## TERMS & CONDITIONS

Terms of the sale are cash, and all cattle become property of the buyer at the time of sale. If you are unable to take delivery or pick up immediately following the sale, please acknowledge you assume all liability for those animals at time of sale. We will care for them to the best of our ability, however accidents can happen, so we recommend you insure your purchase. All animals will be sold in accordance with the Suggested Sale Terms and Conditions of the American Simmental Association unless other terms are stated in this catalog. All announcements made sale day take precedence over printed material in this catalog or other printed material associated with this sale. All cattle will be registered with the American Simmental Association and those papers will be transferred after the sale. Please note all EPDs will change between the time this catalog is printed and the day of the sale. All EPDs in the catalog will be current as of the day they are printed. Owners, their agents or any of the sale staff will not be held responsible for any personal injury, loss or accident while attending this sale.

## LIVESTOCK INSURANCE

We cannot guarantee against injury, frost bite, disease, mismanagement, or death. Therefore, we recommend you insure your purchase. If you would like the full protection of mortality insurance, please contact Jared Mohnen with Dakota Ag Insurance at 605-999-4475.

## SEMEN AND INTEREST

Selling full possession and 100% semen interest on all bulls unless otherwise noted in the sale book or announced prior to the sale. Cow Camp will retain the right to collect and/or use owner's semen on all bulls selling, for in herd use only.

## BREEDING GUARANTEE

We guarantee all bulls selling for fertility, for the first 90-day breeding season. All bulls selling will have passed a BSE within 30 days of the sale. In the event there is a problem with your bull, contact Kent or Nolan immediately and we'll do our best to make it right. If a satisfactory replacement is not available, we will issue credit to be used in future sales. We do not guarantee against injury or death, so we recommend you insure your purchase. Any claim must be made prior to culling the animal and a veterinary statement will be required.

All bred females were confirmed safe in calf on February 24th and again on April 20th by licensed veterinarians. They are guaranteed to be bred the day of the sale. Buyers may request another examination prior to delivery or pick up at their expense, but no guarantee can be made past delivery or pick up.

## CUSTOMER SATISFACTION GUARANTEE

We have done our best to represent the sale offering as they are, however our Customer Satisfaction Guarantee protects you against getting cattle that are not what you thought they were. If you have a problem with an animal, it's our problem. We are the only ones who can fix it, so please contact us and give us a chance to help.

# Welcome

Welcome customers to our 4th Annual Grass Time Sale at Cow Camp Ranch. We decided years ago to provide customers with two opportunities to purchase CCR genetics to better serve our customer base. If you have only sourced cattle from our earlier sale, expect the same quality and service in the Grass Time Sale.

The cattle market has been an immense amount of fun over the last year, with record prices. We at Cow Camp find great joy and are fueled by customer success. We are thrilled that customers are getting the value for their cattle, and we can play a small part of their success as a genetic provider. We greatly appreciate the support and relationships we have built in the seedstock business. Feel free to stop by and view the sale offering anytime ahead of the sale, we would be proud to show you around.

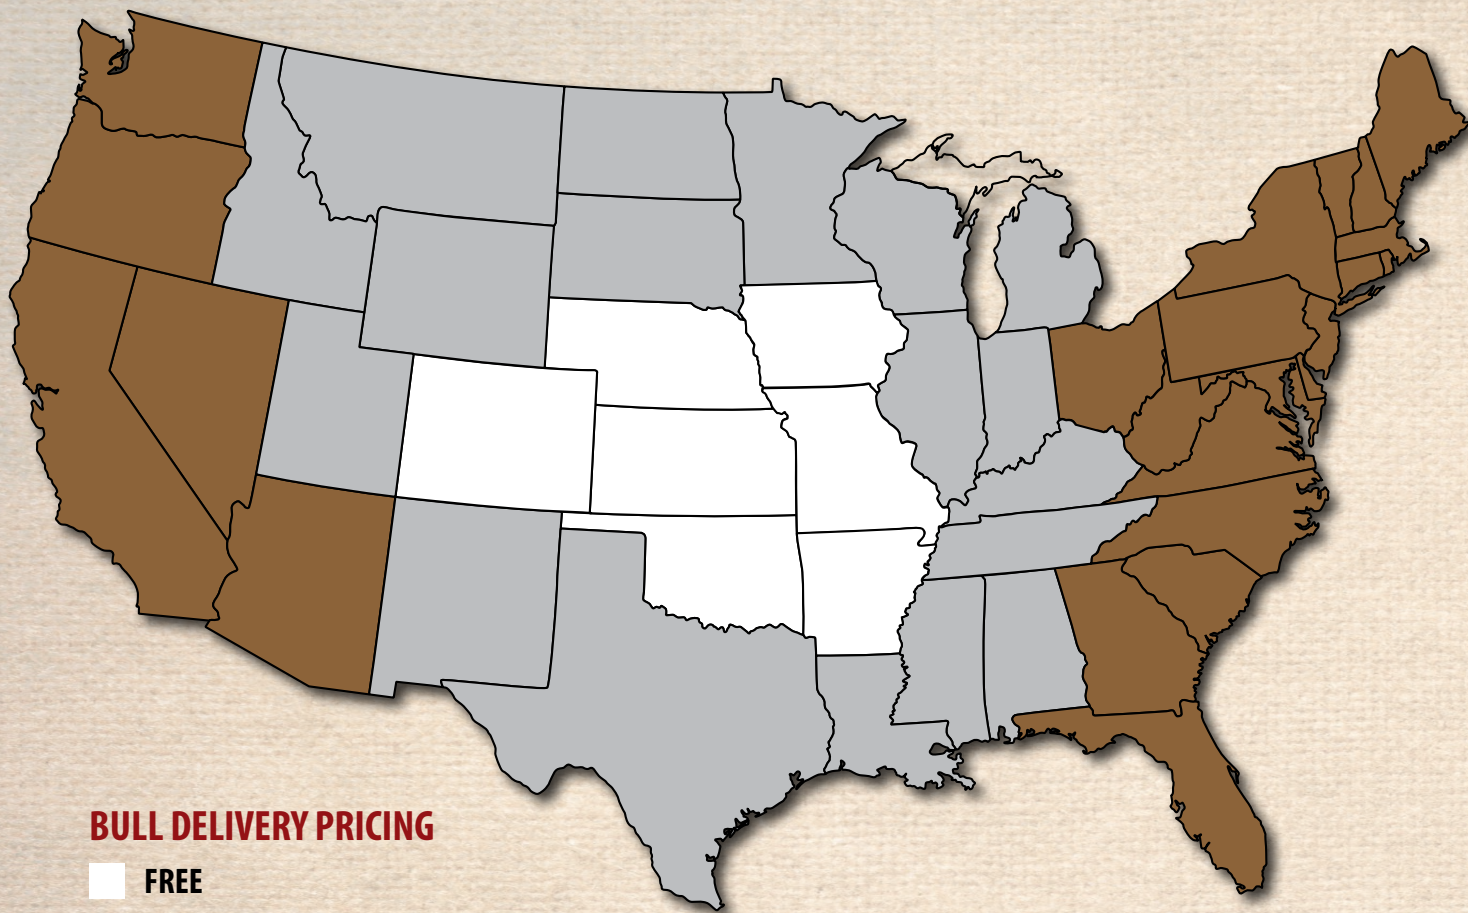

Regarding the sale, we made the choice some time ago that all of our bulls will be sold in an age advantage package. We have seen that these bulls will hold up better, cover more cows, and can be better developed to meet rancher demands. These bulls have been through rigorous performance and genetic testing, and if the bulls have made it to this point, we have the utmost confidence that they will work for you. The females come from the heart of our replacement pen and have the genetic profiles and type to pull any program in the right direction. We are excited about these females, and they are mated to some of the best performance bulls the business has to offer.

If you have any questions regarding the sale, please do not hesitate to reach out. We hope to see all on April 25th in Lost Springs.

Sincerely,  
*Cow Camp Ranch*  
*The Brunner Family*

Brunner Family Christmas 2025

## BULL DELIVERY PRICING

- FREE
- \$ 300 / head
- \$ 400 / head

# Delivery and Volume Discounts

## BULL TRUCKING OPTIONS

- \$100 off bulls loaded out on sale day.
- Delivery will begin following the sale. If necessary, we may ask that you meet the truck at central locations to stay on schedule.
- \$50,000 or more total purchase on bulls = free delivery to central locations.

## VOLUME DISCOUNTS

## COW CAMP FEEDER CATTLE MARKETING OPTIONS

Cow Camp Inc, established in 1989, is our family-owned commercial cattle feeding operation. We have purchased and fed cattle from our bull customers for over 30 years now, and we will always continue to be active buyers of Cow Camp Genetics. There are several different feeding and marketing options as well as feed lot placement options. If you have any interest in selling or retaining interest in your calves through Cow Camp Feed Yard, please contact Tracy Brunner at (785) 965-2228.

Likewise, we have a strong relationship with Superior Livestock. If a customer has load lot capabilities, we would have an interest in assisting you with marketing your calves. We have numerous loads of calves with the Cow Camp and Allied logo marketed annually on Superior. We view it as an extremely effective avenue to market your calves with the largest buyer base across the U.S. If you have any interest in marketing calves do not hesitate contacting us.

# From the Sale Manager

Welcome to Cow Camp Ranch Annual Grass Time Sale. What a great time in the cattle industry we have experienced in the first months of 2026. The cattle market continues to hang on near record highs, and consumer demand remains strong. We hope you have had some moisture this spring, and green grass has found your operation.

The Grass Time Sale will feature the largest offering of performance-based Simmental & SimAngus bulls and females to date. The uniformity and consistency of the bulls are remarkable. Practical built, high-value genetics that have gone through a magnitude of performance testing are the trademarks of the Cow Camp bulls. The females will represent an opportunity for customers to add incredible breeding pieces to their herd in volume. The females who have come from the Cow Camp program are receiving rave reviews across the country and adding value to countless registered programs.

Ranchers have come to expect superior genetics in the Cow Camp sale. However, they continue to push hard for service allowing for customer success. Numerous loads of CCR prefix cattle continue to ring the bell across video platforms and auction barns across the Midwest. The operation feeds numerous loads of customer cattle each year in their feedlot near Lost Springs. They not only breed for superior genetics, but they believe in their product and want customers to gain from their genetic purchases. If you have not asked about the buy-back program or marketing options, do not miss out!

We hope to see you on April 25th in Lost Springs! If we can be of any assistance, please do not hesitate to reach out for service.

Sincerely,  
Marty Ropp, Corey Wilkins and Jared Murnin

## About the Bulls

### DOCILITY RATING

All Bull lots will also have a Docility Rating. This is our own evaluation of the bulls and not based on their EPD. Both measurements should be considered when making a buying decision. The bulls are ranked 1-3. Anything worse than a 3 (4-6) has been culled from the herd. The definitions are as follows:

- 1 - Docile (Gentle and easily handled)
- 2 - Restless (Quieter than average, but can be stubborn)
- 3 - Nervous (Manageable, but may require a different level of management and respect when handling)

### CALVING EASE STAR

All Bull lots have a Calving Ease Rating. This is a star rating system to help you select bulls based on how we believe they will calve. Always remember that the cow contributes 50% of the genetics and this should be taken into consideration when making your final mating decisions. The definitions are as follows:

- \*\*\*\* Can be used on virgin heifers with confidence
- \*\*\* Potential heifer bull, should be used on young cows first
- \*\* Acceptable calving ease, but should not be used on heifers
- \* Terminal sire, should be used on mature cows only.

# Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

**ACCREDITED GENOMIC PLUS** – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

**ACCREDITED CALVING EASE** – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

**ACCREDITED TERMINAL MATE** – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

**A DIFFERENT APPROACH TO BULL DEVELOPMENT - GROWN SLOW TO INCREASE LONGEVITY FOR YOU**

The shift in our operation to develop 18-month-old bulls has allowed us to become more creative in our bull development program, in order to deliver a better product to commercial cattlemen.

All our bulls within the sale offering come in a fall born 18-month-old package. Pre weaning our development process looks similar to how every commercial cattleman runs their cattle. We look for cost effective feedstuffs and maintain the calves at a level or nutrition which will show their genetic potential. Our fall born calves come into weaning pens in April in May and are left there for a few weeks to monitor health and we begin making culling decisions for our bull sale.

Post weaning is where our bull development is vastly different versus most. After weaning and monitoring them for a few weeks for health the bulls are then returned to forage for the summer months. They graze a variety of native forages the Flint Hills has to offer along with Triticale. When summer ends the bulls will weigh near 1,000 pounds for their yearling weight. After Labor Day the bulls return to headquarters, and we begin feeding them a more traditional bull development ration ahead of our bull sale.

Our goal has always been to sell bulls that hold up well but feel this type of development is another step to ensure longevity and added breeding ability in the bulls that you purchase here. We think you'll find the bulls sound on their feet and legs, athletic and ready to endure that first breeding season that typically is the hardest on them.

*Can't make it sale day?*

**BID LIVE WITH SUPERIOR OR LIVE AG**

## REDUCE RISK WITH AGE ADVANTAGED BULLS

There are several important and logical reasons why commercial customers should consider purchasing bulls with a few more months of age and development on their side. Some of the benefits are obvious, but some others we don't always consider.

- Older bulls have the ability to service more females in a shorter period of time than yearling bulls. Age advantaged, 18-20 month old bulls should be capable of safely settling at least 5-10 more females in their first breeding season with minimal risk over a 45 day breeding period due to greater fitness, superior average semen production and maturity.
- Over-fat bulls are an issue in this industry. A high quality, slower paced development program is possible when producing older bulls for sale. Age advantaged bulls can simply be developed more slowly and still reach target weights and marketable condition with ease. Too often bulls developed to be sold as yearlings are subjected to extra push nutritionally in order to make those same thresholds. When done improperly, the results can be reduced longevity and lifetime service because of damage to feet, soft skeletal tissues and in extreme cases even internal organs associated with excess or faulty nutrition and exaggerated growth rate.
- Certainly, older bulls lose less weight and strength during their first breeding seasons. With that in mind the risk of your bull taking a week off or quitting the process of breeding cows completely is reduced. This is especially true in the more challenging breeding environments of the southern US.
- More of the guess work is taken out when purchasing older bulls. Strengths and flaws can both be more evident to buyers with an extra 6 months of development. For example, by that age foot and leg or disposition issues will be more evident and a higher percentage of potential problem bulls should have been identified and removed from the offering.
- Sorting older bulls does not give license to buy poorer genetics just because they have more age. It is important to make sure the age advantaged bulls you are evaluating are not just the leftovers after the more valuable bulls were not marketed as yearlings and low genetic value bulls should never be an option, regardless of age.

Many producers will always favor purchasing high value, younger bulls because of the potential of an extra season of use later in life and often sellers prefer the simplicity and lower cost of producing them. Correctly developed older bulls however, simply have a greater probability of breeding success in the first season than when they were younger. Give them a try for reduced risk.

When we decided to add a second sale for our customer base in 2023, we also wanted to find an avenue to market some of our registered fall bred heifers. We have been in expansion mode the last several years and this is an opportunity for buyers to source registered fall bred heifers at an auction. The females represent some of finest genetics and come from are very own replacement pen.

The heifers are genetically backed by some of the most proven and prolific genetics in the beef business. If you are in search for a couple to elevate your registered program or are looking at heifers in volume, we feel this strong offering of females will suit your needs.

Pontiac will become one of the maternal greats in the Simmental business. These higher percentage females are sensible in terms of mature size, big bodied, and striking for phenotype. The genetic value the females will provide is unmatched amongst purebreds for genetic balance across the board. We feel the Pontiac females can serve as cornerstone pieces for any operation.

FALL BRED HEIFERS

CCR CHOCTAW 0289K

We are proud of what we are seeing of our first progeny of Choctaw to bring to customers in 2026. The bulls were one of the highest selling sire groups in our January sale, and the females will supply an extra punch of power. These females are big ribbed, massive hipped, and just have a brood cow look.

CCR CHOCTAW 0289K Sire of Lots 6, 66, 128-135.

CCR MS CHOCTAW 4521M Sells as Lot 128.

FALL BRED HEIFERS

LRS CROSSFIT 4306J

CrossFit is a first-generation SimAngus bull we purchased from the Lassle Simmental Ranch in Montana. The cattle just do it all and offer a very pleasing phenotype. The females read with extra fleshing ability, and will raise the bar for foot and udder quality. The Crossfit cattle are truly the cattlemen's kind.

LRS CROSSFIT 4306J Sire of Lots 14, 57, 63, 67, 83, 93, 118, 136-147.

CCR MS CROSSFIT 4536M Sells as Lot 136.

**CCR COMMANDER 5135F** Sire of Lots 74, 208, 209.

**ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES**

**EXPECTED PROGENY DIFFERENCES (EPDs):** EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit [www.simmental.org](http://www.simmental.org).

**Listed below are the units in which ASA EPDs are expressed:**

- ALL-PURPOSE INDEX (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)
- BACK FAT (BF):** Inches of carcass backfat at 475 days.
- BIRTH WEIGHT (BW):** Pounds of birth weight.
- CALVING EASE (CE):** Percent of unassisted births when used on heifers.
- CARCASS WEIGHT (CW):** Pounds of carcass weight at 475 days.
- STAYABILITY (STAY):** Percent of daughters remaining in the cow herd at 6 years of age.
- DOCILITY (DOC):** Percent of offspring receiving a disposition score of 1 (docile).
- MATERNAL CALVING EASE (MCE):** Percent of unassisted births in first-calving daughters.

- MILK (MLK):** Pounds of weaning weight due to milk.
- MARBLING (MARB):** Carcass marbling score at 475 days.
- MATERNAL WEANING WEIGHT (MWW):** Pounds of weaning weight due to milk and growth.
- RIBEYE AREA (REA):** Square inches of carcass ribeye at 475 days.
- TERMINAL INDEX (TI):** Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)
- WEANING WEIGHT (WW):** Pounds of weaning weight.
- YEARLING WEIGHT (YW):** Pounds of yearling weight.
- YIELD GRADE (YG):** Carcass yield grade score at 475 days.

**\$ INDEXES:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

- ALL-PURPOSE INDEX (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.
- TERMINAL INDEX (TI):** Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

**USING API AND TI:** First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr.= \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed.

For more detailed information about EPDs and \$ indexes, visit: [www.simmental.org](http://www.simmental.org) Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids - our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

# BID FROM ANYWHERE

with **LiveAg**  
PUREBRED

- 1. VISIT LIVE-AG.COM**  
Navigate to the **"Purebred"** tab, located in the main menu. Select the auction of choice.
  - 2. LOG IN / CREATE AN ACCOUNT**  
Select the **"Login or Create an Account"** button. Fill out the required fields to bid online. Agree to the terms of service, and finish with the **"Register"** button. An account is not necessary to watch an auction.
  - 3. REGISTER TO BID**  
Once logged in, find your sale of choice and click **"Register to Bid"**. Agree to the terms and conditions, and click the **"Register"** button. Your request will be approved in a timely manner.
- \* CALL OUR TEAM WITH ANY QUESTIONS**  
We're dedicated to ensuring you have a positive bidding experience. Please call **817-533-6699** with any questions.

## HOW TO PARTICIPATE

**1 CREATE AN ACCOUNT**  
Click "create account" at the top of the page on [bid.superiorlivestock.com](http://bid.superiorlivestock.com). Fill out the required information to bid online. Agree to the terms of service and finish with the "register" button.

**2 REGISTER FOR A BUYER NUMBER**  
From the home page or the "all auctions" page, choose the sale you're interested in. Once selected, click the "request a buyer number" button. Verify your email address with the email verification link. To verify your mobile number, click "send token". Follow the steps to authorize your mobile device and click "submit".

**3 BID SUCCESSFULLY**  
You will only have to complete the two-step verification process one time. After that, you will be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen. You will be contacted by the ranch or sale manager for your payment and shipping plans.

IF YOU NEED HELP REGISTERING TO BID  
OR TO VIEW THE AUCTION PLEASE  
CONTACT SUPERIOR LIVESTOCK
