPDs to match!

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this

genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

MARTY ROPP 406-581-7835

RightMate
powered by TOP GENOMICS

CUTTING EDGE GENOMIC TECHNOLOGY

RightChoice and RightMate Powered by Top Genomics - Better, Stronger, Faster..

Genetic providers have used strong genetic prediction tools like EPDs for making, then offering customers consistent genetic progress for a long time. Improved EPDs, bolstered by the inclusion of genomic evaluation have made the potential for more profitable cattle and better beef even greater in the past few years. Now there are RightMate and RightChoice. These improved technologies combine advanced knowledge of high impact genomics with the database proven power of EPDs. The results, are proving to be greatly accelerated genetic improvement capability with the added benefit of profit enhancing uniformity. Maybe the best news for customers is that despite the sophistication of the technology, these tools are simple to use. With both great power and needed simplicity RightMate and RightChoice are poised to change the way we both improve and market genetics.

For breeders and those wishing to get the most from every mating, RightMate is the most impactful and powerful option. Take the guesswork out of progress by using genomically prescribed matings and just as importantly avoid those with a low probability of success. The technology is ready and the validation is strong. Simply define the direction of your breeding objectives, even female by female and RightMate will help you get there faster than any tool used in the past. We've all known for a long time that certain cows just need to be mated to certain bulls. RightMate helps take the guesswork and the trial and error out. Finding the right mating, the first time makes all of the difference.

Better matings result in more improvement and more potential profit for commercial customers too. That should be the goal of every seedstock provider. Commercial customers however, need to be able to source genetics that fit their production systems and goals quickly and easily. That is where RightChoice comes in. With 20 or more EPD categories, overwhelming amounts of raw data and multiple index offerings to evaluate in a short time, the potential to use selection information to its best result has been possible, but difficult for commercial producers. RightChoice is designed as a simple to use sorting tool for selection of new sires or females all based on commercial genetic needs and production goals. The sophisticated technology is on the inside of RightChoice with easy to use Logos for sorting as the published and effective result. All you need to do is evaluate and pick the bulls you like from the group with the RightMate genetic logo that fits your needs.

RightChoice technology will not only push value and profit traits forward. Because of the way it sorts sires, it can reduce variation and inconsistency in your calf crop as well. For example, with ACE logo bulls, not only can you expect reduced dystocia, but the birth weights responsible for most of the challenges will be less variable. That means more calves born close to the average for weight and far fewer extreme calves that either create issues for your heifers or are unreasonably small. With smart RightMate selections, uniformity of calf crop continues to marketing and even replacement females, creating more profit all the way through. We can't always control the genes present in the cow herd, but we can make sure your seedstock purchase will help you get the most progress moving forward.

RightMate and RightChoice... Better, Stronger, Faster.

CUSTOMERS COME FIRST.

FEEDER CATTLE MARKETING: *We have worked towards building relationships with multiple venues that will allow our customers to get the genetic worth from their feeder cattle. From video auctions to direct bids from feedlots or even if you have an interest in retaining ownerships of your calves we have got you covered.*

- Video Auctions
- Direct bid from Feedyards
- Retain ownership (any %)
- Carcass Data Collection

AI PROJECTS: *If you are in search of genetics through semen who will have profit potential we have a diverse line up of sires that will fit several large AI projects. If you are looking for semen or the man power to get the job done give us a call today.*

Customer service is our #1 GOAL. Contact us today.
Visitors always welcome and herd tours are available.

Ultra complete bulls are the best way to describe an impressive trio of Pontiac X 2G bulls who lead off the catalog. The bulls are smooth, sound footed and offer balanced genetic figures across the board. They come from a great young donor in 2G who stems from the 43Z cow family. We are confident these bulls will add tremendous value and quality to their progeny.

KBHR BOLD RULER H152 Sire of Lot 14.

KBHR BOLD RULER H152 X TJ 95A FLUSH

You just find good bull after good bull in a very large group of Bold Ruler sons out of the prolific 95A donor dam. The bulls are super typey and pleasing to look at from the profile. Likewise, the bulls provide extra fleshing ability and added mass. The 10 full brothers are off the charts for uniformity and will be certain to be highlights just like their sisters were in our female sale.

TJ 95A Dam of Lot 14.

JC MR PONTIAC D114K

We tested Pontiac to make some outcross higher percentage bulls for our customers. The cattle are wonderful in terms of type being dense in their build, wonderful structured, and great docility. Genetically the sons are balanced across the board and offer a big spread from birth to yearling. Look for these ultra complete sons to add value to multiple facets of your operation.

JC MR PONTIAC D114K Sire of Lots 32-39.

TJ COACH CAMPBELL 429H

Another new sire group for 2025 is the Coach Campbell sire group. In the fall female sale, the Coach Campbell females were headliners in the open division. The bulls in the sale offer an abundance of length, extra frame and muscle shape. We feel this sire group will be great candidates to use on English based cows to increase payweight and terminal traits.

TJ COACH CAMPBELL 429H Sire of Lots 40-43.

TJ GOLD 274G

The Gold sons blend maternal, calving ease, and carcass traits to the highest degree. The bulls consistently have found their way to the top of our past sales and the females in production will make you want to utilize even more Gold genetics. If you are in looking for maternal genetics make sure to circle the Gold sons as they are producing some of the very best females in the business.

TJ GOLD 274G Sire of Lots 49-60.

Select Sires tours Triangle J.

TJ GOLD STRIKE 506J

We have eagerly been awaiting the opportunity to market the first Gold Strike sons. He was a former sale highlight and is one of the lead Simmental bulls for Select Sires. The cattle excel at basics being big ribbed, sound footed, and study with extra stoutness. If you are looking for true multi-purpose herdsires the Gold Strike sons will fit the bill.

TJ GOLD STRIKE 506J Sire of Lots 61-69.

TJ 654M Sells as Lot 61.

KBHR BOLD RULER H152

Over 40 sons of Bold Ruler headline our 2025 bull sale. The bulls supply incredible genetic value and provide wonderful phenotype. We used him on a purebred, SimAngus, and Angus cows and no matter the type of cow the end result was high quality bulls. The wet daughters of Bold Ruler are some of our favorite cows. If you want an extra shot of genetic potency the Bold Ruler sons should be high on your list.

KBHR BOLD RULER H152 Sire of Lots 71-111.

E & B WILDCAT 9402 X TJ 254H FLUSH

What a way to lead off the SimAngus bulls with a great flush of Wildcat sons backed by the 254H donor dam. These bulls were absolute studs from a young age. We feel from a genetic and physical standpoint you will be hard pressed to find better first generation SimAngus bulls. We are excited to see where these bulls land, they have a world of future to them.

TJ 522M Sells as Lot 115A.

EZAR STEP UP 9178 X TJ 27J FLUSH

The Step-Up sons are backed by 27J and are just good cattle. The bulls are ultra complete and fault free as any. We feel the bulls are will be great maternal producers and add value from a carcass standpoint. The 27J is cementing herself as one of our strongest donor cows.

TJ 46H Dam of Lots 131, 132.

KENNY ROGERS X TJ 46H FLUSH

Wonderful phenotype, added growth and frame can be found in this pair of Kenny Roger sons. The bulls are brutes for muscle shape and mass and will be certain to add size and marketability to their progeny.

B A R DYNAMIC

The Dynamic sons offer an abundance of growth and incredible carcass traits. Look for the sons to be great choices to increase terminal traits and add value to market bound progeny. These first-generation Sim Angus bulls are truly the rancher's kind.

B A R DYNAMIC Sire of Lots 133-134.

E & B WILDCAT 9402

We used Wildcat on a couple of flushes and in the general cow herd, and we have been blown away with the results. The Wildcat sons will be admired for their extra substance and power while being great to look at from the profile. He stamps his progeny with an undeniable herd bull look. We are excited to see where these elite herd bulls land.

1:00 PM (CT) • At the Ranch, Miller, NE • Selling 350+ Simmental, SimAngus™ & Angus Females

SQUARE B TRUE NORTH 8052
We wanted to make a focus in our program to create more 1st generation SimAngus bulls and True North has risen to the forefront of Angus bulls we have used in the past. Many of the True North sons are heifer safe and they will impress you with their added mass, fleshing and dimension. The females out of the True North line are some of the very best in the industry.

SQUARE B TRUE NORTH 8052 Sire of Lots 143-151.

TJ FROSTY 318E

The Frosty sire group were once again crowd favorites at last year's bull sale and represents consistent producers who will sire wonderful females. The bulls are deep sided, square made and many come in a blaze faced package. Likewise, the bulls excel at the details being great for disposition and hoof quality. The consistency and quality Frosty transmits to his progeny rivals any baldy bull we have utilized in the past.

TJ FROSTY 318E Sire of Lots 182-197.

TJ 712M Sells as Lot 182.

TJ 596M Sells as Lot 198.

TJ ARROWHEAD 263G X TJ 2D FLUSH

The 2D female has a long history of producing sale highlights and we expect a lot of the same in 2025. The bulls offer explosive growth and modest birth weights. These big spread bulls are bred to increase ranchers bottom lines and stem from one of our favorite cow families.

TJ 2D Dam of Lots 198-201.

TJ ARROWHEAD 263G

Arrowhead has established himself as one of the best SimAngus heifer bulls in the industry. He offers a giant spread from BW to YW which always appeals to commercial cattlemen. He stems from the highly prolific 22X donor who is known for producing genetic horse power and breath-taking phenotype. The Arrowhead sons are truly the cattlemen's kind!

TJ ARROWHEAD 263G Sire of Lots 198-225.

TJ TROOPER 504J

Anyone who has come through and looked at herd bulls over the summer quickly picked out Trooper as one of their favorites. He is an absolute brute to look at and supplies undeniable stoutness to his progeny. The sire group will be a great source of power bulls who will sire a quality look to their progeny.

TJ TROOPER 504J Sire of Lots 226-241.

GW MEDICINE MAN 200K

Calving Ease, great maternal traits and extra marbling can be found in volume in the GW Medicine Man sire group. The bulls quickly command your attention with their balance, body and structural integrity. Look for many of his sons to be heifer safe and Medicine Man will be a staple of our breeding program moving forward.

GW MEDICINE MAN 200K Sire of Lots 242-250A.

TJ BIG EASY 317F

The Big Easy sons offer balanced trait excellence across the board. The high calving ease figures, balanced growth and profit indexes will no doubt excite buyers from a genetic standpoint. Physically expect these sound footed, athletic bulls to sire quality both from a male and female standpoint.

TJ BIG EASY 317F Sire of Lots 251-268.

TJ MULTIPLIER 470H

Multiplier has proven to be an excellent heifer bull option whose progeny is conservative in terms of mature frame size and adds body capacity and improves docility. The consistency and quality of the Multiplier sire group will be rivaled by few in the offering.

TJ MULTIPLIER 470H Sire of Lots 269-287.

ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES

EXPECTED PROGENY DIFFERENCES (EPDS): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org.

Listed below are the units in which ASA EPDs are expressed:

ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

BACK FAT (BF): Inches of carcass backfat at 475 days.

BIRTH WEIGHT (BW): Pounds of birth weight.

CALVING EASE (CE): Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.

STAYABILITY (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).

MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.

MILK (MLK): Pounds of weaning weight due to milk.

MARBLING (MARB): Carcass marbling score at 475 days.

MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.

TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)

WEANING WEIGHT (WW): Pounds of weaning weight.

YEARLING WEIGHT (YW): Pounds of yearling weight.

YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

USING API AND TI: First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed.

For more detailed information about EPDs and \$indexes, visit: www.simmental.org Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids - our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.
