HIGHLY PREDICTA**BULL**

Fall and winter have been a whirlwind here at Clear Springs Cattle Company! We would like to once again express our gratitude to all of you who bought, bid, or showed interest in our Mature Cowherd Dispersal! It was a tremendous success, and we look forward to seeing what those cows can do for their new owners. Moving from one sale right into the next has been an adjustment for us all, but the Highly PredictaBULL set of genetics that will be on offering in the 2025 Bred for Balance sale has made it much easier! There are so many bulls and females that we are extremely excited to share with both new and loyal customers.

When making a purchase of any kind, one thing that is always top of mind is predictability. Is what I see what I am going to get? Here at Bred for Balance, we strive to provide just that. With stacked generations of genomic enhanced EPDs, meticulous data collection, unaltered photos and stringent culling practices, our goal is to provide you with genetics that, to the best of our ability, are represented as exactly what they are. We all have different needs when it comes to our herd bulls and our job is to get the right bull to the right customer. With that said, please feel free to reach out to myself or any of the Bred for Balance team; we would love to go through the catalog with you and discuss the pros and cons of each animal!

Predictable and fertile genetics has also allowed us to sell as many females as we have. This year's offering of Bred and Open females features all of Highland Acres young March calvers. This is a group of genetically elite females you will not want to miss!

We hope you can join us here in Starbuck on Valentines Day for the romance of a cattle sale!

THREE-YEAR BREEDING SOUNDNESS WARRANTY

We strive to continuously improve on the development of our bulls and are confident these improvements have led to added longevity. So much so we are ready to expand upon our previous one-year warranty and offer a three-year breeding soundness exam warranty on all bulls purchased through the Bred for Balance sale. If for any reason other than an “act of God” your bull is not able to service cows, you will receive a credit back towards the next Bred for Balance sale.

- Before the bull’s first breeding season, 100% of the purchase price less a \$1,500 salvage value
- Before the bull’s second breeding season, 2/3 of the purchase price less a \$2,000 salvage value
- Before the bull’s third breeding season, 1/3 of the purchase price less a \$2,500 salvage value

Welcome to the 2025 Bred for Balance Sale in Starbuck, MN. What a great selection of progressive genetics the offering features from cover to cover. Breed leading genetic value and remarkable phenotype has become the trademarks of the Bred for Balance sale. Year after year the industry has sourced genetics who has moved the beef industry in a progressive direction. This year once again, the offering is stacked with industry leading sires and a high volume of bulls who will move commercial operations in the right direction. The BALANCE of economically relevant traits is matched by few sale catalogs you will open up this year. Calving ease, growth, incredible carcass, and strong maternal traits are featured in every data set.

What a wonderful time to be in the beef business for cow calf producers all across the country. Favorable prices are forecasted throughout 2025 and 2026. Optimism in our country and in the beef, business is a nice change of pace as we enter in the year new. Premium genetics and great management still remain the deciding factors on price discovery. A great opportunity to add genetic horsepower who will add value to progeny presents itself on February 14.

Attention to detail, remarkable data, and excellent customer relations is what you get when you purchase from Bred for Balance. The quality of the cattle speak for themselves, but the Wulf family would like nothing more to be your partner in the beef business. If you have not taken the time to go through the bulls and get to know the family, we highly encourage you to do so.

As always if we can be any assistance, please do not hesitate in reaching out to us. We hope to see you on February 14 in Starbuck.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

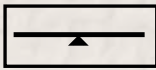

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

Full brother to last year's high selling bull, CLRS Lincoln 0107L, who went to the Buus family in SD. Manifest is so well built from the ground up as shown by his breed leading STAY! Even after being the resident punching bag for the rest of the bulls all fall, he has still developed into one of the most eye appealing bulls in the sale!

This pair of Kenny Rogers full brothers are genomic standouts that excel in every facet of the beef industry. From monster level gain to sky high marbling predictions, they will sire some of the most sought after TI and ATM cattle to date. On hoof, you must appreciate them for their smooth joint design and balanced structural build.

Masterpiece is an excellent choice for a heifer bull that will not only get live calves on the ground for you but do so much more. His breed leading marbling, as well as above average growth and do ability will make for highly profitable calves even out of heifers.

BULL DEVELOPMENT

Bulls are weaned the middle of August, then run on a 40-acre pasture as late as weather allows before moving into the monoslope. They are developed on a ration consisting of grass and alfalfa hay, silage, earlage and a protein supplement. The ration is built to be high protein and low fat to build muscular bulls that hold up once delivered. As the bulls age, we continue to lower the energy, it is our goal to have them on a diet similar to a normal cow ration at the time of delivery.

With today's record low cow numbers, a rebuild is bound to happen, meaning there will be a lot of heifers getting bred over the next few years. Instead of just some Angus bull that gets a calf on the ground, why not use a bull that adds value down the line with added growth, maternal and carcass in the same package.

One of the thickest and most densely made Keynote sons with tremendous masculinity and maternal excellence. The old saying that masculine bulls make feminine, fertile females rings true and Modesto is poised to do just that.

Scrotal development is a highlight of the King James calves. Marco Polo is a masculine, big ribbed bull that has loads of marbling. His Firesteel dam has an excellent udder and passed on her flexible skeleton to her calf.

Sells open and ready to flush.

We are honored to present to you the wonderful opportunity to invest in one of the great young cows the SimAngus population has to offer! After holding her open this past year in order to crank out the embryos and take full advantage of Jemima's elite genetic potential, All Beef and Trails End Cattle have decided to sell this beautiful female in her entirety.

CLRS Jemima 144J was the leadoff and high selling bred heifer a few years ago, commanding \$20,000. Her value continues to rise as her genomic profile stands the test of time, offering excellent calving ease and jaw dropping carcass value. She is a phenotypic standout as well with her attractive head and feminine front one third, level top and great hip and hind leg.

Her full brothers have averaged a whopping \$13,750 through the Bred for Balance sale and her dam sold for \$12,000 as a seven-year-old cow. Her three King James ET calves selling in this sale are sure to be sale highlights as they rocked their genomic tests and performed at the highest level. Her natural calf by Genesis is an extremely unique individual with a superb look paired with elite levels of growth and carcass quality.

Jemima is in perfect condition to take home and flush a handful of times before breeding her to be right at the front of your calving season! Take advantage of this opportunity to be at the forefront of the SimGenetics business with this highly marketable young donor with a world of mating flexibility!

Bred Cows

This year's sale features a wonderful set of young, bred cows from Highland Acres. As Randy and Lucas have built a herd of females with tremendous quality and maternal capabilities, they are opening the doors and offering every March bred female on their ranch. The older cows were sold privately this winter, but with the extremely high level of genetic excellence these younger cows offer, we wanted to feature them on the Bred for balance sale. Bred to the best bull battery in the country, these young cows will make an excellent addition to seedstock operations across America!

Bred to TERS LEOPOLD 316L (4202719). Estimated calving date 3/6/2025.

Moderate made, highly functional and extra feminine are the traits that Kai's cow family have perfected, as shown by her top 1% STAY EPD. In her first year she raised a bull calf that had the potential to be a sale highlight if it wasn't for a freak injury. It seems like only a matter of time before she has another great one.

 This heifer by King James is a twin to the calf my niece Madison showed this past summer. Having sold her calf from 2023, I decided to give her a break and keep her calf from this year so she can come back and visit her! We did want to offer one of them, though, as their dam is also the dam of CLRS Jet Black 706J and now resides at Raatz Simmentals in Jasper, MN.

Sells Open.
 Mystical is one of the highest API females in the entire ASA database with her off the charts genomic values for every EPD. That's on top of the fact that she is a long-made, strong-topped, clean fronted heifer with a great hip and feminine look. Her young Eclipse dam has a bright future with her added volume and udder quality.

Leopold is listed here as he is the service sire to many of the bred females on the sale! We are extremely excited about his first calf crop coming in 2025 as well. He is maturing into a tremendous sire with great flexibility, fleshing ability and outstanding genomic predictions! This outcross sire will have a very large calf crop in next years Bred for Balance sale. Order your semen through Allied!

Keynote has exceeded our expectations at every turn! His calving ease is as tremendous as his EPDs suggest, they grew well and can have a little more frame size to them. They scanned off the charts and have as good of feet as any sire group out there. Not only is he the largest sire represented in the bull crop this year but many of the bred females carry his service as well. Order his semen through Allied or Cattle Visions!

Kodiak is quickly turning into the quintessential maternal sire! His calves have a great presence and tremendous structural correctness. His calving ease is top notch making him an excellent heifer bull. He is a great bull for improving docility, hoof quality and hair, all while adding frame size and maternal excellence. Order his semen through Cattle Visions or River Creek Farms!
