DVAuction
Broadcasting Real-Time Auctions

We are looking forward to seeing you at the 2026 High Altitude Bull Sale. The cattle business has been a tremendous amount of fun over the last year, with record-breaking prices. We have found great joy in seeing our customers succeed, and hope the prices and demand will remain stable for many more years to come.

The 2026 sale is our most uniform set of herd sire prospects to date. We are proud of the genetic potency and type these bulls will offer to our customer base. Our commitment to delivering genetics that excel at altitude has never wavered. We have invested greatly in ensuring we have bulls who answer the call with the challenges of altitude. Every bull has been PAP tested twice and comes from females that are PAP tested. Generations of low PAP scores are behind every bull's pedigree in the 2026 sale.

We hope you can find time to stop by the ranch to view the bulls. For past customers, we greatly appreciate the trust you place in our program, and for future customers, we look forward to the opportunity to serve you. If you have any questions or inquires, please do not hesitate to reach out. We hope to see you all soon!

Sincerely,
Shane & Beth Temple

THE SHANE AND BETH TEMPLE FAMILY

SALE TERMS

All cattle sell under the suggested terms and conditions of the American Simmental Association.

AFTER SALE CARE

If bulls are left at T-Heart Ranch after the sale, we will feed them at no charge until May 1, 2026. The bulls are the property of the purchaser after the sale, and we cannot be responsible for accidents to bulls left after the sale.

GUARANTEE

Every bull in the sale carries a 100% guarantee for fertility and structure for the first breeding season, 90 days from the first turnout date, provided the bull is managed for proper and acceptable nutritional and physical health. In the event a problem arises during the first breeding season, please contact T-Heart Ranch immediately to report the claim. This guarantee does not cover injury, mismanagement, neglect, and/or death. If the bull is proven to be a non-breeder, we will replace the bull with a satisfactory replacement or issue credit less the salvage value to be used in a future sale. A signed veterinary statement will be required.

INSURANCE

Mortality insurance will be available for purchase at the sale. If the bulls are left at T-Heart for later delivery, we strongly recommend you purchase the insurance. We will take the best care of the bulls possible but accidents can happen.

TRUCKING

Free delivery within 500 mile radius to central sale barns or another agreed upon location. We will assist in making arrangements for delivery outside that area on an individual basis as needed. We will give a \$50 credit per bull for taking them home on sale day.

LIABILITY

Anyone attending the sale attends at their own risk. Breeders and sale force will not be held responsible for any personal injury to anyone attending the sale.

ACCOMMODATIONS

Windsor Hotel – Del Norte	719-657-9031
Hampton Inn – Alamosa	719-480-6023
Holiday Inn Express – Alamosa	719-589-4026
Best Western – Monte Vista	719-852-5921

EPDS

All cattle will be registered in the American Simmental Association. All EPDS are the most current BOLT at the time of printing conducted by IGS and the American Simmental Association. Please note that EPDS may change from the time the sale book is printed until registration papers are transferred.

RETAINED SEMEN INTEREST

The buyer will receive full possession, 100% salvage value, and 2/3 semen interest of any bull purchased in this sale, while seller will retain 1/3 semen interest in any bull that it sells. Seller's retained semen interest is a royalty interest that entitles seller to 1/3 of any revenue from the sale of that bull's semen, unless other arrangements are made with T-Heart Ranch prior to the sale of semen. Seller's retained semen interest shall remain even if the bull, or any interest in the bull, is later sold to a third party; and, the buyer shall be solely responsible for notifying any later third party buyer of the Seller's retained semen interest and for ensuring that Seller's retained semen interest is satisfied if semen is ever sold. Seller will not be responsible for any expenses directly or indirectly related to semen collection or promotion of a purchased bull, unless the buyer and seller agree otherwise in writing prior to semen collection. Seller's retained semen interest also includes the right of seller to collect semen on the purchased bull at seller's sole expense and at the buyer's reasonable convenience.

ANNOUNCEMENTS

Announcements made from the auction block during the sale take precedence over printed material in this catalog or other printed material associated with this sale.

HEALTH & VACCINATIONS

All bulls have been tested and found negative for Trich and BVD-PI3. They have been vaccinated and boosted with IBR, BVD-PI3, BRSV-4, Blackleg & Fusagard, and have been on a regular deworming schedule since weaning. All the bulls have passed a breeding soundness exam that includes live semen evaluation, palpation and scrotal measurement performed by Dr. Jeremy Sowards. All the necessary health tests have been performed and interstate health papers will be available sale day. Ultrasound results and scrotal measurements will be available online and at the sale.

True high altitude cattle.

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

YOUR #1 SOURCE FOR PAP TESTED GENETICS

High Mountain Disease AND PAP TESTING

Commitment to customer success means understanding, then meeting their needs. At T-Heart Ranch that commitment is centered squarely on providing the altitude adapted, PAP tested genetics that are an absolute necessity to their core customer base. After nearly 25 years and 20,000+ head tested, few if any, have more experience producing and improving PAP tested seedstock. They have a solid grip on what it takes to provide a product that will thrive at altitude and provide advanced value to everyone who chooses their seedstock each year. With the very lowest elevation on the ranch at 8,000 feet, the T-Heart herd is constantly selected for improved PAP resistance and that means their customers can expect more risk abatement too.

MULTI GENERATIONAL PAP TESTING ON EVERY BULL IN THE OFFERING

At T-Heart Ranch we offer more than just a PAP score. We take it a step further in testing every one of our registered cows to ensure we can stack multiple generations of PAP testing to allow our customers to get the most information. Our entire herd lives at high altitude. We are confident that you are receiving genetics that will ultimately help your program excel in the high country.

Our decades of data collection in PAP information have allowed us to uncover the most profit-oriented genetics that work best at high elevations. You can rest assured when you purchase T-Heart bulls you're buying a product that will ultimately add value to your calves and excel in the High Country.

T-Heart Ranch will continually strive to be your source of High Altitude Bulls for years to come.

Bovine Pulmonary Arterial Hypertension, better known simply as "Brisket Disease" is a significant issue to beef producers, particularly in mountain states and at significant altitudes. This is especially true for those that summer graze from 6,000 to in excess of 9,000 feet. Depending on the year, calf losses can be in excess of 20% at higher levels and can be truly crippling to any operation. Though there are environmental challenges that can exacerbate these losses, genetic predisposition and development acclimation are the factors with the most potential to help mitigate the challenges and increase profitability. Selection over generations of acclimated and true high altitude, PAP tested seedstock is what you will find with the T-Heart herd and this is crucial to their customers.

Today, there are an increasing number of seedstock sources promoting and offering PAP tested bulls. Some of this is due to the increasing need for these genetics and some is driven by a desire to address feedlot heart-related deaths that are on the rise and may include some of the same risk factors that affect PAP scores. For the most confidence in PAP resistant genetics however, your best choice is to look for those born and raised, and then PAP tested, at more extreme altitude like those at the T-Heart Ranch. Just like a cardiologist uses a stress test to help determine your true risk of heart disease, PAP tests conducted at a high stress level above 7,500 feet simply have much greater reliability than tests conducted at 5,000 feet or lower. Sure, there may be some correlation, but when PAP losses really matter to your operation doesn't it make more sense to choose those who have spent their lives under conditions similar to yours and are truly "stress tested" for PAP?

THE BULLS SELLING IN THIS SALE WERE ALL PAP TESTED BY DR. TIM HOLT AT 8,000 FT ELEVATION AT OUR L-CROSS RANCH HEADQUARTERS. EVERY BULL IN THE SALE COMES FROM A MULTIPLE-GENERATION PAP TESTED PEDIGREE.

From the Sale Manager

Welcome to the 2026 High Altitude Bull Sale in La Garita, Colorado. Once again, the commitment of pursuing genetic excellence with cattle that will thrive at Altitude has culminated in the highest quality sets of bulls to date for the Temple and Campbell families. As past customers will attest, these bulls are "True High Altitude" cattle who will not only survive at elevation, but pass on the genetics to improve PAP and increase your bottom line.

As the market has demanded more PAP-tested genetics, buyers have found an influx of opportunities to purchase bulls raised at lower elevations that sell with a PAP test. However, at T-Heart Ranch, buyers have a chance at purchasing genetics that have been strictly selected on PAP for generations. Every bull comes from females who have been PAP tested for generations and sells with two PAPs themselves, once at weaning and again at yearling. No operation has been more committed to delivering a superior product for customers at elevation. Come see for yourself - the difference in these cattle is real.

The T-Heart and Campbell families' genetics not only thrive at elevation but also offer the versatility to create premiums in the feedlot and offer the maternal qualities to create a profitable ranch. Countless loads of High Altitude sired calves ring the bell on the large summer video sales. Maternally, the uniformity of the cowherd will be rivaled by few in the country. Excellent udders, great feet, and superb fleshing ability are the standard of the T-Heart cowherd.

We hope you can join us on March 28th in La Garita, Colorado. If you are in search of high-value genetics that will stand the environmental test of altitude, you have come to the right place. If we can be of any assistance, please do not hesitate to reach out.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

HOW TO PARTICIPATE

1 CREATE AN ACCOUNT

Click "create account" at the top of the page on bid.superiorlivestock.com. Fill out the required information to bid online. Agree to the terms of service and finish with the "register" button.

2 REGISTER FOR A BUYER NUMBER

From the home page or the "all auctions" page, choose the sale you're interested in. Once selected, click the "request a buyer number" button. Verify your email address with the email verification link. To verify your mobile number, click "send token". Follow the steps to authorize your mobile device and click "submit".

3 BID SUCCESSFULLY

You will only have to complete the two-step verification process one time. After that, you will be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen. You will be contacted by the ranch or sale manager for your payment and shipping plans.

IF YOU NEED HELP REGISTERING TO BID

Our decades of data collection in PAP information have allowed us to uncover the most profit-oriented genetics that work best at high elevations. You can rest assured when you purchase T-Heart bulls, you're buying a product that will ultimately add value to your calves and excel in the high country.

T-Heart Ranch will continually strive to be your source of High Altitude Bulls for years to come.

REDHILL ACCELERATE 12B 23H || Sire of Lots 36-47.

Total outcross bull that will offer some different blood for long-time customers. We have used Accelerate heavily in our commercial and registered program. The type of Accelerate sons offer is truly the cattlemen's kind. He is sensible for mature frame size, stout hipped, and no doubt will add fleshing ability. The sons offer multi-trait excellence across the board. If you are in search of bulls to add value to every facet of your operation, buy an Accelerate son.

Average PAP of Progeny: 41

THR 5255N || Sells as Lot 48.

“Our ranch has been buying bulls from the Temples since 2014. Our summer range is in the Sierra Nevada mountains at 8 - 9,000 feet and the incidents of altitude sickness are almost non existent now. We have also purchased bred replacement heifers from them and their quality matches the bulls. Beth and Shane are amazing to work with and the herd they have developed fits anyone’s program, regardless of elevation. Their focus on carcass quality is also helping create a better product for our end consumer, which helps the whole beef industry.”

GW MEDICINE MAN 200K || Sire of Lots 48-68.

Calving ease, great maternal traits, and extra marbling can be found in volume in the GW Medicine Man sire group. The bulls quickly command your attention with their balance, body, and structural integrity. Look for many of his sons to be heifer safe, and Medicine Man sons will be multi-purpose herdsires who deliver value and profitability to ranchers.

Average PAP of Progeny: 39

CCR THR EL DORADO 4142J || Sire of Lots 69-75.

Multi-trait excellence is what you find in an exceptional set of El Dorado sons in 2026. The sons will add frame and pay weight while providing ample calving ease and strong maternal traits. The first daughters are coming into production and will prove to be El Dorado's lasting legacy at our ranch. We feel these sons offer the total package.

Average PAP of Progeny: 38

Thunderhawk was a bull we chose to retain and run in herd, and the phenotype of his progeny will make him crowd favorites come sale day. The bulls are striking for balance, dense in their build, and should make first-class females. The bulls are dense and are packed with muscle shape and will be true power bulls.

Average PAP of Progeny: 40

RFS ROLL CALL || Sire of Lots 102-107.

A newly sampled sire group to choose from in 2026. We like the versatility that Roll Call brings to the table. The bulls are big middled and offer more pay weight opportunity from a growth perspective. If you are in search of enhancing terminal traits these bulls will be great options for ranchers to capture more pounds on payday.

Average PAP of Progeny: 39

reference sire

ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES

EXPECTED PROGENY DIFFERENCES (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org.

Listed below are the units in which ASA EPDs are expressed:

ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario.

BACK FAT (BF): Inches of carcass backfat at 475 days.

BIRTH WEIGHT (BW): Pounds of birth weight.

CALVING EASE (CE): Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.

DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).

MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.

MILK (MLK): Pounds of weaning weight due to milk.

MARBLING (MARB): Carcass marbling score at 475 days.

MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.

TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario.

WEANING WEIGHT (WW): Pounds of weaning weight.

YEARLING WEIGHT (YW): Pounds of yearling weight.

YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

For more detailed information about EPDs and \$indexes, visit: www.simmental.org

PLEASE JOIN US AT THE RANCH...

FROM MONTE VISTA, CO:

Start out going North on Highway 285 for 17.2 miles, turn left on County Road G, continue 6.1 miles through town of LaGarita and veer right at County Road 41G (stay on pavement) continue 2.8 miles to sale location.

FROM SAGUACHE, CO:

Start out going South on Highway 285 for 17.4 miles, turn right on County Road G, continue 6.1 miles through town of LaGarita and veer right at County Road 41G (stay on pavement) continue 2.8 miles to sale location.

FROM DEL NORTE, CO: (some gravel road)

Start out going North on Highway 112 for 3.2 miles, turn left on County Road 33 (sign says "La Garita") after 2.7 miles County Road 33 turns into County Road 38A, continue for 3.1 miles, then take a sharp left onto County Road 41G (now on pavement) continue 2.8 miles to sale location.
