ELITE FEMALE SALE

70 FEMALES SELL AT 1:00 PM CT **OCTOBER 23, 2026** AT THE RANCH IN BLOOMFIELD, IOWA

WELCOME

Welcome to our first Fall Elite Female Sale! We are very humbled and honored to invite you to our ranch to evaluate the females we have to offer. I feel as if we're in a time where we need top quality females to help build this herd across the country. We are at a 70 year low in cow number inventory. We will not be able to grow it back near as soon as needed. But the current market will give you the American cattlemen the opportunity to grow at your pace to build as needed.

We are offering our very best heart of the herd females that have been the cornerstone of our program. The females will represent the focal point of our breeding philosophy. Couple of breed leading matrons will headline the class in October. Leading the PB division will be Schooley Miss E69 171J. The 171J progeny have been leading the way for Schooley Cattle Company. On the percentage side we have Schooley Miss 823F 068H. Many have recognized her full brother Schooley Haggard. Her ability to make herd sires is unmatched. The bred heifer division will showcase the heart of the herd for maternal excellence. Females that will thrive in any environment, very sound feet and udders, and docility second to none. All the females represented that day will be raised and bred right here in Bloomfield. Heifers were pastured on fescue until the last week of August. We're ultrasound on July 23, and will be guarantee bred the day of the sale.

We appreciate the help from Allied Genetic Resources this year as they will be assisting in the sale marketing of the females. We are confident the females represented will be a very important asset to your program as we rebuild this great cow herd. I want to thank my family and all the young men helping day in and day out in preparing for this event. Your commitment to our program is very much appreciated. We thank all of our valued customers for the opportunity to work alongside you with your marketing needs. Feel free to stop by prior to sale day to look and talk the cattle. We hope you're able to come eat lunch with us on sale day and enjoy the fellowship with other cattlemen. If you have any questions, feel free to call me or the Allied team members.

God Bless,
Roman Schooley

FROM THE SALE MANAGER

What a privilege to get to be involved in the Schooley Cattle Company Female Sale. The females represent the heart of the Schooley program and decades of careful breeding decisions. It will be exciting to see where these females go because their type and genetic value that will no doubt move a program ahead at a rapid pace.

As you study the catalog it is easy to get excited about the proven donors who start off the offering. The donors offer a storied past who has consistently raised high sellers' year in and year out in Bloomfield. The robust offering of Spring Bred heifers should generate an equal amount of excitement. The genetic progress they represent for potential buyers combined with incredible type will pave their way to be cornerstone breeding pieces for their new operations. Finally, if you prefer the fall calving season flip towards the back of the catalog and you will find 5 of Schooley's very best fall females.

The Schooley program has established itself as a premier trusted genetic source for Sim Genetics. The program has been committed in pushing the envelope for genetic value while maintaining the cowman's type. The commitment to customer service, adding value to customer's cattle is rivaled by few in the business. We hope you can join us October 23rd in Bloomfield for a great event. If we can be any assistance, please do not hesitate in reaching out.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

Our top producing PB with a story book career at Schooley Cattle. Her influence in our herd will be seen for generations to come. Her ability to raise bulls and females is rare combination with genotype and phenotype. Her daughters are built with perfect udder design, soft center, excellent feet and legs with very good docility. She's raised numerous breeder bulls, including Schooley night Train selected by Beach cattle, Schooley Lazuras purchased by clear Springs, and Gibbs farms. Schooley Movement to Rob Widner of Arkansas. Many more sons have found progress programs. We have never sold a daughter until last year. Her Schooley Knight open heifer Schooley Miss 171J 511N sold have interest for 50,000 to English Oaks Ranch. She avg 14 good embryos over her lifetime. This will be one of the great females to sell in 2026. We are looking forward to seeing what she can do for your herd!

Schooley Miss 823F 068H is the best percentage female to ever come from Schooley cattle co. An own daughter of the Great Schooley Miss 823F. A full sister to the very popular Schooley Haggard. Her sons have topped our bull sales for several years in a row. Her ability to sire bulls that grow into herd sires is unmatched. She breeds growth with marbling and in a very consistent uniform set of calves. This year we have the best set of females from the great 068h and were excited to move forward with them. We have only sold a couple of her daughters. Only a couple of 068h daughter are in production outside of our herd. Her sons include: Schooley Limitless to English Oaks for 55,000, Schooley Newsboy to Hart Simmentals 45,000. Schooley Newcomer to Clear Water Simmentals, Lucky Penny for 42,000. Schooley Newsreel to Williams Bros for 22,000. Schooley Manhattan to Lazy TV for 22,000. Schooley Khalid to Heath Larsen for 20,000. Schooley Longshot to Teter Ranch for 17,000. Her 11 sons have avg over 25,000! She avg 8 good embryos last 3 flushes and is really starting to work well. We are allowing the next progressive breeder to capture her ability to transform the breed.

A female who's designed to make maternal greatness. 114J is one of Schooley Standouts most recognized daughters for transmitting maternal characteristics into her progeny. Excellent udder, sound feet and legs, and wonderful docility. Very modest package size frame allows her to work in any environment. She continues to add sale bulls to the top tier of the sale. Her best attribute to the ranch are her deep body, wedge made daughters, with excellent udders. Her daughters are beautiful designed and very efficient. She flushes very well avg over 10 good embryos per flush. She will continue the great family stemming from 823F.

Schooley miss 547N comes from two of the great cow families at schooley cattle company, combining the 823F and the 171J. Those two females have been the cornerstone of our genetic progress. 547N is very complete in her makeup with breed leading EPDs to build a foundation around. Haggards ability to breed cattle with substance, foot quality, unmatched genetic value, all in a moderate efficient package. Schooley Miss 171J continues to deliver very maternal oriented females that are perfect udders, with muscle shape and perfect feet. 547N should go right to the donor pen once she calves to the up and coming Schooley Newcomer. I had planned to keep her back but Corey said we need to load the box heavy. I will be very interested in that calf!

551N is a rare combination female that ties phenotype with genotype. She the looker of the group with great structure, soft shaped, excellent feminine look. She a PB that could very easily rise to the top of anyone's herd. Her mating options are wide open as she's a little different pedigree. We are very high on this female doing big things in the breed. She will calve to our newest herd sire LRL Geronimo. I'm impressed with Geronimo size, width and shape. His EPD spread should allow for a very marketable calf. Donor time!

567N is the combination of the great Schooley Krown back to 171J. We are very impressed with her docile attitude and over all completeness. She got plenty of frame to deliver high performance cattle with marbling and stay ability. This is all the kind of stuff that I gotta do right here. She reminds me a lot of 171J with snip nose. She will make baldy progeny if so desired. She's the very first females of that flush to ever be sold. We are currently flushing a full sister that will headline her sons in the upcoming bull sale. To top it off she should have a good udder since. The Krown and 171J are udder improvers. Another donor prospect!

Schooley Miss 537N is a very hard female for us to part with. Her sire JC Lawless is doing a great job of making bulls and females. 537N is the very best Lawless female we had in that first group. She's very maternal made, with excellent shape and dimension. Her feet look great and her udder seems to be forming correctly. Her dam is one of the up and coming donors her at the ranch. Her dam 363L is an own daughter to the great 068H. Great cow family behind this female. I look for big things from here and you will want to flush right away as she's an outcross to many of the popular bloodlines.

Our very first set of RFS Roll Call females have been very popular to the guest that have seen them. 5008N is reason why people love them so much. Her unmatched power and dimension set her apart from the contemporary group. But still maintains the lady look we all desire. All up to the new herd sire from Wildberry farms WBF Pledge. This mating should be at the forefront of the industry with limited use to Pledge.

5039N is a full sister to Schooley Megatron. Megatron was selected by Teter ranch in Kansas. Our Megatron calves are really looking the part in both bulls and females as we head into fall. This female is destined to follow her big brothers hoof prints. She's definitely a lady with all the power and performance bred into her lineage. Her dam 200K is a full sister to Schooley Krown. Epic on top side and Krown on the bottom. Very complete female with our best cow family behind her.

A full sister to the great flush of brothers in last Feb bull sale. Schooley Newsboy Schooley Newcomer to name a couple of them. She possess the same kind of presence and foot quality we are striving for. Her dam miss 068h always deliver the most uniform and performance cattle of any here at the ranch. 510N should be a cornerstone female for years to come with a pedigree wide open.

543N commands your attention with her size and power. Larger framed female that will bred big time bulls for you. She backed by one of the great cow families her at ranch. Her great grand dam is E69, same dam as 171J. Performance cattle come from big time cows and 543N is no exception. True breeding piece here with lot 15. Bred up to Pledge to make an outcross pedigree that will separate you from the pack.

599N is the first Krown daughter in a very consistent string of daughters. Big time numbers along with big time presence. She reminds me a lot of the high selling Krown daughter last year selling for 46,000 to Eichacker Simmentals. Bred just about identical as well. 599N will definitely lead the Krown sisters this year as well. Perfectly constructed with loads of body, dimension and big time cow family behind her! Definite donor potential.

SCHOOLEY MISS 131J 5045N SELLS AS LOT 25

TERS KODIAK

SIRE OF LOTS 26-33

Wonderful structure quality and presence can be found in the Kodiak sire group. Kodiak has separated himself as one of the most maternal Essential sons in the beef business. The Stay power and maternal strength of these females will certainly be building blacks for the future.

ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES

EXPECTED PROGENY DIFFERENCES (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org.

Listed below are the units in which ASA EPDs are expressed:

ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario.

BACK FAT (BF): Inches of carcass backfat at 475 days.

BIRTH WEIGHT (BW): Pounds of birth weight.

CALVING EASE (CE): Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.

DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).

MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.

MILK (MLK): Pounds of weaning weight due to milk.

MARBLING (MARB): Carcass marbling score at 475 days.

MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.

TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario.

WEANING WEIGHT (WW): Pounds of weaning weight.

YEARLING WEIGHT (YW): Pounds of yearling weight.

YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

For more detailed information about EPDs and \$ indexes, visit: www.simmental.org

KBHR REVOLUTION

SIRE OF LOTS 34-41

One of the widest used purebred baldie purebred bulls in recent memory. The females read with added performance and stoutness and come in an attractive package. As years past the Revolution females will be his lasting legacy.

SCHOOLEY KNIGHT

SIRE OF LOTS 43-52

A bull who has continue to push our program in a positive direction. He has become a true dual purpose bull generating sale highlights in our annual bull sale while putting top notch females in our replacement pen. Genetically these females read with great carcass figures while having the phenotype we are after.

THE PROFIT PREDICTOR

BUILD A HERD THAT WORKS AS HARD AS YOU DO.

The American Simmental Association's \$All Purpose Index, or \$API, considers the cow herd while keeping pressure on terminal traits. And data from the last 25 years show it's working.

Something new this year we are offering 5 Fall heifer pairs. 471M is right off the top of the herd. She's an own daughter of the 75,000 KBHR Revolution and 420B cow family from clear Springs. Her fancy little heifer calf is one of the great prospects of the fall. Her sire is KBHR Motivated a sire you will hear many times this Feb in the bull sale. A PB heifer calf that already has the look to be a great one.

4110M female hails from the Game Changer sire. Game Changer was very successful at making both bulls and females. Not to mention they sold very well. 4110M is out a beautiful Epic daughter that gets better with age. Epic females are the best females on the ranch for staying in the herd and improving udders. Her motivated Motivated heifer will definitely be a nice edition to your herd.

Mainstay exhibits exactly what we're trying to make here at Schooley cattle. A true herd sire that builds them correctly from the ground up. Loads of body and dimension, length of spine and unmatched present and look. He takes no back to seat when it comes to data sets either. He's backed by one of the great Revolution daughters to date. Stacked with cow family's that stand the test of time. His popularity has continued to rise as he's being flushed to the most proven donors in the country. Mainstay first calf reports have been outstanding. We are excited to show you the sire group in the Spring of 2027. Selling 100 units in 10 lots.
