SIMMENTAL AND SIMANGUS

54 AGE-ADVANTAGED AND YEARLING BULLS • 41 FEMALES • PAIRS, BRED AND OPEN HEIFERS

JOIN US FOR AN EXCLUSIVE COLLECTION OF SIMGENETICS

Welcome

On behalf of our family and crew, we want to welcome you to our 7th Annual Production Sale. We are truly grateful for your interest, your support, and the relationships that continue to grow around this sale each year.

This offering represents years of careful selection, responsible management, and a commitment to producing cattle that are built to work-sound, functional, fertile and efficient. As well as maintaining the quality and longevity of the cattle.

We invite you to visit the farm and reach out with any questions as you view the offering in person or online! We take great pride in the consistency of our program and the trust our customers place in us. Your feedback, loyalty and shared passion for the cattle industry are what make this sale possible year after year.

We look forward to seeing you Saturday, March 7, 2026!

Sincerely,
George Schupback and Jared Royer

TERMS AND CONDITIONS

Terms of the sale are cash. Every animal will be sold to the highest bidder. Announced changes on sale day take precedence over printed material in this sale book. Cattle sell under the standard terms and conditions of their respective breed associations.

All cattle are the buyer's property as soon as sold and will be cared for a reasonable length of time at the buyer's risk. Any person attending the sale does so at their own risk. Neither the sale management, owners, not any person connected with this sale, assumes any liability, legal or otherwise. All animals listed in the sale book as homozygous black or homozygous polled are done so to the best of our knowledge. We are not liable for any inaccuracies.

No cattle will be loaded until paid in full.

SEMEN AND INTEREST

Selling full possession and 100% semen interest on all bulls unless otherwise noted in the sale book or announced prior to the sale. Seller will retain the right to collect and/or use owner's semen on all bulls selling, for in herd use only.

A NOTE FROM THE SALE MANAGER

Welcome to the 2026 Missouri Select Genetics Production Sale. We are excited to be working with these progressive producers on this sale again this year. The Schupback and Royer families are committed to raising the best cattle possible by using all the tools available to them and their passion for this endeavor is refreshing. As you look through this sale catalog you will see some of the most elite genetics in the Simmental and SimAngus breed represented and many of the bulls and females in this sale are a result of the use of RightMate and RightChoice technology. For more information on RightChoice, please see the opposite page in this salebook.

As you look through this sale book you should be able to find what you are looking for. The yearling bulls are some of the best in the region with a blend of fresh new genetics as well as proven pedigrees to work on fescue. The age advantage bulls are stout and ready for heavy service. The fall bred heifers are very good and could be carrying your next herd bull or replacement female. The open heifers are fancy and have the potential to be your next cornerstone breed piece. We are experiencing the strongest cattle market in history, now is the time to invest in the future of your cowherd with progressive genetics just like the bulls and females in this offering.

If you have any questions about the offering or need assistance on sale day please reach out to any one of us at Allied. We will be happy to assist.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

If you have attended our past sales then you know of our LLSF Delilah donor from Lee Simmentals. She has produced our top sellers year after year, and we feel that she has outdone herself again with BAR Dynamic. Unreal spread of bulls from CE and BW, to WW and YW. Along with maternal and carcass merit. These guys have all the power you want and are sound as cats. We absolutely love this trio of brothers and will retain 50% semen interest in Lot 30 & 32. Come take a look at these bulls. They will be worth your drive!

LLSF DELILAH D557 Dam of Lots 30-32.

Lots 36 and 37 are ET brothers out of SWAG and our 1298J donor. She produced our high seller last year going to Schlueter Farms. Full brothers to the elite open heifers that we are offering choice on.

TJ SANDHILLS SWAG 816L Sire of Lots 36, 37.

TSB K310 MEDICINE MAN N016
Sells as Lot 38.

GW MEDICINE MAN 200K
Sire of Lots 38, 39.

TSB K310 MEDICINE MAN N027 Sells as Lot 39.

Lot 38 & 39 are the result of a great mating! We are excited to keep their full sib sisters back as replacements. Medicine Man progeny are very popular.

ASA QUICK REFERENCE TO EPDs, INDEXES AND \$VALUES

EXPECTED PROGENY DIFFERENCES (EPDS): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org.

Listed below are the units in which ASA EPDs are expressed:

ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

BACK FAT (BF): Inches of carcass backfat at 475 days.

BIRTH WEIGHT (BW): Pounds of birth weight.

CALVING EASE (CE): Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.

STAYABILITY (STAY): Percent of daughters remaining in the cow herd at 6 years of age.

DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).

MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.

MILK (MLK): Pounds of weaning weight due to milk.

MARBLING (MARB): Carcass marbling score at 475 days.

MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.

TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)

WEANING WEIGHT (WW): Pounds of weaning weight.

YEARLING WEIGHT (YW): Pounds of yearling weight.

YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

USING API AND TI: First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed.

For more detailed information about EPDs and \$indexes, visit: www.simmental.org Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids - our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.
