# Welcome

First off, we would like to thank each and every one of y'all for helping us achieve our 20<sup>th</sup> Annual Sale. It's truly an exciting time to be in the cattle industry. We have experienced record prices the past couple of years with no slowing down in sight. The importance of genetics is at the forefront of the industry, with costs continuing to rise as well. Efficiency is always the answer and something we all need to continue to improve on.

We are extremely excited about this year's sale offering. We feel we have a bull for everyone's goals and budgets. We are offering about ten more bulls in this year's sale. With the ample amount of rain from spring and early summer and genetics that work, we were able to see record weights for us on less feed. We feel these bulls and females are developed properly to ensure longevity and are built to go to work for you.

Please make plans to be with us on November 7th and November 8th. Friday, we have a jam-packed day of viewing cattle, fellowship with lunch, and an educational producer meeting with dinner. Saturday will be sale day, and we plan to start at 11 A.M. We will have the loadout crew ready to serve you at any point throughout the sale. If you are unable to attend, please feel free to come by anytime to view the cattle. Please give us a call anytime to answer questions! We look forward to seeing y'all soon!

Thanks,  
*The Gibbs Farms Crew*

## Even-Handed Breeding

In today's industry, with record prices and America's cow herd at an all-time low, it is easy to get caught up with the dollars of the feed industry in mind, but forget about your cows at home. What we mean by that is, we feel it is important to keep the cow first. Yes, it is wise to maximize gains and carcass quality, but not at the expense of your cows heading down a direction that leads to failure through hard doing cattle. It is just as important now as ever to breed for balance in cattle traits through selective matings for improvement and combining hybrid vigor to help you achieve your goals quickly.

Even-handed breeding is a deliberate selection of cattle to breed to produce a balanced set of traits, and avoiding the extremes in any single trait. We all know single trait selection can lead to holes in other places. For example, if we are too terminal in our matings, referring to growth and carcass, often, we have females that require too much feed to get through the winter, and they have a harder time breeding back. On the contrary, a herd that is only selected through maternal traits often leads to money left on the table in terms of gain and pounds harvested on the rail.

We know that we have quite a few customers who need a bull to do it all and be balanced. We strive to produce a majority of our bulls this way. Look for the G+ bulls throughout the catalog. These bulls are the ones that are the most balanced, that can keep birthweights in check but still maximize growth and carcass traits. Even-handed breeding ensures that no single trait is overemphasized, producing cattle that are versatile and well-suited to diverse production systems. This balance reduces risk associated with environmental limitations or market shifts. Healthier, more adaptable cattle require fewer inputs.

We also know we have customers looking for more maternal lines and/or terminal lines. It is extremely important to know your goals and the type of cattle it takes to achieve them. If you are looking to add more performance and growth to a cow herd that you feel needs it, look for the ATM bulls. These bulls can complement a maternal herd and help achieve more pounds and gain. If you are looking for more maternal lines to produce superior females, then look for the G+ or ACE bulls to help produce the goal.

The biggest way to ensure success in the cattle business is to know your cows and have a plan and a direction. Buy the bull to complement your cows. We feel it is important not to get caught up in the latest trend and to breed good functional cattle that fit your environment. Our job as a seedstock breeder is to offer several options to meet all of our customers' needs. Please reach out to us, and allow us to help you achieve your goals. No operation is too big or too small, and our success strictly depends on our customers.

***OUR SUCCESS DEPENDS UPON OUR CUSTOMERS' SUCCESS.***

## General Sale Information

### SALE DAY CONTACTS

Doug Gibbs	404.717.2264
Bradley Gibbs	404.904.2914
Sam Young	770.710.4588
Marty Ropp	406.571.7835
Corey Wilkins	256.590.2487
Jared Murnin	406.321.1542
Whitney Gibbs Brand	770.328.6752
Gordon Hodges	336.469.0489

### SALE LOCATION

1358 County Road 68, Ranburne, AL 36273

#### Directions:

Coming from the east, take HWY 166 from Bowdon, GA and go 4 miles to State Line Road.

Coming from the west, Exit 205 off I-20 and follow HWY 46 for 16 miles through Ranburne to State Line Road.

Go South on State Line Road for 0.8 mile, at the four way stop, take a right and Gibbs Farms Sale Facility is 0.3 miles on the left.

### SALE SCHEDULE *(Times listed are CST)*

- \$ 400 / head
- \$ 500 / head

# Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

**ACCREDITED GENOMIC PLUS** – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

**ACCREDITED CALVING EASE** – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

**ACCREDITED TERMINAL MATE** – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

## A Note From The *Sale Manager*

Welcome, cattlemen, to the 20th Annual Gibbs Farms Bull & Replacement Female Sale. 20 years of dedication and determination have placed Gibbs as one of the premier trusted sources for Simmental & SimAngus cattle, which the beef industry turns to. Study the offering closely, and you will see high-impact genetics that will add genetic advancement and enhance profitability for cattlemen.

The Gibbs program, from a genetic standpoint, are bred to supply optimum performance traits for southeastern cattlemen. Ample calving ease, explosive growth, and a strong tandem of both maternal and terminal traits are the trademarks of the Gibbs program. The cowherd is run just like the majority of their commercial customers, with limited supplementation, limited labor, and oversight. Accurate and rigorous performance and genomic testing also serve as one of the cornerstone pieces that the Gibbs program has invested heavily in. Accurate weights, close attention to sizeable contemporary groups and generations of genomic testing are what buyers have come to expect when purchasing Gibbs genetics. The program strives not only to be your bull providers but a trusted source of service and partnership in the beef business.

This year's offering is littered with exciting new genetics alongside sizeable sire groups of proven sires. The bulls are headlined by two new exciting purebred bulls raised by Gibbs in Culmination and Signature. Going through the bulls, one cannot go without noticing a strong and consistent sire group of Bedrocks. The females are once again high-quality and will make a huge impact on the programs they head to.

We hope you can join us on the second Saturday in November for one of the premier marketing events of the year. Come enjoy great fellowship and cattle with the Gibbs family. If we can be of any assistance, please do not hesitate to reach out.

Sincerely,  
*Marty Ropp, Corey Wilkins and Jared Murnin*

# Please Join Us

Mike Tansil is the owner of MY TEAM CATTLE & CROP INSURANCE which helps Livestock Producers and row Crop farmers of all sizes in ALABAMA, TENNESSEE, GEORGIA, & KENTUCKY. His years of experience in helping manage risk using LRP to offset the potential downside in Cattle markets (especially in today's market) gives you the opportunity to design a program specific to your farms. Mike will give us all of the changes and updates that have taken place this year.

Dr. Jon DeClerck serves as Executive Vice President of the American Simmental Association. He earned his bachelor's degree at Texas A&M University and his PhD at Texas Tech University. Before joining ASA, Dr. DeClerck worked as a technical consultant with Purina Animal Nutrition and spent nine years on faculty at both Iowa State and Texas Tech University.

Marty Ropp is the founder and CEO of Allied Genetic Resources. Marty earned a bachelor's degree at Kansas State University and a master's degree from the University of Missouri. Marty dedication and determination has led to the advancement of Simmental cattle through his time at American Simmental and Allied Genetic Resources.

## Cattlemen's Roundtable Discussion

FRIDAY, November 7 || 6:00 PM

Please plan to join us the evening before the sale for a Country Cook-Out with the whole Gibbs Farms crew, followed by the program that will prove to be interesting, interactive and thought provoking.

This year's lot one bull is one that we are truly excited about. He sets himself apart by his superior phenotype, showcasing a robust, well-proportioned frame that commands attention. His balanced genetic prediction highlights his potential for superior growth, fertility, and carcass quality, making him a versatile asset for any breeding program. Boasting an outcross pedigree, he offers unique genetics to diversify and enhance herd performance. His impressive body structure combines muscularity with excellent conformation, ensuring both aesthetic appeal and functional longevity. This bull is a top-tier choice for producers seeking quality and genetic advancement.

It is nearly impossible to find a bull with the ACE logo that exhibits as much shape and volume as the lot 2 bull has. Here is your chance to purchase a bull with considerable growth potential while being heifer safe. He offers a highly maternal set of figures and we expect him to contribute beautiful daughters to any herd. His coat is slick-haired as they come, ensuring to thrive in heat and fescue country. His combination of rapid growth, a touch of hybrid vigor, and maternal excellence ensures he will be a valuable asset to any operation.

• Our lot 4 bull is the one we commonly refer to as the “genomic king” here. He is renowned for his outstanding growth, carcass, and terminal traits. This is a bull that can add frame, eye appeal, and carcass traits. This bull is a “looker” and has a striking appearance with a sleek design and commanding presence, making him highly attractive in the show ring and in the field. His superior genetic profile ensures exceptional performance and predictability in breeding outcomes. His robust genetics ensure he passes on desirable terminal traits, enhancing herd profitability. He is not just a terminal bull as he boast a CE epd and BW epd that is borderline acceptable for heifer use. This bull can sell semen!

• Here is another purebred bull that is going to add frame, growth, and carcass traits. Coming from the HANOI cow family, and embryo purchased from Clear Spring Cattle Company in MN. This bull's dam is sired by Essential (Arguably the best purebred we have ever produced.) Hanoi is also a full sister to CLRS Homeland, which is currently selling semen at ABS. He has a royal pedigree of some of the breed's greats.

• Within our knowledge lot 6 is the number 1 purebred Simmental bull in the breed for WW and YW. He is a complete genetic outlier for growth. He is massive in terms of his build and frame. If you need to step up the frame score in your cattle, this is the bull to do it.

# GIBBS CULMINATION

## SIRE OF LOTS 1-12, 286

What a way to lead off the bulls with a great offering of Culmination progeny. The sire groups represent the kind of higher percentage Simmental bulls we strive to produce. Extra size, length, and performance are the cornerstone traits one can expect when buying a Culmination son. Culmination answers in being a Genesis son who excels at hair shedding while maintaining the great performance of his sire. Genetically, the bulls offer horsepower and genetic excellence across the board.

# MORE PER HEAD PERIOD

**SimGenetics**  
PROFIT THROUGH SCIENCE  
American Simmental Association

## EFFECT OF SIRE BREED ON SALE PRICE OF BEEF STEER CALVES

Superior Livestock Auction, Summer 2020<sup>c</sup>

SimAngus™-sired steer calves sold through Superior Livestock Auction in summer 2020 earned **more at sale time** than all other calves.<sup>b</sup>

It's no wonder the percentage of SimAngus™ calves marketed through the industry's largest video auction has grown **eightfold** since 2010.

Want low-risk, high-potential calves with earning potential?

## STAND STRONG SIMMENTAL

406-587-4531 • [simmental.org](http://simmental.org)

<sup>a</sup> For lots of 50 head or more. <sup>b</sup> Kansas State University, December 2020, Superior Livestock Auction data analysis of 3,280 lots, 394,900 head of beef calves marketed during summer 2020. (P<.0001)  
<sup>c</sup> Lots that qualified for breed-related programs were excluded from the model due to potential confounding effects with sire breed analysis and, for many, few lots in the data.  
<sup>d, e, f</sup> Means without a common superscript differ (P<0.05) Lots of calves in breed-identified groups were sired by bulls from the respective breeds and out of dams with no Brahman influence.

# GIBBS SIGNATURE 2510K

## SIRE OF LOTS 13-19, 329-331

Signature is another great Essential son we will be using more of in our program. We received the semen on the final days of breeding, so he saw limited use. However, the sons offer tremendous spread from birth to yearling and more shape and power versus his sire. He stems back to one of our most prolific cow families, and we have a lot of trust that he will be one of the best purebred bulls to come out of our program.

# GIBBS 9114G ESSENTIAL

**SIRE OF LOTS 20-23, 245-247, 272, 333-335**

Gibbs Essential was our 2020 high seller and has become one of the heaviest used Simmental bulls in the industry today. Essential is proving to be a genetic superstar who rivals any bull in the business for the spread he offers from birth to yearling. The sons are wonderful structured, easy to look at, great for docility, and will no doubt sire cattle who create premiums.

This is the first Essential son in the catalog, and boy, he is a looker. He is a bull that does everything you want to see out of a true beef bull. He is backed by a direct daughter of the great LOUISE Y534 cow with a perfect udder. Lot 20 has been a standout since weaning. He was born at 72 lbs, boasting a 806 weaning weight and 1304 yearling weight. True curve bending genetics that come light and grow!

**GIBBS 4180M ESSENTIAL** Sells as Lot 20.

• Lot 24 is the actual number 1 weaning weight bull of 954 pounds before adjustment. Reserve made himself known last year as a herd bull producer, but is going to be known even more for his daughters. The first Reserve daughters are calving here now, and we think they are easily some of the best. Excellent dispositions, udder quality, feet, and hair shedding are going to be what you like the best about them. These Reserve sons have the herd bull look that many serious commercial men desire.

**GIBBS 4809M RESERVE** Sells as Lot 24.

# LCDR RESERVE 210J

## SIRE OF LOTS 24-35, 241-243

Reserve has become a unique outcross baldy bull who sires incredible performance and leaves behind first-class females. The cattle offer impeccable feet and leg structure and will be a hair-shedding improver. The mating versatility will allow past customers to acquire some really outcross genetics.

BALDY

## CALVING EASE Matters

89% of the bulls offer double digit calving ease.

SSF BLK LOUISE Y534 Dam of Lot 35.

# KBHR SCREENSHOT K167

## SIRE OF LOTS 36-43, 287

High valued, big performing baldy genetics are the traits we love about the Screenshot cattle. The bulls will supply added muscle shape and enhance terminal traits of their market-bound progeny. If you are looking for more pounds and more carcass traits, look no further than the Screenshot sons.

• Here is the first bull in the catalog of the highly anticipated ScreenShot sire group. They are purebreds that pack as much natural thickness and muscle as any sire we have ever used, and the blaze face is just a plus. Lot 36 is the looker and nailed his current picture at just 9 months old. If you are looking for a blazed face purebred that can add muscle size and payweight, consider 4140M and his blazed face brothers.

**GIBBS 4375M SCREENSHOT** Sells as Lot 37.

• Here's a solid black option that offers as much genetic value as any bull in the sale. His granddam is the 4080B donor that is known for her superior udder and female-making abilities and also produced the high selling open heifer in our 2023 sale. This bull will add pounds at weaning and the daughters will be the keeping kind. Physically, this bull is as good as you can make one, and is admired for his rib shape and muscle.

**Gibbs Farms Bull Development**

Gibbs Farms Bulls are grazed on pastures containing KY-31 Fescue and volunteer summer grasses like common Bermuda, crabgrass, and clover very similar to the environment most of them will encounter when they go to work of the environment most southeastern cattlemen operate in. They remain in the large pasture environment from the time they are weaned right up until sale time, never spending anytime in a dry lot environment.

Yes, we supplement the bulls on a high roughage, properly balanced bull developer ration consisting of soyhull pellets, peanut by products pellets, cotton by products, ground hay, a special mineral package and enough extruded cottonseed meal to balance their protein needs. We never use high starch cereal grains in our breeding cattle developer rations.

Placing our breeding stock in settings which will replicate most commercial environments operate in, results in bulls who will absolutely meet your needs. We want customers to be able to recognize their bulls in coming months after the sale.

· Lots 44 and 45. These two bulls are as good as you can make one. They are maternal brothers to last year's \$55,000 high-selling bull GIBBS BLAZER 3L02. They are some of the most powerful bulls in the sale and physically rise to the top. 4M07 was the number 1 actual yearling weight bull here, with his brother right there with him. Look for these bulls to sire calves that come small and wean heavy. They should produce excellent daughters with the cow family that is proven to succeed.

**GIBBS 8153E DAISY 8223D** Dam of Lots 44, 45. **GIBBS 4M07 ENHANCEMENT** Sells as Lot 44.

## Purebred Simmental Bulls

Here's a bull that can replace his deceased sire. His dam is quickly becoming our go-to donor here and is best known for being the dam of CULMINATION and last year's high-selling purebred, PROSPERITY. We believe this bull's genetic value is superior to most, as well as his phenotype. He is a bull that is as balanced as they come. His full sister is going to be in the donor pen as well. Great cows make great bulls, and we believe this one is just that. We think this bull is not only one of the best purebreds in the sale, but also in the country.

**GIBBS 9047G LOUISE Y534** Dam of Lot 46.

## Purebred Simmental Bulls

- If you are looking for a more moderate framed option for a purebred Simmental bull that excels in muscle shape, feed efficiency, and phenotype, check out the Kruz x 0205H flush. These bulls will produce daughters that can wean heavy calves while consuming less feed and maintaining body condition. They are bulls that have the look that is desired by all cattlemen.

**GIBBS 4384M KRUZ** Sells as Lot 50.

**GIBBS 0205H LOUISE 5319C** Dam of Lots 50-53.

This bull is the natural calf to the 9047G donor. He is one of the youngest bulls in the sale, but he does not appear that way. He is a bull that offers as much balance in his genetic prediction as any high percentage Simmental bull in the sale. He's a larger-framed bull that can quickly move your program in the right direction.

• Lot 59 is a bull that has as much body and mass as any bull we have ever produced. His spring of rib and overall rib capacity is second to none. His data and EPD profile is impeccable as well. He is a true spread bull with top 15% CE WW and YW with a top 1% MARB API and TI. We feel as if this bull will be acceptable on heifers for most and still sire calves that will bring pounds to the table. With this bull's superior phenotype and EPD profile, we feel as if he could really be popular. His young donor dam was the first ever heifer we have ever flushed. She was an absolute standout. She just calved with her first calf and her udder is perfect.

**SCHOOLEY HAGGARD A411H** Sire of Lots 50-65.

## SimAngus Bulls

• This bull will be many of y'all's favorites in November. This is the brother who exhibits the most power, bone, and muscle out of the flush. We expect this bull to sire calves that have more terminal value and sire an impressive set of feeder calves. The daughters should be phenomenal as well. He is as docile as you can make one and excels in hair shedding ability, foot quality, and body and mass.

 Gibbs' Genetics  
 AT WORK

**Cullens Cattle Company**  
 Warthens, AL

"Cullens Cattle Co. was established in 1993 as a family owned commercial cow-calf and Registered Simmental operation. Gibbs Farm genetics have greatly improved our cattle both genetically and phenotypically. The bulls we have purchased from Gibbs Farm have been docile, fertile, easy calving, easy keepers that have held their body condition through the breeding seasons. Our heifers purchased from Gibbs Spring Sale have recently calved. They are great mothers with good udders and their calves are exceptional.

Our sincere thanks goes to the Gibbs family for their support and continuous dedication improving the Simmental and SimAngus breed."

Bedrock x  
0105H Mabelle

• The first Bedrock son is a colossal bull, boasting a massive and muscular build that commands attention in any herd. His robust performance is matched by exceptional maternal value as well. His highly productive dam raised our high-selling SimAngus bull Highwayman last year as well. This bull's granddam is also the dam of Haymaker. You can guarantee this bull will sire highly productive cows.

GIBBS 0150H MABELLE 6123D Dam of Lots 69, 70.

This is the Bedrock son that offers a tick more eye appeal and frame than his already popular sire. We feel as if this bull has everything you would want from a herd bull. If you are looking for the Bedrock son to keep everything great that his sire has to offer but add more eye appeal and frame, this bull is the answer. We feel he is a true spread bull and would be acceptable on heifers and cows. The Bedrock sire group as a whole is some of favorites!

## DOCILITY Matters

All bulls are docility scores are 1's and 2's. Anything above 2 is culled after weaning

# CCR BEDROCK 5171J

## SIRE OF LOTS 69-87, 285

Consistency and quality are what we have seen from the Bedrock-sired cattle. He simply does not sire any throwaways. The cattle excel in terms of calving ease and growth, and his genetic profile continues to rise after every calf crop recorded. We feel he will be one of the great SimAngus bulls for commercial use in the years to come. Maternally, we feel he will enhance traits while not sacrificing any growth and terminal premiums.

# GIBBS 9121G KENWORTH

**SIRE OF LOTS 88-97, 190, 191, 260, 263, 267**

Kenworth's consistency and quality of his progeny are making him the go-to SimAngus bull in our program. The sons are exceptional for docility, foot quality, and hair shedding while providing an extra shot of growth and strong carcass figures. The wet daughters are cementing Kenworth legacy in our operation as one of our very best SimAngus bulls.

**Gibbs' Genetics  
 AT WORK**

## Triple D Farms *Wallace, NC*

"Triple D farms is a family owned farm, we have been buying genetics from the Gibbs family for over the past ten years. We are a cow-calf operation, who have recently started to retain ownership of our calves. In Addition to sending our steers and some heifers to feed yards, we also keep and develop our heifers for replacements for our herd. Throughout the years we feel like Gibbs Farms has excelled in offering a balance of maternal and carcass genetics. This year our cattle that was sent to the feed yard averaged 129.26 in grid premiums, and were 95.65% choice or better. We value and appreciate our relationship with the Gibbs family farms."

# GIBBS KINGPIN 1140J

## SIRE OF LOTS 98-104, 188, 189

Calving ease oriented cattle that do not sacrifice growth and terminal traits are what you will find in the Kingpin bulls. The cattle absolutely will work in the south, being great-haired, easy-fleshing, and great for docility. Genetically, the bulls offer ample calving ease, explosive growth, and top-tier profit indexes.

Kingpin is quickly leaving his mark on our herd for consistently giving us progeny that perform on fescue. We feel lot 98 is the best Kingpin son we have ever raised. He is massive in his rib shape and offers more muscle than most as well. He is a bull that will be acceptable on heifers, but still boasts a WW and YW EPD in the top 15%. This bull will make your money back not only on live calves on the ground but also on payday when you sell them by the pound.

GIBBS 4332M KINGPIN Sells as Lot 98.

# GIBBS HAYMAKER 2380K

## SIRE OF LOTS 105-109, 305

Haymaker has left us with an awesome set of hersires to market in 2025. The sire groups represent good cattle who are phenotypic superstars. Extra body, added mass, and striking balance are represented in every one of his sons. Haymaker is just the cattlemen's kind and will be bulls you will want to highlight in your sale catalog. We promise you will like them come sale day.

• Haymaker was the \$27,000 high-selling bull in our 2023 sale, and his first set of calves did not disappoint. Much like their sire, physically, they are impressive. Lot 105 is the natural calf out of the 1125J donor and is a little younger, but we believe he is a genetic outlier. All of the Haymaker progeny are consistent, no-hole type of cattle.

GIBBS 4644M HAYMAKER Sells as Lot xxx.

**Gibbs' Genetics  
 AT WORK**

**Wilson Farms  
 Heflin, AL**

"For almost two decades we have purchased SimAngus Bulls from Gibbs Farms to use in our commercial cow-calf operation utilizing natural service over 60 days, fertility and longevity are a must. These bulls have proven themselves year in and year out to "hold up" due in part to the stringent bull development program that is unique to Gibbs Farms.

Over two decades of online feeder calf marketing, with value added programs have consistently given us top dollar as well as repeat buyers at sale time. The Gibbs name has become synonymous nationally for industry leading SimAngus genetics. Whatever the genetic trait or package you are looking for they always have a prospect, backed by a bull guaranteed that is one of the best available. We are fortunate they are here at home."

# GIBBS HILLTOP 0062H

## SIRE OF LOTS 110-117, 192-198, 307-311

Hilltop is combining the docility, hair shedding, and soundness of his famous sire Triple Crown while siring cattle with all kinds of performance and growth. The Hilltops will be perfect candidates if you are looking to add pay weight for your next set of calves. Likewise, his combination of marbling and REA will sire cattle that garner premiums on the grid.

# TJ STONE COLD 336G

## SIRE OF LOTS 118-130, 202-204, 288-292

One of the very best baldy bulls in the industry can be found in TJ Stone Cold. The bulls are balanced in every sense of the word. Genetically, the Stone Cold sons display modest birthweights and strong growth figures. Physically, they are level, big topped, and easy fleshing, and always catch your eye with their striking balance.

## SIRE OF LOTS 131-141, 217-220, 298-304

If you are looking to market a heavier set of calves, a Rarity son will help you get there. The bulls are long-bodied, huge ribbed, and sound-footed. The cattle offer multi trait excellence across the board and will enhance value to their progeny.

BALDY

**Matthew Grogan**  
*AI and Ultrasound Technician*

We would like to thank Matthew Grogan from Calhoun, Georgia for his many years of dedicated service. Matthew assist us with AI during breeding season and then performs the ultrasound pregnancy exams for all of our cow herd, replacement females, and sale females.

# REDHILL 672X X004 231A

## SIRE OF LOTS 142-147

231A was a herdsire we tested outside of our program, and the results speak for themselves. After having several daughters in production, we went back to using him as they are some of our favorite females. The bulls are absolute brutes for mass, volume, and sheer performance. What makes them unique is that they weigh like lead and do not add additional frame. Physically, the bulls are marked with striking balance and are stamped with uniformity.

## SIRE OF LOTS 148-153

The Firepower sons are super correct, being great-footed and picture-perfect for structure. They offer striking balance from the profile. We expect him to be an absolute female maker as his replacements are rising to the forefront of our replacement pen.

• This is an extremely exciting brute of a bull. He is the only Cinched son in this sale. The Cinched cattle are phenotype standouts. The daughters are phenomenal and have perfect udder shape with small teats. This bull's EPD profile is second to none. He reads to have the idea set of calving ease with top performance traits and carcass. He is a true curve-bending bull that does everything right.

Gibbs' Genetics  
 AT WORK

## Stewart Land and Cattle Rutherfordton, NC

I've been the manger at Stewart Land & Cattle for almost 30 years during which we have used different breed bulls on our commercial herd. For the past 5 years we have been using Gibbs SimAngus bulls, the weaning weights have been heavier and the calves really grow fast after weaning. The bulls and their calves have good disposition and the bulls hold up well during the breeding season on our fescue pastures. We always get a premium price for our Gibbs sired calves at market and the Gibbs family are good people to work with.

**GIBBS 4M30 COMMERCE** Sells as Lot 159.

**CONNELY COMMERCE** Sire of Lots 159-164.

**GIBBS 7153E STAR 3136A** Dam of Lots 159-164.

The Commerce X 7153E flush is a group of bulls that command attention for their eye appeal with heavy bone structure that supports their strength and durability to be a herd bull. They are extremely slick haired with excellent hoof structure. They are masculine and many will find these bulls on sale day. They are uniform as well. Their dam is the also the dam to GIBBS 9114G ESSENTIAL. They are backed with some serious cow power.

GIBBS 4M22 COMMERCE Sells as Lot 164.

**SIRE OF LOTS 165-172, 326**

We are always testing some Angus bulls for some outcross genetics. We have been very pleased with what Jameson sons have brought to the table. The cattle are moderate, dense, and will weigh like lead. We know the first generation SimAngus bulls will supply value and enhance profitability at a ranch level.

**BASIN JAMESON 1076**

**GIBBS 4207M JAMESON** Sells as Lot 165.

• We elected to use the Angus bull Jameson to make some first-generation SimAngus. They are bulls that pack a punch of growth and carcass traits. Lot 165 is the most moderate of the group, but is heifer safe and has an incredible EPD profile. He is a bull that has been fun to watch grow and mature. When you study him on hoof, you can admire him for being so athletic when he strides to have so much body and depth.

The Kenny Rogers sire group was crowd favorites last year due to their power and length of body. Lot 173 is a bull that is built like a brick due to his thickness and overall density. He is sensible in terms of his frame and packs on the pounds in natural thickness. We believe this is the best Kenny Rogers son to date. His dam is the 0532X Star cow who is also the dam to GIBBS 9121G KENWORTH. These will be the last calves out of her so take advantage of such a special genetic package.

**GIBBS 0532X SM STAR P342**

Here is another exciting brother. This bull is very similar in build to lot 173. He is thick, deep, and wide. We expect him to produce not only a wonderful set of feeder calves, but daughters that are superior to most. The Kenny Rogers daughters in production have beautiful udders. Hybrid vigor at its best!

• Lot 176 is the natural calf to the 0205H cow, who is a full sister to a previous high-selling bull, GIBBS BULLDOG, and direct daughter of the Y534 LOUISE cow. 0205H's other ET calves are the KRUZ flush. This bull is one of the highest growth bulls in the country. He is top 1% WW, YW, CW, REA and TI. Use this bull to enhance growth and power in your cow herd.

## FRAME SCORE

### What is the RIGHT ANSWER?

Everyone seems to have a strong opinion one way or the other in what the optimal frame size of a bull should be. First, any seedstock producer would agree frame scores is the most difficult and inaccurate data we collect annually. Cattle not standing perfectly in the chute among other challenges will greatly compromise the accuracy of frame size. Make no mistake, we value growth as much as anyone but in our eye's growth traits are measured by the scale not by height. Likewise, the correlation between frame size and growth is not as highly correlated as one might suspect.

Ultimately, research shows cattle who fall in the middle in regards to mature frame size are the most productive in terms of weaning off the highest percentage of calf versus their body weight. We are not attempting to sway customers one way or the other we have bulls in the offering who fall in a wide array of frame size. However, placing a high selection pressure on frame size as it relates to growth might not be the best answers for customers.

**Herd Health...** Every sale animal and the entire Gibbs Farms breeding herd is properly vaccinated and boosted annually for 7-Way Clostridium, IBR-BVD-BRSV-PI3, Hamophilus Somnus, Pasturella, Leptospirosis, and Vibriosis. All heifers are calfhooed vaccinated for Brucellosis and every calf born on the farm each year is tested for BVD-PI. All sale animals have been tested negative for Johne's Disease and the cow herd is being tested annually. All animals on the farm are treated at least twice annually with a parasitic pour-on and at least once annually with Safe-Guard drench. All bulls have successfully passed a complete breeding soundness exam.

**Guarantee on the Open Heifers...**

Every open heifer is guaranteed open at the time of the sale and is guaranteed to be a breeder as long as the female has been exposed to proper nutrition and management. In the event of a non-breeder, please contact us, and sale credit will be issued minus salvage value.

**Guarantee on the Bred Females...** Every bred female is guaranteed to be bred at the time as stated in the catalog, unless updated by the auctioneer. In the case of an open female, please contact Gibbs Farms immediately.

**Guarantee on the Sale Bulls...** Every bull has successfully passed a breeding soundness exam prior to the sale and is guaranteed breeders. Our warranty for the bulls includes semen and feet issues (not stemming from injury or management). All other injuries such as broke penis, acts of God, and situations related to management that are beyond our control, will not be covered. A veterinary inspection/report is required for warranty claims.

**Genetic Conditions...** The knowledge and testing technology for all types of genetic conditions is almost changing daily. What we knew to be policy yesterday may be obsolete today. Our policy at Gibbs Farms is to fully follow and abide by any and all testing and reporting policy pertaining to genetic conditions as recommended by the American Simmental Association. We further state that our personal policy is to not market any animals known to be carriers or suspected of being carriers of any genetic conditions classified by the ASA as lethal and/or high occurrence. On any animals known to be carriers of other non-lethal genetic conditions that the ASA recommends testing, we will test and provide results on any animals marketed. For full disclosure and explanation of all genetic conditions monitored by the ASA, please refer to the TraitTrac shown on their individual pedigree on the ASA website.

We understand the investment you make in your bulls can be significant; we will make every effort to take care of you if something goes awry. All bulls purchased sight unseen or online carry a 100% satisfaction guarantee.

**NO ONE CAN GUARANTEE EVERY ANIMAL WILL  
PERFORM PERFECTLY,  
BUT AT GIBBS FARMS WE GUARANTEE  
WE WILL MAKE THINGS RIGHT IF THEY DO NOT!**

## ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES

**EXPECTED PROGENY DIFFERENCES (EPDS):** EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit [www.simmental.org](http://www.simmental.org).

Listed below are the units in which ASA EPDs are expressed:

**ALL-PURPOSE INDEX (API):** Dollars per cow exposed under an all-purpose-sire scenario.  
**BACK FAT (BF):** Inches of carcass backfat at 475 days.  
**BIRTH WEIGHT (BW):** Pounds of birth weight.  
**CALVING EASE (CE):** Percent of unassisted births when used on heifers.  
**CARCASS WEIGHT (CW):** Pounds of carcass weight at 475 days.  
**DOCILITY (DOC):** Percent of offspring receiving a disposition score of 1 (docile).  
**MATERNAL CALVING EASE (MCE):** Percent of unassisted births in first-calving daughters.

**MILK (MLK):** Pounds of weaning weight due to milk.  
**MARBLING (MARB):** Carcass marbling score at 475 days.  
**MATERNAL WEANING WEIGHT (MWW):** Pounds of weaning weight due to milk and growth.  
**RIBEYE AREA (REA):** Square inches of carcass ribeye at 475 days.  
**TERMINAL INDEX (TI):** Dollars per cow exposed under a terminal-sire scenario.  
**WEANING WEIGHT (WW):** Pounds of weaning weight.  
**YEARLING WEIGHT (YW):** Pounds of yearling weight.  
**YIELD GRADE (YG):** Carcass yield grade score at 475 days.

**\$ INDEXES:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

**ALL-PURPOSE INDEX (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**TERMINAL INDEX (TI):** Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

For more detailed information about EPDs and \$ indexes, visit: [www.simmental.org](http://www.simmental.org)

### Loans for land, farms, and homes.

Most people struggle finding a lender that understands land, home, and farm related financing.

Alabama Farm Credit specializes in financing structured for land, farm, and home loans.

At Alabama Farm Credit we understand your values so you can feel secure in your financing decisions, and focus more on achieving your agribusiness goals and country-living dreams.

- Sells open.
- We thought it was fitting to sell the best Bedrock daughter we had to offer, with this being Bedrock's first calves to sell here. She is a full sister to lots 69 and 70. She is a maternal sister to last year's sale highlight, GIBBS HIGHWAYMAN 3130L. This is one of the ones that hurts to let go. Corey has free rein to pick out 3 of our very best opens every year, and it's easy to see why this one was selected. Here is a female who can quickly put your program on the map. You can buy a bull and move your whole herd in the right direction, but if you purchase a donor female too, you immediately have what we have. We feel this heifer is an excellent donor candidate.

**GIBBS 4248M MAYHAYLEY JC109J** Sells as Lot 286.

- Sells open.
- The full sister to the Lot 1, 2, and 3 bull will be easy to find on sale day. She is possibly the best genetic piece in the sale, a complete outcross to many popular bloodlines. She gives you a tremendous amount of mating flexibility, as well being a ¾ blood. You can mate her to SimAngus to make SimAngus, and you can mate her to Purebreds to make purebreds. This heifer is backed by the JC MAYHAYLEY donor that goes back to the TJ 8T cow. Great cows make great bulls, and we feel confident that this is a great one. Physically, she is flawless and is loaded with depth of body and the cow power all cattlemen love. On paper she is a no-holes type of female that exhibits balance and breed leading milk, maternal weaning weight, stayability, marbling, and indexes.

**JC MS MAYHAYLEY 109J** Dam of Lot 286.

**GIBBS 4088M MABELLE 1348J** Sells as Lot 287.

- Sells open.
- This is one powerful blazed faced female. She is the only Screenshot female we are offering this year. Her dam is a highly productive Essential female in our herd that was scored to be one of the best. It is hard to make a truly great female, let alone a baldy. This is a female that offers breed-leading growth. Rarely do you see cattle cross the 110 weaning weight EPD. She is puppy dog gentle and as slick-haired as they come. Buy this female to make some top-end bulls that pay for her in the first year.

**Gibbs' Genetics**  
**AT WORK**

**Clint Berry**  
*Superior Livestock*

"Over the last several years, I've been blessed with the opportunity to market cattle sired by Gibbs Farms SimAngus bulls for multiple, long time Gibbs bull customers, located in the heart of the South. These cattle consistently compete for the top of the market, as their reputation with our buyers have solidified the value in feedlot performance and carcass merit on the rail. Gibbs Farms genetics work both in the pasture and beyond."

*We are extremely thankful for our guys!*

**We couldn't do it without them.**

Left to right: Rob Harms- Head honcho, Mr. Can do it all. Austin Wright- Head Mechanic, Mr. Fit it. Zach Kribs- Head of Nutritional Management, Mr. Care Taker. Daulton Spruill- Head of Strategic Hauling, Mr. I'll get it there. Ryan Mitchell- Head of Land Management, Mr. Keeping things Looking Right.

• Mainstay was the high-selling from Schooley Cattle Company and English Oaks Ranch, purchased by us and River Creek Farms in Kansas. Mainstay displays to be a curve-bending bull that excels in performance, phenotype, and carcass merit – all wrapped up in a blazed face package. We have never marketed any semen to him until now. We believe he is a bull that is a must-use in 2025, and this will be the ONLY chance to purchase semen on this young stud in 2025!
